New approaches to a central area of Latter day Saint belief The Church of Jesus Christ of Latter day Saints and other Christians have always shared a fundamental belief in the connection between personal salvation and the suffering death and resurrection of Jesus Christ While having faith in and experiencing the atonement of Christ remains a core tenet for Latter day Saints some thinkers have in recent decades reconsidered traditional understandings of atonement Deidre Nicole Green and Eric D Huntsman edit a collection that brings together multiple and diverse approaches to thinking about Latter day Saint views on this foundational area of theology The essayists draw on and go beyond a wide range of perspectives classical atonement theories and contemporary reformulations of atonement theory The first section focuses on scriptural and historical foundations while the second concentrates on theological explorations Together the contributors evaluate what is efficacious and ethical in the Latter day Saint outlook and offer ways to reconceive those views to provide a robust theological response to contemporary criticisms about atonement Contributors Nicholas J Frederick Fiona Givens Deidre Nicole Green Sharon J Harris J B Haws Eric D Huntsman Benjamin Keogh Ariel Bybee Laughton Adam S Miller Jenny Reeder T Benjamin Spackman and Joseph M Spencer **A Short History of European Law** Tamar Herzog, 2018-01-08 A Short History of European Law brings to life 2 500 years of legal history tying current norms to the circumstances of their conception Tamar Herzog describes how successive legal systems built upon one another from ancient times through the European Union Roman law formed the backbone of each configuration though the way it was used and reshaped varied dramatically from one century and place to the next Only by considering Continental civil law and English common law together do we see how they drew from and enriched this shared tradition A remarkable achievement sure to become a go to text for scholars and students alike A must read for anyone eager to understand the origins of core legal concepts and institution like due process and rule of law that profoundly shape the societies in which we live today Amalia D Kessler Stanford University A fundamental and timely contribution to the understanding of Europe as seen through its legal systems Herzog masterfully shows the profound unity of legal thinking and practices across the Continent and in England Federico Varese Oxford University Required reading for Americanists North and South and indeed for all of us inhabiting a postcolonial world deeply marked by the millennia of legal imaginings whose dynamic transformations it so lucidly charts David Nirenberg University of Chicago *International Law* Lassa Oppenheim, 1912 **Introduction to the Study of International Law Designed as an Aid in Teaching, and in Historical Studies** Theodore Dwight Woolsey, 1886

and other modern law Charles Phineas Sherman,1917 **The Political Uncommons** Kathryn Milun,2016-12-05 In *The Political Uncommons* Kathryn Milun presents a cultural history of the global commons those domains including the atmosphere the oceans the radio frequency spectrum the earth s biodiversity and its outer space designated by international law as belonging to no single individual or nation state but rather to all humankind From the res communis of Roman property law to early modern laws establishing the freedom of the seas from the legal battles over the neutrality of the internet to the heritage of the earth s genetic diversity Milun connects ancient modern and postmodern legal traditions of global commons Arguing that the logic of legal institutions governing global commons is connected to the logic of colonial doctrines that dispossessed indigenous peoples of their land she demonstrates that the failure of international law to adequately govern the earth s atmosphere and waters can be more deeply understood as a cultural logic that has successfully dispossessed humankind of basic subsistence rights The promise of global commons Milun shows has always been related to subsistence rights and an earth that human communities have long imagined as common existing alongside private and public domains Utilizing specific case studies *The Political Uncommons* opens a way to consider how global commons regimes might benefit from the cross cultural logics found where indigenous peoples have gained recognition of their common tenure systems in Western courts Commentaries on Universal Public Law George Bowyer,1854 **A History of English Law** Sir William Searle Holdsworth,1924 Theory and Politics of the Law of Nations Tetsuya Toyoda,2011-09-23 Emergence of the modern science of international law is usually attributed to Grotius and other somewhat heroic founders of international law This book offers a more worldly explanation why it was developed mostly by German writers in the seventeenth and eighteenth centuries
