Ground Forces For A Rapidly Employable Joint Task Force First Week Capabilities For Short Warning Conflicts:

Ground Forces for a Rapidly Employable Joint Task Force E. C. Gritton, 2000 This monograph is a think piece about rapidly deployable future ground forces that would be used in time urgent joint task force missions The authors sketch out what is needed operationally describe forces responsive to those needs and discuss the feasibility of achieving such forces first with near term systems but new operational concepts and then for the longer term by drawing upon advanced technology *Ground Forces for a Rapidly Employable Joint Task Force First-Week Capabilities for Short-Warning Conflicts*, 2000 In many military interventions to deter or thwart an invader entering a country friendly to the United States the United States would benefit greatly from being able to employ within days rather than weeks a joint task force that would combine long range fires from aircraft and missiles with maneuver forces on the ground Although long range fires alone might be sufficient in some cases in many others they would not If suitable maneuver forces existed and could be used a function of circumstances they could greatly enhance the effectiveness of long range fires further damage and disrupt the enemy themselves hedge against some potential failures of the fires and accomplish other important objectives They could be especially valuable for conflicts in mixed terrain and in conflicts in which they linked up with significant friendly forces They could be quite useful in smaller scale contingencies as well as major wars For example had such forces existed in 1999 more options would have been available to NATO's political leaders in the early stages of the Kosovo operation

Network-centric Operations Case Study Daniel Gonzales, 2005 The authors of this report seek to understand how network centric operations NCO capabilities are a source of combat power for the Army's Stryker brigade and to determine the extent to which the tenets of NCO are realized by the unit Using a broad range of measures of effectiveness the authors compared the performance of a Stryker brigade with that of a nondigitized light infantry brigade in certification exercises at the Joint Readiness Training Center and found that the Stryker brigade's superior networking capabilities superior shared situational awareness speed of command and ability to control the speed of command vastly improved the brigade's performance in these exercises Using NCO measures of effectiveness this analysis sheds light on the NCO capabilities that made the Stryker brigade a more agile and effective combat force The authors conclude by discussing the potential implications of future NCO capabilities for future Army forces **BOOK JACKET** **New Challenges, New Tools for Defense**

Decisionmaking Stuart E. Johnson, Martin C. Libicki, Gregory F. Treverton, 2003 The collapse of the Soviet Union and the end of the Cold War and then the terrorist attacks of September 11 2001 transformed the task of American foreign and defense policymaking This book outlines the dimensions of that transformation and sketches new tools for dealing with the policy challenges from modeling and gaming to planning based on capabilities rather than threats to personnel planning and making use of best practices from the private sector The Stryker Brigade Combat Team Alan J. Vick, David T.

Orletsky, Bruce R. Pirnie, Seth G. Jones, 2002-12-24 Examines alternative means to decrease the deployment time for the new

Army medium weight brigade comparing air and sealift from the United States with air and fast but short range sealift from forward bases or preposition sites Historical experience and an assessment of U S regional interests are used to determine how much warning time the United States typically has before major force deployments and where it is most likely to deploy such forces *Intervening in Short-warning Conflicts*, 2000 A key element of the Department of Defense s effort to transform the force is developing capabilities for rapidly employable joint task forces JTFs In many plausible military interventions along the ill defined spectrum of small scale to large scale conflicts long range precision fires alone would not be sufficient and the JTFs would need ground maneuver forces employable within days of a decision to take action The RAND team recommends a three component first week ground force of Army and Marine Corps units that would incorporate The RAND analysis integrates work accomplished for recent Defense Science Board summer studies a 1999 study for the Department of Defense on force transformation and several other efforts for DoD and Army sponsors It also reflects much relevant experience of the Marine Corps The remainder of this brief elaborates on the team s conclusions *Air-Mech-Strike* BG (R) David L. Grange, BG (R) Huba Wass de Czege, LTC Richard D. Liebert USAR, Major Charles A. Jarnot, Major Al Huber, LT Mike Sparks, 2002-01-01 This book outlines how to reorganize the U S Army into a fully 2 and 3 Dimensional maneuver capable ground force with terrain agile armored fighting vehicles sized to rapidly deploy by fixed wing and rotary wing aircraft to the scene of world conflicts and strike at the heart of freedom s enemies The plan to build the Army into Air Mech Strike Forces exploiting emerging information age technologies as well as America s supremacy in aircraft and helicopter delivery systems at the lowest cost to the taxpayers is described in detail These Army warfighting organizations using existing and some newly purchased equipment will shape the battlefield to America s advantage preserving the peace before it is lost if not then winning fights that must be fought quickly The dangerous world we live in moves by the speed of the AIR and the 21st Century U S Army 2D 3D combat team will dominate this medium by Air Mech Strike *Policy Analysis in National Security Affairs* Richard L. Kugler, 2006 This book addresses how to conduct policy analysis in the field of national security including foreign policy and defense strategy It is a philosophical and conceptual book for helping people think deeply clearly and insightfully about complex policy issues This books reflects the viewpoint that the best policies normally come from efforts to synthesize competing camps by drawing upon the best of each of them and by combining them to forge a sensible whole While this book is written to be reader friendly it aspires to in depth scholarship **Metrics for the Quadrennial Defense Review's Operational Goals** Charles T. Kelley, 2003 Takes a first cut at identifying metrics for evaluating advancing and monitoring progress toward attaining the six operational goals highlighted in the 2001 Quadrennial Defense Review *Swarming and the Future of Warfare* Sean J. A. Edwards, 2005 Swarming occurs when several military units conduct a convergent attack on a target from multiple axes The author derives a simple theory that explains the phenomenology of swarming He considers command and control communications home field advantage surprise fratricide

and training and identifies the primary variables to most important successful swarming *Measuring Interdiction Capabilities in the Presence of Anti-access Strategies* Paul K. Davis, Jimmie McEver, Barry Wilson, 2002 This book discusses how U S capabilities for interdicting invading ground forces in the Persian Gulf can be adapted over time to maintain the ability to achieve an early halt or to counter maneuver forces in other plausible campaigns The authors emphasize exploratory analysis under massive uncertainty about political and military developments and about the detailed circumstances of conflict The book documents a specialized model used for mission system analysis which helps identify critical enablers of early halt capability deployment immediate command control intelligence surveillance and reconnaissance ability to employ interdiction forces quickly and weapon effectiveness The United States should expect threatened or actual use of mass casualty weapons against its forces and regional allies and enemy attempts to act quickly and with short warning On the other hand the threat s size and quality may be less than usually assumed On the military side the book characterizes parametrically the conditions for a successful early halt thereby identifying high priority strategic hedges capability developments and potential adaptations The book considers joint forces for interdiction and synergy with rapidly employable ground forces On the political side the book notes the premium on continued forward basing aggressive use of ambiguous warning and long range bombers Continued enforcement of red line constructs could greatly improve the likelihood of decisive response to ambiguous warning Countering anti access strategies would be enhanced by negotiating use of more distant bases and logistic preparation It will be increasingly unwise to assume use of forward bases even if technical analysis suggests that the bases could operate under attacks with mass casualty weapons **Enabling**

Technology for Simulation Science ,2001 *Evaluating Future Force Options for the U.S. Army* John D. Pinder, 2000 The purpose of this dissertation is to introduce and demonstrate a new approach to supporting high level decisions This new methodology the hybrid interactive multiple attribute exploratory HIMAX process combines multiple attribute decision making with exploratory modeling to integrate expert opinion to evaluate diverse options with the intent of generating useful insights The HIMAX process is demonstrated in this dissertation through an illustrative analysis of future military forces The specific options considered which include heavy armored medium weight and light infantry forces as well as tactical aircraft alone and in combination with special operations forces are evaluated and compared across a wide spectrum of ground oriented missions The unique contribution of this work is the HIMAX process itself and the mix of capabilities that it brings together especially the ability to explore implications of divergent minority opinions This dissertation should be of interest to high level decision makers in the Army and the Department of Defense specifically but also in other large private and public organizations It should also be of interest to scholars of decision analysis and operations research and practitioners of policy analysis defense planning and business strategy **Selected Rand Abstracts** Rand Corporation, 2000 Includes publications previously listed in the supplements to the Index of selected publications of the Rand Corporation Oct 1962 Feb 1963 **MR**
