Group Decision Making:

Small Group Decision Making B. Aubrey Fisher, Donald G. Ellis, 1990 Group Decision Making Hermann Brandstätter, 1982 **Individual and Group Decision Making** N. John Castellan, 2013-02-01 The idea for this volume took root during a recent annual convention of the American Psychological Association The contributors share a common vision of research in their particular area and have had an opportunity to debate and clarify their ideas Taken as a whole the fifteen chapters provide an exciting perspective of the field and form a basic set of readings for courses on individual and group decision making in a variety of disciplines The coverage from basic laboratory research to complex applied group decision processes should challenge researchers and students to pursue the field of decision making as enthusiastic scientists and practitioners *Improving Group Decision Making in Organizations* Richard A. Guzzo, 1982 Occupational psychology essays on group decision making particularly in relation to organization development includes a brief literature survey discusses the impact of group dynamics on learning behaviour and conflict resolution explains game theory and the importance of encouraging creative thinking References **Group Decision-making** Edward Lewis Cook, 2019 The present work explores improvements in group decision making It begins with a practical example using state of the art techniques for a complex high risk decision We show how these techniques can reveal a better alternative Although we created an improved decision process decision makers were apt to protect their own organizations instead of the project This tendency was reduced over the course of the decision making process but inspired the first conceptual component of this work The first concept describes the Cost of Conflict that can arise in a group decision using game theory to represent the non cooperative approach and comparing the outcome to the cooperative approach We demonstrate that it is possible for the group to settle on a non Pareto Nash equilibrium The sensitivity of the decision maker weights is revealed which led to the second conceptual portion of this work The second concept applies social network theory to study the influence between decision makers in a group decision By examining the number and strength of connections between decision makers we build from intrinsically derived weights to extrinsically derived weights by adding the network influences from other decision makers The two conceptual approaches provide a descriptive view of non cooperative decisions where decision makers still influence each other These concepts suggest a prescriptive approach to achieving a higher group utility **Group Decision Making under Multiple Criteria** Ching-Lai Hwang, Ming-Jeng Lin, 2012-12-06 This monograph is intended for an advanced undergraduate or graduate course of engineering and management science as well as for persons in business industry military or in any field who want an introductory and a capsule look into the methods of group decision making under multiple criteria This is a sequel to our previous works entitled Multiple Objective Decision Making Methods and Applications No 164 of the Lecture Notes and Multiple Attribute Decision Making Methods and Applications No 186 of the Lecture Notes Moving from a single decision maker the consideration of Lecture Notes 164 and 186 to a multiple decision maker setting

introduces a great deal of complexity into the analysis The problem is no longer the selection of the most preferred alternative among the nondominated solutions according to one individual's single decision maker's preference structure The analysis is extended to account for the conflicts among different interest groups who have different objectives goals and so forth Group decision making under multiple criteria includes such diverse and interconnected fields as preference analysis utility theory social choice theory committee decision theory theory of voting game theory expert evaluation analysis aggregation of qualitative factors economic equilibrium theory etc these are simplified and systematically classified for beginners This work is to provide readers with a capsule look into the existing methods their characteristics and applicability in the complexity of group decision making

Group Decision Making Thomas L. Saaty, Kirti Peniwati, 2013-11-15 When a group makes a decision that decision carries a lot more weight than when just one person does it Think of the founding fathers of the American constitution and how much power and influence their ideas have had in the entire world for more than two hundred years Also think of gravity a universal force brought about by an enormous number of minute particles that band together to make a universal law Together they create a massive force a law of nature alone they can barely be noticed That is how our minds work by deciding together to create a power that transcends our individuality Group decision making is a gift and an opportunity to create greater influence through the working together of many minds This book shows how to use the Analytic Hierarchy Process for hierarchical decision making and the Analytic Network Process for decision making in networks with dependence and feedback in group decision making Part I discusses the group and the decision and shows the importance of using a structured process particularly for those high value decisions involving many powerful parties with

different interests It discusses how to facilitate a group decision combine individual judgments and smooth differences to arrive at a decision that everyone can live with and get behind Part II discusses the group in planning and how to draw out differences Part III is about conflict resolution and Part IV is about how to address significant issues that come up in group decision making and shows that it is possible to construct an overall group preference *Effective Meetings* John E. Tropman,1995-11-15 The purpose of this book is to improve the decision making process in social work groups Illustrating the volume with various meeting models including advisory groups intergroup and intercultural meetings John E Tropman examines a number of critical issues facing social workers including family and community violence health care and homelessness New to this Second Edition is a discussion of the relationship between meetings and missions goals and external and internal forces *Team Decision Making Techniques* P. Keith Kelly,1999-04-26 Avoid the pitfalls of team decision making *Communication and Group Decision Making* Randy Y. Hirokawa,Marshall Scott Poole,1996-07-09 Communication and Group Decision Making takes stock of recent group communication research with an explicit focus on communication processes This book is recommended for academics professionals and researchers in communication and organization *Multi-objective Group Decision Making* Jie Lu,2007 This book proposes a set of models to describe fuzzy multi objective decision making MODM fuzzy multi criteria decision making MCDM fuzzy group decision making GDM and fuzzy multi objective group decision making problems respectively It also gives a set of related methods including algorithms to solve these problems One distinguishing feature of this book is that it provides two decision support systems software for readers to apply these proposed methods A set of real world applications and some new directions in this area are then described to further instruct readers how to use these methods and software in their practice [A field study of group decision-making in health care](#) Juliane Marold,Ruth Lassalle,Markus Schöbel,Dietrich Manzey,2013-11-01 The authors have undertaken a field study of daily decision making processes in groups under uncertainty in the health care domain The work follows the tradition of naturalistic decision making NDM research It aims to understand how groups in this high reliability context conceptualize and internalize uncertainties and how they handle them in order to achieve effective decision making in their everyday activities The work is based on observations of a specific kind of health care meeting where treatment options for cancer patients are discussed as well as on questionnaires completed by the participating physicians The researchers have analyzed the strategies used by people to cope with uncertainty including the order in which these strategies are used The have analyzed characteristics of decisions where the decision making process was judged by the experts involved to be good or acceptable The work identifies a new source of uncertainty not found in previous NDM studies divergent opinions held by decision makers in the group A strong hierarchy gradient in play during the meetings is perceived by group members as contributing to poor decision making performance The authors suggest a number of techniques which could be used to improve decision making performance including the use of formalized decision support procedures to more

clearly distinguish phases of presenting information and evaluating it and to encourage information exchange between group members Group leaders could be trained in coaching behaviour in order to improve psychological safety and other members could be trained to encourage speak up behaviour assertiveness
