Tools for Making Acute Risk Decisions CCPS (Center for Chemical Process Safety), 2010-09-14 The complexity of today s risk decisions is well known Beyond cost and risk there are many other factors contributing to these decisions including type of risk such as human injury or fatality the economic impact on the local community profitability availability of capital alternatives for reducing or eliminating the risk costs of implementing alternatives codes standards regulation and good industry practice This book presents a large range of

decision aids for risk analysts and decision makers in industry so that vital decisions can be made in a more consistent logical and rigorous manner Though primarily aimed at the process industry this book can be used by anyone who makes similar decisions in other industries including those in management science *Global Implications of Modern Enterprise Information Systems: Technologies and Applications* Gunasekaran, Angappa,2008-12-31 This book presents useful strategies techniques and tools for the successful design development and implementation of enterprise information systems Provided by publisher *ECRM2012- 9th European Conference on Research Methods in Business Management* Rachel McClean,2010

Building Education and Research Jay Yang, Weilen P. Chang,2005-08-17 State of the art topic Broad range of interested parties Internationally acclaimed experts Covers factors that change building research Different management strategies Evaluative methods of measurement **ECRM2012-Proceedings of the 11th European Conference on Research Methods** Rachel McClean,2012-01-01 Proceedings of the 11th European Conference on Research Methods in Bolton UK on 28 29 June 2011 **Environmental Security in Harbors and Coastal Areas** Igor Linkov, Gregory A. Kiker, Richard J. Wenning,2007-03-31 History has shown how powerful societies decline when natural resources are unable to be replenished This book explores the challenges facing coastal areas during in the near future It emphasizes beliefs that the convergence of seemingly disparate viewpoints and uncertain and limited information is possible only by using available risk assessment methodologies and decision making tools such as multi criteria decision analysis MCDA *Recommendations for evidence-based endoscopic surgery* Edmund Neugebauer, Stefan Sauerland,2013-11-22 **PRESIDENTIAL ADDRESS** There is no doubt that the content of this EAES Consensus Development Conferences CDC s booklet represents an extremely important contribution to answering the following questions which area of endoscopic surgery requires quality assurance what methodology should be employed what further action is required In order to try to answer these questions the Executive Office of the EAES decided to appoint an ad hoc working group which started its activity in 1993 Under the Presidency of Professor Hans Troidl and the scientific mandate of Professor Edmund Neugebauer the Consensus Development Conferences appeared as one of the essential educational programmes of the EAES These were organized thanks to the scientific and secretarial assistance of the 2nd Department of Surgery University of Cologne Besides the appointed chairperson each Conference was led by a clinical chairman who included surgical experts from various countries of Europe J Perissat W Wayand A Fingerhut A Paul E Eypasch C K Kum Of course the EAES Congress Presidents and the panel members should be acknowledged for their important input in the Consensus Conferences From 1994 to 1998 six themes of endoscopic surgery have been assessed and their recommendations were presented and discussed during the European Congresses held in Madrid Trondheim Istanbul and in the World Congress Rome 98 **Tutorial Distance Learning** Alfred Bork, Sigrun Gunnarsdottir,2012-12-06 Learning is a critical worldwide problem for humans essential to create a peaceful and happy world We have serious problems in learning in both wealthy and poor areas New approaches to

learning are needed as the current system may not rise to the new challenges This book proposes a new strategy for learning worldwide and for all ages of students Computer based distance learning would be the major delivery mechanism with very large numbers of students The very frequent interactions between the student and the computer would be like that with a skilled human teacher These interactions would take place in the student's native language in both directions A typical interaction would be a question to a student and a free form student response Both voice and keyboard student input would be possible The learning programs would work with each student until mastery is achieved adapting to the needs of each Students would be active learners The book begins with the problems and goals of learning It considers possible forms of distance learning looking at the variables involved current examples of distance learning and possible future forms including examples from science fiction It then investigates student interactions considering both frequency of interactions and the quality of each interaction Programs developed in the Educational Technology Center at the University of California Irvine illustrate the critical idea of tutorial learning with computers Production of tutorial learning material and costs for a student hour of learning is discussed The book ends with suggestions for future progress Current hardware and software is fully adequate for the tasks described Development of all required learning units is a major activity After this development both better quality of learning and lower costs are very likely Further experimental work is essential to understand the possibilities

Design Methodology and Relationships with Science Marc J de Vries, Nigel Cross, D.P. Grant, 2013-03-09 Many business corporations are faced with the challenge of bringing together quite different types of knowledge in design processes knowledge of different disciplines in the natural and engineering sciences knowledge of markets and market trends knowledge of political and juridical affairs This also means a challenge for design methodology as the academic discipline that studies design processes and methods The aim of the NATO ARW of which this book is the report was to bring together colleagues from different academic fields to discuss this increasing multidisciplinary in the relationship between design and sciences This multidisciplinary made the conference a special event At a certain moment one of the participants exclaimed This is not a traditional design methodology conference Throughout the conference it was evident that there was a need to develop a common language and understanding to enable the exchange of different perspectives on design and its relationship with science The contributions that have been included in this book show these different perspectives the philosophical the historical the engineering perspective and the practical designer's experience
