## **Growing Up In A Classless Society School To Work Transitions Edinburgh Education And Society:**

Growing Up in a Classless Society? Andy Furlong, 1992 The idea of a classless society is very much in the forefront of current political debate For young people who are reaching adulthood and making the difficult transition from school to work how does this new social order present itself Dr Furlong examines this question using material drawn from a nationally representative sample of over 4 000 young people who were contacted over a two and a half year period He describes their experiences in the light of education s newly acquired emphasis on vocationalism the growing problem of youth unemployment and the replacement of jobs for school leavers by training schemes From a desire to investigate whether or not there exists a new sense of equality of opportunity the conclusion reached is that despite radical social and educational changes the experience of young people moving between school and work has been little affected real progress towards a truly classless society is hard to identify

Towards a Classless Society? Helen Jones, 2005-08-02 An alternative to the right wing paradigm which has hijacked discussions of class this book focuses on the specific ways in which class inequalities manifest themselves in Britain and exposes the hollowness of politicians rhetoric over the classless society

**Differing Visions of a Learning Society Vol 1** Frank Coffield, 2000-07-26 This volume provides an examination of what is meant by the learning society and how it can contribute to the development of knowledge and skills for employment and other areas of adult life

The Education and Employment of Disabled Young People Tania Burchardt, 2005 Improving educational attainment and raising employment rates among disadvantaged groups are key targets for the current government This report shows that for one important group disabled young people these goals are far from being achieved The report analyses nationally representative data to show that parental background is more important than disability status in shaping young people s aspirations despite high aspirations educational and occupational outcomes are significantly worse for disabled young people and the gap between disabled and non disabled young people s experiences widens as they get older The report argues that while mainstream and comprehensive education may have succeeded in raising aspirations for disabled young people this has not been translated into real opportunities in early adult life It also highlights the need for a new direction in careers advice and welfare to work programmes Frustrated ambition The education and employment of disabled young people is essential reading for academics policymakers and practitioners with an interest in the role aspirations play in education and employment

The Changing Adolescent Experience Jeylan T. Mortimer, Reed W. Larson, 2002-09-05 The path adolescents take from childhood to adulthood is a product of social economic political and technological forces These forces may facilitate youth s preparation to become healthy adults or they may leave youth unprepared for adulthood Knowledgeable projections are vital in shaping the agenda for research for alerting educators policy makers and practitioners to new issues and for formulating thoughtful responses to emerging dilemmas This book focuses upon the future of adolescence in postindustrial societies The authors identify some ominous societal changes that

will affect youth unstable job markets competition for public resources due to an aging population and widening income gaps between information workers and low skill workers But they also observe opportunities created by information technology innovations in health service delivery and criminal justice rehabilitation and the resourcefulness of a new generation This volume examines these and other macro structural changes that will impact adolescents lives and their futures as adults

**Education, Training and the Future of Work II** Mike Flude,Sandy Sieminski,2013-10-18 This volume focuses on the recent changes in education and training policy mainly in the UK The considerable developments of past years and the ways in which they have affected both education and training are examined The contributors analyse the methods by which we educate our workforce and look closely at the kind of training now offered to those in work The chapters in this reader cover the role of the state how economic factors influence education national education and training policy the political factor Other countries including Germany are looked at and there is reflection on the ways in which the new industry led qualifications such as NVQs have fared There is careful analysis as to how much the political climate of the time influenced developments There is thorough research to back up claims made throughout the book and many practical examples are referred to What emerges is an incisive examination of current trends in education and the workplace *The Changing Face of Further Education* Terry Hyland,Barbara Merrill,2003-12-16 This book sets current policy and practice concerns against the backdrop of community education and employs case studies to chart the developments and changes that have taken place in FE

**The Middling Sorts** Maureen T. Hallinan,2000-04-30 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system Triumphs and Tears Phil Hodgkinson,Heather Hodgkinson,Andrew C. Sparkes,2013-11-26 First Published in 1996

The transition from school to work has always been a crucial time in the lives of young people How and when this transition

is made can have a major impact upon the sense of identity they develop the importance they feel they have in the eyes of others the kind of person they want to be and their view of the world in general This book is about the nature of that transition for one small group of young people making the journey in the new policy environment of post Thatcherite Britain

*Education, Training, and the Future of Work* Michael Flude, Sandy Sieminski, 1999 This volume focuses on the recent changes in the late 1990s in education and training policy mainly in the UK

**Young People's Perspectives on Education, Training and Employment** Lorna Unwin, Jerry Wellington, 2013-11-05 Based on interviews with over 150 young people in education and training this volume reflects on their perspectives on the issues and challenges that education and training have to offer

**Education and Work in Great Britain, Germany and Italy** Annette Jobert, Catherine Marry, Helen Rainbird, Lucie Tanguy, 2013-05-13 This volume examines the multiple connections between education broadly defined and work through an analysis of the literature on the transition from school to work on vocational training and on the labour market It shows that concepts such as skill unemployment rates young people and the transition from school to work are socially constructed and are thought about in ways which are nationally specific This book is essential reading for students of European training systems and for those conducting comparative European research

*Young People in the Workplace* Christina Cregan, 1999 Based on a five stage survey of a large cohort of early school leavers carried out in London over the years 1978-81 examines patterns of continuity and change with respect to gaining work and training promotion opportunities reasons for union membership quit decisions and job mapping behaviour and its outcomes

*The Middling Sorts* Burton J. Bledstein, Robert D. Johnston, 2013-10-31 According to their national myth all Americans are middle class but rarely has such a widely used term been so poorly defined These fascinating essays provide much needed context to the subject of class in America

**Curriculum Making in Post-16 Education** Martin Bloomer, 2002-03-11 It is widely agreed that the post 16 curriculum in England and Wales is inadequate mainly due to the successive reforms of various governments YTS was a reaction to problems of youth unemployment CPVE and BTEC embraced a broad concept of vocationalism and even with the introduction of NVQ and GNVQ the A level retains its gold standard in the eyes of many The post 16 curriculum that has emerged is hardly coherent So how can teachers translate an externally imposed curriculum into a meaningful learning experience for students Drawing on solid research in post 16 education this book makes explicit the nature of flaws in policy and provides an account of how teachers and students construct their roles It puts forward the case for a radical reappraisal and identifies appropriate aims and organising principles for a post 16 curriculum for the future Martin Bloomer is currently Dean of the Faculty of Education at Exeter University

**Bourdieu and Education** Dr Michael Grenfell, David James, 2003-09-02 This text details the practical applications of Bourdieu's theories in a series of specific pedagogic research studies showing how his ideas can be put into practice Language gender career decision making and the experience of higher education students are all covered Questions are also raised concerning research methodology The authors examine

Bourdieu's interest in the position of the researcher within the research process. Bourdieu's influence is traced in aspects both of theory and practice. Finally, principles, approaches, methods, and techniques that may be derived from Bourdieu are suggested and assessed for practical use in research.

**The University Challenge (2004)** Pugsley Lesley, 2018-02-19  
 Published in 2004, this book discusses whether the rhetoric of the market in higher education is matched by the realities of choice. In the first comprehensive study of higher education markets and sixth form choice, Lesley Pugsley argues that the annual burst of media-fuelled panic about university entrance leads to a misinformed rhetoric about the purpose and value of higher education. This is a benchmark study based on the 1997 cohort of students who were last to enter higher education under the Robbins 1963 banner of free education. Tracking a group of students throughout their sixth form careers, Pugsley provides a balanced account of the tensions experienced by the students, their parents, and their teachers in an increasingly market-orientated higher education society. This book was originally published as part of the Cardiff Papers in Qualitative Research series, edited by Paul Atkinson, Sara Delamont, and Amanda Coffey. The series publishes original sociological research that reflects the tradition of qualitative and ethnographic inquiry developed at Cardiff. The series includes monographs reporting on empirical research, edited collections focussing on particular themes, and texts discussing methodological developments and issues.

**Youth, The 'Underclass' and Social Exclusion** Robert MacDonald, Robert Macdonald, 2020-07-24  
 The idea that Britain, the US, and other western societies are witnessing the rise of an underclass of people at the bottom of the social heap, structurally and culturally distinct from traditional patterns of decent working class life, has become increasingly popular in the 1990s. Anti-work, anti-social, and welfare-dependent cultures are said to typify this new dangerous class, and dangerous youth are taken as the prime subjects of underclass theories. Debates about the family and single parenthood, about crime, and about unemployment and welfare reforms have all become embroiled in underclass theories which, whilst highly controversial, have had remarkable influence on the politics and policies of governments in Britain and the US. *Youth, the Underclass and Social Exclusion* constitutes the first concerted attempt to grapple with the underclass idea in relation to contemporary youth. It focuses upon unemployment, training, the labour market, crime, homelessness, and parenting, and will be essential reading for students of social policy, sociology, and criminology.

**Youth and Policy** Howard Williamson, 2019-06-04  
 First published in 1997, this volume is concerned primarily, though not exclusively, with one particular vulnerable group: unqualified young men on the margins. These young men, whose cultures of machismo, manualism, and anti-mentalism previously served to prepare them for the manual labour market, are increasingly the careerless, the jobless, and the folk devils of the modern post-industrial society. In research, they have received considerable attention, though more for their capacity to be spectacularly deviant and bizarre than through the deep anxieties and despondency about the future experienced by many. Howard Williamson contends that the development of effective youth policy depends essentially upon a synthesis of political priorities, professional agendas, and young people's perspectives, and

responses While not quite an underclass many suffer from a tangle of pathologies which obstructs the possibility of them finding a way back into mainstream economic housing and relationship transitions      **Critical Education for Work**  
Richard D. Lakes, 1994 This book expands the meaning of today's education for work by offering five multidisciplinary approaches school to work transitions gender equity labor education economic democracy and vocational education revealing the complexities of personal social and cultural transformation Education for work is analyzed from critical perspectives bringing to attention the need for individuals to recognize their civic responsibilities when entering the workforce to understand frameworks from establishing industrial and economic democracy and to acquire actions for maintaining principles of equality and social justice Examples are drawn from original research and applications in schools and in non school settings
