The Primal Wound John Firman, Ann Gila, 1997-04-25 Argues that a primal wounding of the human spirit occurs in earliest human life that disrupts fundamental relationships and leads to anxiety loneliness and alienation and shows how this wounding can be redeemed through therapy and through living one's life differently To many of us modern life is a headlong rush to avoid dark feelings that threaten to disrupt our lives at every turn In order to block the surging tide of this hidden level of experience we become enthralled with violence sex and mass media and addicted to alcohol drugs and power and we compulsively strive for romance success and control All of this according to the authors can be traced to the primal wound a dark specter of isolation abandonment and alienation haunting human life The primal wound is the result of a violation we all suffer in various ways beginning in early childhood and continuing throughout life Because we are treated not as individual unique human beings but as objects our intrinsic authentic sense of self is annihilated This primal wounding breaks the fundamental relationships that form the fabric of human existence the relationship to oneself to other people to the natural world and to a sense of transpersonal meaning symbolized in concepts such as the Divine the Ground of Being and Ultimate Reality In this book Firman and Gila apply object relations theory self psychology transpersonal psychology and psychosynthesis to the issues of psychological wounding healing and growth and show how this wounding can be redeemed through therapy and through changing one's way of living Firman and Gila integrate important material from diverse schools of psychology and then expand it with their personal touch The Primal Wound presents a scholarly yet understandable to the educated lay person description of some of the important dynamics of psychological wounding from a broad perspective while also going deep into the soul and even exploring our relationship to God There is little available on this topic and in the area of trauma psychology Charles Whitfield M D author of Memory and Abuse Remembering and Healing the Wounds of Trauma I believe this book's central thesis to be highly provocative and important Its strength is that it uses the idea of the primal wound as a focus for a diverse collection of ideas from various sectors of the psychological and transpersonal literature This kind of integrative scholarly work is very valuable John Suler author of Contemporary Psychoanalysis and Eastern Thought John Firman and Ann Gila are teachers authors and psychotherapists in private practice in Palo Alto California Both were trained in psychosynthesis in the early 1970s and Firman trained with its founder Roberto Assagioli They are adjunct faculty members at the Institute of Transpersonal Psychology and lead public and professional programs

both in the United States and abroad *Personification* John Rowan, 2009-12-04 Personification discusses the theory behind multiplicity of the person and reveals new thinking and research in the field as well as offering guidelines for using this information in practice *Consensus in the Classroom* Linda Sartor, Molly Young Brown, 2004 Born out of a passionate interest in environmental education Linda Sartor began experimenting with consensus decision making in her public school classrooms This book reports on what she did and what she discovered in the process She found that consensus in the classroom works as both an instructional strategy and a classroom management approach and fosters a lively learning community It both requires and generates a paradigm shift in a teacher's relationship with students and students' relationships with each other This book will inspire and assist educators to use the consensus process in and out of the classroom **Praying with Body and Soul** Jane E. Vennard, 1998-10-01 Praying with Body and Soul involves the whole person our senses our bodies at rest or in motion our imaginations as well as our minds and emotions By paying prayerful attention to the body people will not only recognize the ways in which they already pray but will learn how to deepen their relationship with God Each chapter includes questions for reflection and practical exercises such as drawing walking meditation fasting making music dancing and praying in sickness and disability This guide to prayer can be used by individuals prayer partners and small groups Teaching Business Sustainability Chris Galea, 2017-11-28 In a world where corporate governance scandals have become the everyday the role of business schools in producing the managers of today and tomorrow has come into sharp focus Today's managers and the MBAs that will follow them are in need of an education that grounds business ethics and the overarching concerns of sustainable development into the curriculum As some but by no means all organisations are coming to realise bad performance in environmental protection labour practices and human rights is no longer a soft issue but one that can hit the bottom line with a vengeance So what is the state of the art in teaching business sustainability worldwide and what teaching practices and tools are achieving successful results This book begins to answer these questions and more There are many challenges facing educators in the field of sustainability It is an evolving field still in its infancy as a management discipline and there is also the need to combat the unstated but often underlying assumption that many environmental and social issues represent non valued added effort Teaching Business Sustainability acknowledges this problem while helping students explore the various ways in which the theoretical value of business sustainability can result in valuable and value added practical outcomes A wide mix of approaches is therefore indicated while many of these are experimental and on the leading edge of management learning they all share an experiential and often a team based element and attempt to bring together the theory in a way that makes it relevant to practitioners in the field The implication is that whenever possible educators need to link the learning to the students' immediate and pressing real world realities This applies equally to undergraduates or high level executives However in the absence of immediate examples of such realities as may often be the case in undergraduate settings educators need to

introduce experientially based approaches that recreate such settings in the classroom The book also argues the case for holistic and interdisciplinary learning It is clear from much of the literature on sustainability that the concept does not easily lend itself to being pigeonholed and that it crosses many of the functional areas of business Indeed it goes beyond just business learning to encompass many fields such as ecology engineering and biology If students are to move beyond the narrow perspective that conventional business studies often entail they need to be introduced to the wider vision that an interdisciplinary approach engenders The final point that emerges from this collection is that experiential learning of business sustainability often can and should be fun Be it a heated exchange in a case study discussion a role play exercise or a hands on student consulting project much experiential learning seems to excite the imagination of the students and to release their creative juices The 23 contributions to Teaching Business Sustainability have been divided into three thematic groups In the first section Theory Critique and Ideas the authors explore and critique some of the overarching ideas and thinking behind the teaching of sustainability The next section Learning from Current Practice contains the experiences of a number of educators and the successful and leading edge approaches that they have used The final section then outlines tools methods and approaches that can be used to teach business sustainability This last section also serves as an introduction to a second volume Teaching Business Sustainability Vol 2 which provides educators of sustainability with a series of case studies role plays and experiential exercises Teaching Business Sustainability is an invaluable resource both for educators working in a wide range of academic disciplines looking for inspiration and guidance on how to teach business sustainability as well as for organisations looking to reinvigorate internal management education programmes to factor in corporate responsibility and sustainability issues
