Growing With Your Child Reflections On Parental Development:

Growing with Your Child Elin Schoen, 1995 In this first book to thoroughly explore parenthood as a significant force in adult development Schoen uses fascinating literary references and interviews with dozens of mothers and fathers biological and adoptive single and married to confirm and expand on little known theories of parent development set forth by Erik H Erikson Therese Benedek Selma Fraiberg and others Handbook of Parenting Marc H. Bornstein, 2019-02-01 This highly anticipated third edition of the Handbook of Parenting brings together an array of field leading experts who have worked in different ways toward understanding the many diverse aspects of parenting Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent professional and policymaker wonders about Parenting is a perennially hot topic After all everyone who has ever lived has been parented and the vast majority of people become parents themselves No wonder bookstores house shelves of how to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice However almost none of these is evidence based The Handbook of Parenting is Period Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic a discussion of central issues and theory a review of classical and modern research and forecasts of future directions of theory and research Together the five volumes in the Handbook cover Children and Parenting the Biology and Ecology of Parenting Being and Becoming a Parent Social Conditions and Applied Parenting and the Practice of Parenting Volume 3 Being and Becoming a Parent considers a large cast of characters responsible for parenting each with her or his own customs and agenda and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is Chapters in Part I on The Parent show just how rich and multifaceted is the constellation of children s caregivers Considered first are family systems and then successively mothers and fathers coparenting and gatekeeping between parents adolescent parenting grandparenting and single parenthood divorced and remarried parenting lesbian and gay parents and finally sibling caregivers and nonparental caregiving Parenting also draws on transient and enduring physical personality and intellectual characteristics of the individual The chapters in Part II on Becoming and Being a Parent consider the intergenerational transmission of parenting parenting and contemporary reproductive technologies the transition to parenthood and stages of parental development and then chapters turn to parents well being emotions self efficacy cognitions and attributions as well as socialization personality in parenting and psychoanalytic theory These features of parents serve many functions they generate and shape parental practices mediate the effectiveness of parenting and help to organize parenting *Handbook of Parenting: Being and becoming a parent* Marc H. Bornstein, 2002 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen

versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny Growing Each Other Up Sara Lawrence-Lightfoot, 2016-09-29 From growing their children parents grow themselves learning the lessons their children teach Growing up then is as much a developmental process of parenthood as it is of childhood While countless books have been written about the challenges of parenting nearly all of them position the parent as instructor and support giver the child as learner and in need of direction But the parent child relationship is more complicated and reciprocal over time it transforms in remarkable surprising ways As our children grow up and we grow older what used to be a one way flow of instruction and support from parent to child becomes instead an exchange We begin to learn from them The lessons parents learn from their offspring voluntarily and involuntarily with intention and serendipity often through resistance and struggle are embedded in their evolving relationships and shaped by the rapidly transforming world around them With Growing Each Other Up Macarthur Prize winning sociologist and educator Sara Lawrence Lightfoot offers an intimately detailed emotionally powerful account of that experience Building her book on a series of in depth interviews with parents around the country she offers a counterpoint to the usual parental development literature that mostly concerns the adjustment of parents to their babies rhythms and the ways parents weather the storms of their teenage progeny The focus here is on the lessons emerging adult children ages 15 to 35 teach their parents How are our perspectives as parents shaped by our children What lessons do we take from them and incorporate into our worldviews Just how much do we learn often despite our own emotionally fraught resistance from what they have seen of life that we perhaps never experienced From these parent portraits emerges the shape of an education composed by young adult children an education built on witness growing intimacy and acceptance Growing Each Other Up is rich in the voices of actual parents telling their own stories of raising children and their children raising them watching that fundamental connection shift over time Parents and children of all ages will recognize themselves in these evocative and moving accounts and look at their own growing up in a revelatory new light *Smart Parenting: The Ultimate Guide to Raising a Happy and Successful Child* Shu Chen Hou, Looking for the ultimate guide to raising a happy and successful child Look no further than *Smart Parenting* This comprehensive guide offers everything you need to know to help your child thrive from understanding their developmental needs and fostering emotional intelligence to promoting healthy habits and balancing work and family life With over 18 chapters of expert advice *Smart Parenting* covers a wide range of topics including setting boundaries fostering self esteem and confidence promoting a growth mindset communicating effectively and much more Each chapter is
