come back year after year without fail when in reality it is either so tender that the only chance of it surviving an average British winter is in a greenhouse or it is a short lived perennial that is unlikely to flourish beyond two years anyway and even then only if the local slugs and snails are on a diet This book cuts through the horticultural sales pitches by listing 100 plants which for little care beyond the essential watering at planting time can reliably be expected to thrive in just about any garden These plants are all but indestructible pests give them a wide berth they will prosper in any reasonable garden soil and will withstand anything that the UK climate throws at them Divided into sections for shrubs conifers climbers perennials grasses annuals alpine and bulbs and with each entry having a Value For Money VFM rating out of 10 this easy to use guide will prove invaluable not only for the new gardener but also for old hands who are fed up with wasting time and money on plants that all too rapidly lose the will to live With these suggestions you can be assured of year round colour and interest in your garden for the minimum of effort

Roses Down Under Dawn Eagle, 2013-10-31 The rose is undoubtedly the most popular garden flower in the world When settlers came from the Northern Hemisphere to Australia and New Zealand they brought their treasured roses with them Roses Down Under follows the way roses may have been introduced into both countries where they are not indigenous In each country enthusiastic gardeners and Rosarians such as Alister Clark and Ron Bell in Australia and Ken Nobbs and Sam McGredy in New Zealand were inspired to develop their own varieties There is a chapter dealing with the complexities of hybridisation going through the process step by step so the reader can follow in their footsteps Various rose breeders from both countries both professional and amateur are listed

together with numerous photographs of their significant varieties These illustrate the differences as well as the similarities of roses produced in Australia and New Zealand since the days of the first settlers The Victoria State Rose Garden at Werribee outside Melbourne has been chosen to represent the large number of rose gardens in Australia with many photographs illustrating the diverse collection of roses growing there In New Zealand the Trevor Griffiths Rose Garden in Timaru was chosen because of the comprehensive nature of roses planted in that very interesting garden The final chapter asks where roses will be in the future Will varieties produced in each country be similar or very different One thing is sure They will always be for gardeners the Queen of Flowers
