Growing Up Jim Crow Jennifer Ritterhouse,2006-12-13 In the segregated South of the early twentieth century unwritten rules guided every aspect of individual behavior from how blacks and whites stood sat ate drank walked and talked to whether they made eye contact with one another Jennifer Ritterhouse asks how children learned this racial etiquette which was sustained by coercion and the threat of violence More broadly she asks how individuals developed racial self consciousness Parental instruction was an important factor both white parents reinforcement of a white supremacist worldview and black parents oppositional lessons in respectability and race pride Children also learned much from their interactions across race lines The fact that black youths were often eager to stand up for themselves despite the risks suggests that the emotional underpinnings of the civil rights movement were in place long before the historical moment when change became possible Meanwhile a younger generation of whites continued to enforce traditional patterns of domination and deference in private while also creating an increasingly elaborate system of segregation in public settings Exploring relationships between public and private and between segregation racial etiquette and racial violence *Growing Up Jim Crow* sheds new light on tradition and change in the South and the meanings of segregation within southern culture

This guide to rewriting the rules of management is perfect for millennials looking to achieve career and professional success. Millennials have begun moving into management positions everywhere and are shaking up the workplace as they go. The generation that was raised in an age of instant communication and questioning authority has begun tearing down the corporate ladder, communicating on the fly, and bringing play to work. Even with all the exciting potential that lies ahead for these creative, bold thinkers, it will be pointless if they cannot effectively bridge the gap between the hierarchical management style of senior executives and the casual, collaborative approach of their peers. *Manager 3.0* is the first management guide written exclusively for the Millennial generation where you will learn how to master crucial skills such as dealing with difficult people, delivering constructive feedback, and making tough decisions. You will also gain insight into the four generations currently in the workplace and how they can successfully bring out the best in each. Packed with company interviews and corporate examples, *Manager 3.0* will help these promising new managers connect with and encourage the unique talents of the generations around them while also developing an effective leadership style of their own. **Growing Up in the People's Republic** W. Ye, 2005-12-10

In a conversational style and in chronological sequence, Ye Weili and Ma Xiaodong recount their earlier lives in China from the 1950s to the 1980s, a particularly eventful period that included the catastrophic Cultural Revolution. Using their own stories as two case studies, they examine the making of a significant yet barely understood generation in recent Chinese history. They also reflect upon the mixed legacy of the early decades of the People's Republic of China (PRC). In doing so, the book strives for a balance between critical scrutiny of a complex era and the sweeping rejection of that era that recent victim literature embraces. Ultimately, Ye and Ma intend to reconnect themselves to a piece of land and a period of history that have given them a sense of who they are. Their stories contain intertwining layers of personal, generational, and historical experiences. Unlike other memoirs that were written soon after the events of the Cultural Revolution, Ye and Ma's narratives have been put together some twenty years later, allowing for more critical distance. The passage of time has allowed them to consider important issues that other accounts omit, such as the impact of gender during this period of radical change in Chinese women's lives. *Strangers in a Strange Land* William

Ronnie Carr,Paul Light,Martin Woodhead,2014-02-04 The final reader in the Child Development in Social Context series shows how the study of child development is inevitably bound up in more ephemeral cultural ideas about the nature and needs of children and in the educational practices that rise from these ideas Some readings point to the dangers which can arise from the meeting of science and cultural values using for illustration studies of the role of psychological theory in reinforcing social attitudes to child care inside and outside the family Other readings look at children s initiation into that relatively recent cultural invention the school and the relationship with their learning at home There are studies of their social development in classroom and playground with particular emphasis on ethnic relationships
