Longo, 2018-02-01 This second edition offers an expanded and updated history of the field of fetal and neonatal development allowing readers to gain a comprehensive understanding of the biological aspects that contribute to the wellbeing or pathophysiology of newborns In this concluding opus of a long and prominent career as a clinical scientist Dr Longo has invited new contributions from noted colleagues with expertise in various fields to provide a historical perspective on the impact of how modern concepts emerged in the field of fetal physiology and contributed to the current attention paid to the fetal origins of diseases in adults In addition to new chapters on maternal physiology and complications during pregnancy others trace the history of the Society for Reproductive Investigation governmental funding of perinatal research and major initiatives to support training in the new discipline of maternal fetal medicine including the Reproductive Scientist Development program The extensive survey provided by the author who personally knew most of the pioneers in the field offers a unique guide for all clinical and basic scientists interested in the history of and future approaches to diagnosing and treating pathologies that represent the leading causes of neonatal mortality and far too often life long morbidity **Growth in Length** Richard Assheton, 2015-07-21 Excerpt from Growth in Length Embryological Essays The three Lectures forming the first part of this book were given as one of the Advanced Courses in Zoology in the University of London They were delivered at Guy s Hospital on January 23rd January 30th and February 6th 1913 under the title The Growth in Length of the Vertebrate Embryo They are now published in accordance with the known intention of the author and in response to the expressed wish of some of those who heard them Although my husband had destined this work for publication he had not actually prepared it for the press but the Lectures were typewritten and some corrections and notes had been added to them For help in arranging them for print I am greatly indebted to Professor Stanley Gardiner F R S and to Professor J P Hill F R S who have most kindly read the mss and to the latter especially for valuable suggestions as to some alterations in the original wording which while adapted for lecturing purposes might not always have been clear to the reader The figures have been drawn by Miss D Thursby Pelham from the sketches given in the MSS referring to lantern slides and diagrams displayed during the lectures The cost of publication is partly defrayed by a grant from the Royal Society The second part of the book consists of a reprint of a paper on the Mechanics of Gastrulation which appeared in the Archiv fur Entwicklungsmechanik der Organismen in 1910 It is here included as the subject is kindred to that of the lectures and also because it is often in demand and further copies are unobtainable About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged
