**Human Development from Middle Childhood to Middle Adulthood** Lea Pulkkinen, 2017-06-26 This seminal work focuses on human development from middle childhood to middle adulthood through analysis of the research findings of the groundbreaking Jyv skyl Longitudinal Study of Personality and Social Development JYLS The JYLS project which began in 1968 has generated extensive publications over many years but this is the first comprehensive summary that presents the conceptual framework the research design and methodology and the findings The study looks at the development over time of issues related to personality identity health anti social behavior and well being and is unparalleled in its duration intensity comprehensiveness and psychological richness The thorough synthesis of this study illustrates that there are different paths to adulthood and that human development cannot be described in average terms The 42 year

perspective that the JYLS provides shows the developmental consequences of children's differences in socioemotional behavior over time and the great significance of children's positive socioemotional behavior for their further development until middle age. **A Contextual Approach to Human Development** Ashok K. Srivastava, Girishwar Misra, 2024-09-06 This textbook offers a unique insight into the theoretical and applied aspects of human development in relation to the cultural traditions of non-Western countries. Presented in a modular form, this comprehensive and thematic approach to lifespan development will help students develop an understanding of human development in varied Indian social contexts. Covering all stages of development, including the development of self and personality, social understanding, human strengths, sustainable development, lifelong learning, and many more, the book highlights current research in these areas as well as provides learning objectives, points for reflection, web links, and a glossary. This book is an essential reading for undergraduate students of psychology, human development, and allied fields, as well as for postgraduates with an interest in studying human development in a non-Western context.

**The Psychological Development of Girls and Women** Sheila Greene, 2014-02-25 In this book, Sheila Greene presents a challenging new perspective on the psychological development of girls and women, which emphasises the central role of time in human development. She critically reviews traditional and contemporary theoretical approaches, ranging from orthodox psychoanalysis to relational and postmodern theories, and argues that even those claiming to be focused on development have presented a view of women's lives as fixed and determined by their nature or their past. These theories, she believes, should be rejected because of their inherent lack of validity and their frequently oppressive implications for women. Greene's approach places primary importance on temporality itself and on the competing discourses on time, age, and development, which play an active role in the construction of the lives of girls and women. Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasises temporality, emergence, and human agency. The result is a liberating theory of women's psychological development as constantly emerging and changing in time, rather than as static and fixed by their nature, socio-cultural context, and personal history. *The Psychological Development of Girls and Women* will be essential reading for students and researchers in the psychology of women, developmental psychology, and women's studies.
