Growth Processes and Distributional Change in a South Chinese Province Peter Nolan, 1983 Growth Processes and Distributional Change in a South Chinese Province Peter Nolan, 1983 **Growth Processes and Distributional**

Change in a South Chinese Province David S. G. Goodman, Kenneth Richard Walker, Peter Nolan, Robert F. Ash, 1978

The Industrialization of Rural China Chris Bramall, 2007 The Industrialization of Rural China highlights the economic social achievements of the Maoist regime Using a constructed dataset covering China's 2000 plus counties complemented by a detailed econometric study of county level industrialization in the provinces of Sichuan Guangdong Jiangsu the author shows that history mattered *Unstately Power* Lynn T. White, III, 2015-06-03 A critique of America's flawed Asia policy that centres on US Japan relations but harkens back to the same disastrous views that drew America into Vietnam The technique is a narrative flow of short vignettes woven into longer chapters the main strands are personal reflections and interviews

State and Market in the Chinese Economy P. Nolan, 1993-04-27 The book provides a unique examination of the relationship between the state and market in China's economic development over several centuries Its analysis is situated in the wider context of debates about technical progress in the pre modern world about the impact of western imperialism about the role of the state in the economic development of poor countries and in the transition of former communist countries away from Stalinist systems of political economy *Making Sense of Joan Robinson on China* Pervez Tahir, 2019-12-11 Joan Robinson was a member of the famous Keynes Circus of young economists at Cambridge in the 1930's She was a theorist par excellence making outstanding contributions to the understanding of competition aggregate demand and capital At the same time she developed an interest in underdeveloped economies and alternatives to capitalism that eventually produced a long list of writings on China between the 1950's to the 1970's These writings were neither theoretical nor empirical but a series of opinion pieces and reports Yet it is these writings that arguably cost Joan Robinson the Nobel Memorial Prize in economics This short book reviews those writings and comments on what has happened since with regard to China's development Joan Robinson's interpretation and predictions and how her 1950's lectures in China match up to China's policies since Mao This book will be of interest to students and scholars interested in how the history of economic thought can inform and progress development economics *China's Rural Financial System* Yuepeng Zhao, 2010-10-04 This book examines the credit needs and the borrowing behaviour of rural households in China in recent years It is based on in depth analysis of the status of households indebtedness and borrowing behaviour the performance of Rural Credit Cooperatives RCCs as well as resources of informal finance Before 2006 RCCs are virtually the only source of formal credit for rural households in China and were subject to a series of reforms from 1996 to 2003 The reforms aimed to transform RCCs into market oriented institutions and more importantly help them meet the increasing demands of farmers for varied financial services and thereby contribute effectively to economic transformation in rural China Based on a micro study of

three villages at different stages of development with dissimilar economic characteristics in Jiangxi province this book investigates the sources of finance formal and informal in rural areas and the different types of credit that farmers require It examines the patterns of credit required by rural households at different stages of agricultural processes and the institutions from which they obtain loans It demonstrates the importance of innovative institutional arrangements in rural China and new instruments that give farmers access to formal rural financial markets and enable them to utilize credit effectively concluding that further reforms to RCCs are necessary for RCCs to be truly effective

The Transformation of the Communist Economies Ha-Joon Chang, Peter Nolan, 2016-07-27 The mainstream view of the way in which best to transform the communist economies was that there should be a rapid transition to a free market economy and political democracy The articles in this book challenge this view They do so from the standpoint of economic and political theory and from an evaluation of the comparative experience of different reforming countries in Europe and Asia This book represents the first systematic attempt to try to explain the dramatic contrast in outcome between reforming countries that have pursued comprehensive system reform and those that have pursued cautious experimental strategies

Transforming China Peter Nolan, 2004-05-11 These essays both enhance an understanding of China's immense success in meeting these challenges in the past and provide an indication of the challenges that still lie ahead China's system reforms have been described as groping for stones to cross the river The journey across the river is far from over and the other bank is only dimly visible

Unstately Power: Local causes of China's economic reforms Lynn T. White, 1998 China's dramatic reforms are usually said to have been caused by the policies of state leaders under Deng Xiaoping This fascinating new study by one of the West's leading authorities on contemporary China shows however that reforms began and are maintained by local networks They emerged first in the economy partly as unintended results of previous policies Agricultural extension in Mao Zedong's time freed so much labor from the land in rich areas such as the Shanghai delta that peasant leaders set up rural industries to employ clients Many of these leaders were avowed state cadres but they acted for local constituencies more than for Beijing Their initiatives can be documented in the early 1970s long before the 1978 proclamation of new enterprises which the central bureaucracy could not monitor taking materials and markets away from state industries This caused socialist control of input prices and commodity flows to collapse by the mid 1980s As a result shortages and inflation bedeviled the economy the state ran deficits management decentralized local banks proliferated and immigration to cities soared

Integrating China Peter Nolan, 2008 In this highly relevant collection Peter Nolan argues that every effort of policy has to be directed towards avoiding this potentially catastrophic outcome In their search for a way forward China's leaders are looking to the lessons from the country's own past as well as to those from other countries in order to find a way to build a stable cohesive and prosperous society This effort is of vital importance not only for China but also for the whole world

China, Hong Kong and the West Peter Nolan, 2025-09-30 This book analyses Hong Kong's history from a long run perspective It

examines Britain's relationship with the city in the context of Hong Kong's location within the Pearl River Delta and its strategic position within East Asia. Britain's interaction with Hong Kong commenced in the 1830s. Britain was at the zenith of its economic, political, cultural and military power while China was approaching the lowest point in its history. The violence and humiliation of the Opium Wars propelled China into a century of economic, political and psycho-social crisis. Two centuries later, the position of China and Britain has turned upside down. Hong Kong has returned to China and is part of the hugely dynamic Greater Bay Area. Britain, the First Industrial Nation, has entered an era of deep economic, political and cultural crises. It is at the forefront of the psycho-social crisis across the West which was exposed dramatically by the landslide victory of Donald Trump in the US election. Placing the history of Hong Kong in a long-run perspective, the book will be of interest to academics and students within the fields of international relations, development studies, China and East Asian studies as well as business practitioners and policy makers.

The Political Economy Of Collective Farms Peter Nolan, 2019-06-18. This book examines the case for and against collective farms in developing countries. Basing his account on a careful analysis of China's rural economy from the 1950s to the 1980s, the author argues that collective farms have serious shortcomings and that they are not the most suitable institutional form for rural economic development in poor countries.

China and the Global Business Revolution P. Nolan, 2001-07-26. China has used industrial policies to try to build large corporations that can challenge those based in more advanced countries. By the late 1990s, the operational mechanism of China's large firms had seen large advances. Simultaneously, a revolution has taken place in global business systems and China's large firms are even further behind the global leaders than when they began their reforms. The WTO will require China to operate rapidly on the global playing field in competition with the world's leading corporations, and this increased gap presents a deep challenge for China's business and political leaders. Peter Nolan presents here the first in-depth case studies of China's large corporations under economic reform, combined with systematic benchmarking of these firms against the world's leading corporations. The book is an unrivalled resource of information on Chinese businesses and also leads the reader to consider the impact of China's response to its current challenges not only on China itself but on the wider global economy.

Mao's Crusade Alfred L. Chan, 2001-06-07. During 1957 and 1958, Mao was seized by a vision that the Chinese economy could develop rapidly in leaps and bounds by relying on intuition and mass spontaneity. As a consequence, he single-handedly launched a colossal mobilization campaign called the Great Leap Forward, which featured many radical policy innovations, including the people's communes. This book is the first in-depth and original study of policy formulation and implementation during the Leap, to link the roles of Mao, the central leaders, the ministries and the province of Guangdong. Rejecting the theory that the Leap was an outcome of bureaucratic politics and competition, the study establishes beyond doubt the supreme and dominant position of Mao in initiating and commanding the Leap. Alfred L. Chan goes further than propounding a Mao-dominant model by documenting the strategic and tactical moves made by Mao in order to neutralize all

opposition and to carry the day He also discusses in detail the policy roles and input of other top leaders on whom the improvising Mao relied to feed his imagination and to flesh out his policies In the chapters on the implementation of the Leap Dr Chan explores how the ministries of Metallurgy and Agriculture were transformed from bureaucratic agencies into agents of mobilization and how impossible targets forced them to keep up appearances by focussing on the rituals of mass mobilization Similarly other chapters on Guangdong show the simultaneously fervent ritualistic and desperate attempts to implement every hunch and intuition emanating from the centre Exhaustive research using new material made available in the post Mao era as well as archives from the 1950s and 1960s has yielded novel and original insights into the leader Mao central decision making and policy implementation in the communist hierarchy Handbook of Contemporary Behavioral Economics Morris Altman, 2006 This groundbreaking handbook of original works by leading behavioral economists is the first comprehensive articulation of behavioral economics theory At a time when conventional approaches have failed to resolve key economic concerns the book provides a provocative alternative view of how economic decisions are actually made

Policy modeling of a dual grain market Raj Krishna, Amm? Say?mw?l?, Stephen Haykin, Ajay Chhibber, 1983-01-01 The background of government policy and operations The wheat model and results The reduced form of the model Programming simulations **Unstately Power** Lynn T. White, 1998 **China and the Global Economy** P. Nolan, 2001-05-09 This book tells the story of China's emergence as a major economic power and the huge impact this will have on world business Over the last five years Peter Nolan has conducted a major investigation into Chinese industry its economic structure and the opportunities for growth in the future As one of just four world experts invited by the Chinese Government to consult on their application to join the World Trade Organisation he has worked closely with the heads of Chinese industry and with many foreign multinationals operating in China China and the Global Economy is an executive summary of the opportunities for business in one of the largest markets in the world by one passionate about its possibilities for the future
