## **Growth, Employment And Equity Comprehensive Strategy For The Sudan:**

**Growth, Employment, and Equity** ILO/UNDP Employment Mission (Sudan), ILO/UNDP Employment Mission, 1975, International Labour Office, United Nations Development Programme, 1975\* **Growth, Employment, and Equity** ILO/UNDP Employment Mission, 1975, United Nations Development Programme, 1976 **Growth, Employment and Equity: a Comprehensive Strategy for the Sudan** World Employment Programme, 1978 Growth, Employment and Equity Oficina Internacional del Trabajo (Ginebra), 1976 **Growth, Employment and Equity**, 1976 Culture And Change Along The Blue Nile Lina Fruzzetti, 2019-04-11 This book aims to bring a concern with cultural values and meanings closer to the study of the economic political and religious change and development in the Sudan. It concentrates on sections of Sudanese society caught in the rapid changes of the 1970s. *Markets and States in Tropical Africa* Robert H. Bates, 2014-04-12 Following independence most countries in Africa sought to develop but their governments pursued policies that actually undermined their rural economies. Examining the origins of Africa's growth tragedy, *Markets and States in Tropical Africa* has for decades shaped the thinking of practitioners and scholars alike. Robert H. Bates's analysis now faces a challenge: however the revival of economic growth on the continent. In this edition, Bates provides a new preface and chapter that address the seeds of Africa's recovery and discuss the significance of the continent's success for the arguments of this classic work. **Impact of Political Stability on Economic Development** Addis Ababa Othow Akongdit, 2019-10-04 The main theme of this study is chosen in response to the general consensus on the importance of conducting a comprehensive study that may shape the economic policies and promote the business sector as well as the government and other organizations. However, the key question posed by this study is whether the theory that political stability fosters economic development is simply the wishful thinking of people who value both stability and growth or whether it is a delusion of those who believe that most developing countries may enjoy rapid growth if they are stable. The importance of this study is clear. South Sudan is confronted with enormous challenges of administrative, ethnic, political and economic development. In light of this, the current study addresses the following issues: What is the impact of the political system in South Sudan on economic development? What is the impact of oil resources on sustainable development? What is the impact of the oil shutdown on political and economic stability and what is the possibility of deficit financing? Is there any possibility for cooperation between Sudan and South Sudan? In this context, the major objective of this study is to analyze the political development of the country to verify that political stability fosters the achievement of economic and social development. It also seeks to analyze the political history of Sudan in general and South Sudan in particular, emphasising the importance of political stability among other considerations as a precondition for socioeconomic development. Furthermore, other objectives of the study include suggestions on how political stability could be ensured in South Sudan and how good governance may promote political and economic stability. In light of the above, this study focuses on the issues of the political transition and policies that will

improve the economic political and social well being of the people of South Sudan It seeks ways of setting up policies that will raise the standard of living of people with sustained growth and move from a simple low income economy to a modern high income economy It also attempts to develop a framework for cooperation between Sudan and South Sudan The methodology that is adopted to address these issues is collecting sorting and analysing primary and secondary information relating to the history of political and economic development in South Sudan using empirical approaches such as SWOT analysis information sources references and books However this study is organized as follows chapter 1 discusses political stability and economic development in a theoretical framework through which we explore the empirical analysis it is divided into four sections Section 1 focuses on definition causes and measurement of political stability with an aim to assess the effect of political stability on growth related variables In section 2 we define the concept of political instability and measure it by using indicators like the number of coups d tat the number of major government crises the number of cabinet changes and the number of political revolutions as well as political assassinations Section 3 discusses the concept and definition of economic development and summarizes the major theories of economic development in five fundamental elements The last section explores the implications of financing economic development by discussing domestic resources including deficit financing and foreign financial resources and the role of each of them in achieving economic development Chapter 2 presents the political and social background of South Sudan is divided into three sections Section 1 discusses South Sudan s ability to function and successfully implement its policies and strategic vision for the year 2040 Section 2 focuses on the demographic structure of South Sudan in terms of population education languages and culture Section 3 discusses the social indicators such as infrastructure poverty and corruption which affect improving social welfare as well as the political stability and economic development of the Republic of South Sudan Chapter 3 focuses on the South Sudan economy and the challenges Here we discuss the political and development challenges facing South Sudan as well as the investment opportunities This chapter discusses the major challenges which face South Sudan especially issues such as border demarcation political reform and oil shutdown as well as investment opportunities in oil and agriculture In chapter 4 we discuss South Sudan s oil and economic development It focuses on oil resources and their impact on sustainable development the impact of oil shutdown on political and economic development and the possibility of deficit financing In chapter 5 we discuss the future of stability and prosperity in South Sudan It discusses how good governance and cooperation can be enormously beneficial to South Sudan in the process of building sustainable political and economic stability and what South Sudan can learn from other countries The major findings of this study are as follows Political stability plays an important role in determining economic growth and economic development in many economies The degree of political stability is high if there is a high degree of democracy or autocracy Strong democracies or strong autocracies are best equipped to provide political stability that may lead to economic development It is then the level of political stability within a given country regardless of regime type that results in economic

growth Long term sustainable economic growth depends on the ability to raise the rates of accumulation of physical and human capital by securing necessary sources domestic foreign or deficit finance to use efficiently for financing economic development Most economists view corruption as a major obstacle to development It is seen as one of the causes of low income and is believed to play a critical role in generating poverty traps e g Blackburn et al 2006 Thus corruption according to this view sands the wheels of development and it makes economic and political transitions difficult Not only is good governance critical to development but it is also the most important factor in determining whether a country has the capacity to use resources effectively to promote economic growth and reduce poverty

**Population and Development Projects in Africa** International Geographical Union. Commission on Population Geography,1985-10-10 Articles comparison of the impact of development projects on population dynamics and rural development trends in Sudan and other African countries discusses rural urban disparity social implications of internal migration and deliberate rural population geographic distribution land settlement schemes to increase self reliance among refugees and nomads forced population removals under Apartheid etc examines changing agrarian structures and labour demand in response to drought vs Increased water supply Bibliography graphs *Primitive Capital Accumulation in the Sudan* Abbas Abdelkarim,2005-08-16 This title available in eBook format Click here for more information Visit our eBookstore at [www.ebookstore.tandf.co.uk](http://www.ebookstore.tandf.co.uk) *The Political Economy of African Famine* R. E. Downs,Donna O. Kerner,Stephen P. Reyna,2019-07-19 Originally published in 1991 This volume explores the combination of political and economic forces that influence different levels of food supply The book begins with a discussion of famine theories ranging from cultural ecology to neo Marxism Following this survey is a series of essays by anthropologists geographers economists and development practitioners that explores the role of Western institutions in African famine analyzes famine in particular countries and documents the relationship between famine and gender This book takes an unusually broad look at famine by including analyses of countries where hunger has rarely been studied and by examining African famine from both African and Western perspectives Its concluding proposals for eradicating famine make innovative and provocative contributions to current global debates on food and nutrition *Agriculture, Women, And Land* Jean Davison,2019-04-11 This book examines gender relations to land relations that are crucial to formulating policies through which African women s food producing capabilities can be advanced It addresses the need to document historical changes in land tenure practices that have influenced women s household production *The Economies of the Middle East* Rodney Wilson,1979-05-10 *Urban Health in the Third World* Rais Akhtar,2002 [Institutions and Macroeconomic Policies in Resource-rich Arab Economies](#) Kamiar Mohaddes,Jeffrey B. Nugent,Hoda Selim,2019 For over eighty years the Arab region has been deriving massive wealth from its natural resources Nevertheless its economic performance has been at the mercy of ebbs and flows of oil prices and its resources have been slowly depleting The two critical questions are why and how Arab countries might escape the oil curse *Institutions and Macroeconomic Policies in Resource Rich Arab Economies*

focuses on the unique features of the Arab world to explain the disappointing outcomes of macroeconomic policy. It explores the interaction between oil and institutions to draw policy recommendations on how Arab countries can best exploit their oil revenues to avoid the resource curse. Case studies and contributions from experts provide an understanding of macroeconomic institutions including their underlying rules, procedures and institutional arrangements in oil-rich Arab economies and of their political economy environment which has largely been overlooked in previous research. *Institutions and Macroeconomic Policies in Resource Rich Arab Economies* offers novel macroeconomic policy propositions for exchange rate regimes, fiscal policy and oil wealth distribution that is more consistent with macroeconomic stability and fiscal sustainability. These policy reforms, if implemented successfully, could go a long way in helping the resource-rich countries of the Arab region and elsewhere to avoid the oil curse.

*Development and Underdevelopment in Historical Perspective* Gavin Kitching, 2012-07-26 How do the intellectual origins and historical background of western and other theories of development affect their relevance to contemporary Third World conditions? This is the central question behind Gavin Kitching's examination of development studies first published in 1982, from its origins in the late 1940s through to the contemporary era. While presenting the contemporary radical orthodoxy of development studies, Kitching argues that these theories are continuations of much older traditions of populist and neo-populist thought.

**Making a Living in Rural Sudan** Elke Grawert, 2016-07-27 This study aims to sensitize those concerned with Africa's development to the scope and limits of peasant livelihood securing activities. It combines results of research in the fields of peasant actions, food security, gender relations and labour migration to a livelihood approach. Analyzing peasant life in western Sudan leads to the demand to keep options open. A review of the development programmes which affected the Sudanese rural population between independence and 1994 discloses that peasants' efforts have largely been obstructed.

**The Dynamics of Productive Relationships** A. F. Robertson, 1987

Vertisols and Technologies for their Management N. Ahmad, A. Mermut, 1996-12-11 Vertisols, one of the eleven established soil orders, are clay soils with unusual and interesting properties. They cover more than 350 million hectares of land in the world and in tropical Africa alone there are over 100 million hectares. Because of their very small particle size and high surface area, these soils have higher physical and chemical reactivity than other soils. Their interaction with agrochemicals and industrial wastes has been increasingly the subject of research, especially in the last two decades. Vertisols create special problems when used for engineering purposes. This book is intended to provide comprehensive and state-of-the-art information about Vertisols worldwide. Special attention is given to the use and management of soils such as fertilizer use, crop selection, soil tillage, water restriction on land including irrigation and soil erosion. A special chapter has been added to deal with geotechnical engineering of Vertisols. Vertisols have great potential for agricultural production but many, especially in the developing world, are underutilized due to a lack of understanding regarding their behaviour and management. This book is written by leading scientists worldwide. It is expected that this monograph will be of great use to

soil scientists and agronomists graduate and senior graduate students Improvement of their management may solve the current food deficiency in the world      **The Ecology Of Survival** Douglas H Johnson, David M Anderson, 2019-06-26 This book is concerned with evaluating the antiquity of the domestication changes in northern Africa considering the nature of the environments in which they arose their social implications and the influence of climatic change on their later progress
