Grt Intl Disaster:

The Management of Mass Burn Casualties and Fire Disasters M. Masellis, S. William A. Gunn, 2007-07-23 Thermal harm is one of the most traumatizing assaults on man and his environment Whether suffered by living beings as burn injury or sustained by societal structures as fire damage the resulting physical pain and material loss can be extremely distressing both to the person and to society The health professions and in particular burn specialists have been continually developing effective means of combating burn disease and promoting rehabilitation of the victims especially in mass casualty situations In parallel various levels of the community have been mobilizing fire prevention and fire fighting mechanisms that protect society and the environment from the ever increasing hazards of fire disasters It is therefore surprising that while aiming at the same objective the two sectors have rarely come together doctor has rarely worked with fire chief Yet both disciplines have so much to learn from and contribute to each other's efforts The Mediterranean Burns Club is a professional organization that brings together persons concerned with burn therapy and fire safety in all forms especially in the countries of the Mediterranean basin It is honoured to have been identified by the United Nations as a premier scientific body in its field within the programme of the International Decade for Natural Disaster Reduction It is therefore natural that it should have initiated an international gathering of specialists engaged in burns as a surgical clinical problem and of counterparts dealing with fires as a societal disaster management problem Oversight of the U.S. Role in the International Maritime Organization United States. Congress. House. Committee on Transportation and Infrastructure. Subcommittee on Coast Guard and Maritime Transportation, 1998 **International Shipping Law** G.P. Pamborides, 2024-01-22 The combination of the Port State Control system that is currently in operation and the tactics employed by the International Maritime Organization IMO for the introduction of rules and regulations for safety and pollution prevention at sea led to the establishment of a system which has the potential to bring about significant changes These changes extend beyond the area of safety and pollution prevention reaching areas lying entirely beyond the scope of IMO and actually affecting directly private maritime law The relevant provisions of the law of the sea are outlined in order to define the legal framework within which the regulation process for matters of safety and pollution prevention may operate Special reference is made to the development of the concept of Port State Control and its emergence as a new alternative method of enforcement under the guidance of IMO The study focuses on the modus operandi of IMO and critically evaluates the tactics employed by the organization in pursuing its ends The book also examines the practices employed by influential port states in enforcing international regulations and it assesses the reactions of smaller states with large registries as well as the different sectors of the industry to these developments These developments will lead to new legislation in the contracting states with the potential of changing the principles of private maritime law The author also draws attention to the impact that the ISM Code and the STCW 95 may have on issues of private maritime law through an analysis of the use of English maritime case law The
