Carriers Norman Polmar,2008-01-01 In the post 1945 era the aircraft carrier has remained a valued weapon despite the development of nuclear weapons cruise and ballistic missiles and highly capable submarines At times as in the early days of the Korean and Vietnam Wars and in the Falklands conflict carriers alone could deploy high performance aircraft to the battlefield In other operations such as enforcing the no fly zones and the U S invasions of Afghanistan and Iraq only carriers could provide the bases needed for sustained combat and support operations This second volume of Norman Polmar s landmark study details the role of carriers in the unification of the U S armed forces and strategic deterrence fiscally constrained Great Britain the development of British Commonwealth and ex colonial navies and the efforts of France and the Netherlands to rebuild their fleets The role of the modern carrier nine nations currently possess them is discussed as are the issues confronting nations that might acquire them Chapters on the Soviet Union s effort to produce carriers are included for

the first time The development of both carrier planes and the many oddball aircraft that have flown from carriers such as the U 2 spy plane are also examined Appendixes include comprehensive data on all carriers built and converted through 2006 This volume is a valuable companion to the critically acclaimed Volume I which covers aircraft carrier development and operations from 1909 to 1945 Washington Warbird Survivors 2002 Harold A. Skaarup, 2002-02 During the twentieth century civil and military aviation has played a prominent role in the history and development of Washington Commercial operators have exploited the advantages offered by aircraft to overcome the unique challenges of geography and climate By virtue of Washington s strategic location on the continent s northwest flank looking out over the Pacific and facing Russia a wide variety of military aircraft have been based there through the years The list of military aircraft types that made up the tapestry of Washington aviation is as extensive as the list of legendary figures who have contributed to its amazing history While most of the military aircraft types no longer grace the airspace over Washington many can be viewed in their former splendor as they stand as gate guards or museum exhibits This booklet provides a comprehensive guide to where these restored aircraft can be found Complementing the details concerning aircraft specifications and roles the author has included many facts Finally the descriptions of the recovery restoration and preservation efforts stand as a tribute to the many volunteers who have devoted time energy and financial support to ensure this rich heritage is preserved Naval Aviation News , 1997-09 The Cutting Edge Mark A. Lorell, Hugh P. Levaux, Elizabeth Giddens, Jennifer Gross, Erik Moller, 1998-10-20 The proposition that innovation is critical in the cost effective design and development of successful military aircraft is still subject to some debate RAND research indicates that innovation is promoted by intense competition among three or more industry competitors Given the critical policy importance of this issue in the current environment of drastic consolidation of the aerospace defense industry the authors here examine the history of the major prime contractors in developing jet fighters since World War II They make use of an extensive RAND database that includes nearly all jet fighters fighter attack aircraft and bombers developed and flown by U S industry since 1945 as well as all related prototypes modifications upgrades etc The report concludes that 1 experience matters because of the tendency to specialize and thus to develop system specific expertise 2 yet the most dramatic innovations and breakthroughs came from secondary or marginal players trying to compete with the industry leaders and 3 dedicated military R D conducted or directly funded by the U S government has been critical in the development of new higher performance fighters and bombers Partners in Freedom Joseph R. Chambers, 2000 Established in 1917 as the nation s first civil aeronautics research laboratory under the National Advisory Committee for Aeronautics NACA Langley was a small laboratory that solved the problems of flight for military and civil aviation Throughout history Langley has maintained a working partnership with the Department of Defense U S industry universities and other government agencies to support the defense of the nation with research During World War II Langley directed virtually all of its workforce and facilities to research for military aircraft Following the war a balanced program of

military and civil projects was undertaken In some instances Langley research from one aircraft program helped solve a problem in another At the conclusion of some programs Langley obtained the research models for additional tests to learn more about previously unknown phenomena The data also proved useful in later developmental programs Many of the military aircraft in the U S inventory as of late 1999 were over 20 years old Langley activities that contributed to the development of some of these aircraft began over 50 years prior This publication documents the role from early concept stages to problem solving for fleet aircraft that Langley played in the military aircraft fleet of the United States for the 1990 s

United States Naval Aviation, 1911-2014 Michael Green, 2015-07-31 From humble beginnings in 1911 with floatplanes by the 1930s the US Navy possessed dirigibles and were introducing fighter planes By the start of WW2 monoplane fighters were replacing bi planes and a major aircraft carrier build was underway Fighters such as the Grumman F4F Hellcat and Vought F4U Corsair were joined by carrier attack aircraft such as the Dauntless Devastator and Helldiver As well as carrier borne aircraft others operated from shorebases using both wheels and floats Post WW2 jet aircraft took over from prop driven and famous early examples were the Shooting Star and McDonnell Phantom which saw action in Korea By Vietnam the F4 Phantom II Skyhawk and Intruder were in service As well as these fighter attack aircraft were the Lockheed Viking anti sub and nuclear capable Douglas Skywarrior Post Vietnam the F14 Tomcat and Hornet came into service along with the Prowler Electronic warfare and Hawkeye early warning These aircraft were complemented by a range of helicopters from the massive Super Stallion through Sea Kings Seasprites and Seahawks Today the Super Hornets predominates along with an impressive multi capable range of aircraft and helicopters All these and more are described in expert detail and illustrated in this fine book Future projects are also covered
