a Changing World recommends the creation of an informed teacher education curriculum with the common elements that represent state of the art standards for the profession. Written for teacher educators in both traditional and alternative programs, university and school system leaders, teachers, staff development professionals, researchers, and educational policymakers, the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom. Preparing Teachers for a Changing World recommends that in addition to strong subject matter knowledge, all new teachers have a basic understanding of how people learn and develop, as well as how children acquire and use language, which is the currency of education. In addition, the book suggests that teaching professionals must be able to apply that knowledge in developing curriculum that attends to students' needs, the demands of the content, and the social purposes of education in teaching specific subject matter to diverse students in managing the classroom, assessing student performance, and using technology in the classroom.

Paradigm Shift in Education Yin Cheong Cheng, 2019-02-18

As social contexts and demands change in the 21st century, pedagogies and policies must adapt to keep up. Increasing emphasis on global preparedness, competitiveness, and holistic education alongside a fast-paced ever-changing environment may make policy implementation difficult. However, Cheng asserts that it is only by understanding the current trends, visions, and issues in education policy implementation and research that we can reflect, adapt, and improve future initiatives. To that end, Cheng elucidates the different paradigm shifts in classrooms and pedagogy all over the world. In his exploration of third-wave paradigm shifts in education, he charts the rationales, concerns, and effects in topics such as contextualized multiple intelligences, integrated learning, national education in globalization, teacher effectiveness, and development school-based management and systemic education reform. This book is a promising referential resource for any policy maker, academic, and educator who knows that the only way to progress is to look at and learn from the current issues and future trends globally.
