Educating the Worker-citizen Joel H. Spring, 1980 **Handbook of the Sociology of Education** Maureen T. Hallinan, 2006-11-24 The aim of the Handbook of Sociology of Education is to present the most theoretically grounded and empirically rigorous sociological analyses of schools to date The authors are distinguished researchers in the field Their contributions to the Handbook offer major theoretical perspectives on the schooling process and describe significant empirical studies of schools and their effects on individuals and society The research presented in the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system The Social Construction of Educational Leadership Anna Hicks McFadden, Penny Smith, 2004 Most historical and theoretical work on school administration choice has focused on the importance of race and class with increased attention to gender during the past two decades Rarely has geography been a consideration and when it appears at all it is used only to distinguish the unique conditions of urban school settings The Social Construction of Educational Leadership Southern Appalachian Ceilings addresses decisions about who is chosen to lead public schools and how they do it Using their research on senior level public school leaders in the southern mountains of North Carolina as a representative case study the authors construct an argument for a reconsideration of the role of place both in decisions about who becomes a school leader and in how those leaders behave professionally The authors describe the changes in a leadership system grounded in race class geographic and gender preferences that dating back to colonial systems of deference describing the pattern of those changes and exploring their implications for school leadership and the preparation of prospective leaders in the region and elsewhere *Black Protest Thought and Education* William Henry Watkins, 2005 The modern American corporate industrial state requires a massive ideological machine to establish social order create political consensus train obedient citizen workers and dispatch marginalized groups to their place Mass public education has helped to forge the modern political state that enforces social and racial inequality Disenchanted African Americans representing dissenting viewpoints have vigorously protested this educational system which is rooted in segregation differentiated funding falsehoods alienation and exclusion This important book belongs in classrooms

Dependent on D.C. Charlotte A. Twight,2015-11-03 Dependent on D C raises serious concerns about the future of liberty in America and proves beyond a doubt that the growth of dependence on government in the past seventy years has not been accidental that its creation has been bipartisan and that it is accelerating Twight shows how growing federal power driven by legislation validated by Supreme Court decisions and accelerated by presidential ambition has eroded the rule of law in our nation leaving almost no activity that the central government cannot at its discretion regulate manipulate or prohibit Dependent on D C shows why Americans have not resisted this expansion of federal power In these uncertain times Dependent on D C is the book Americans need to read when thinking about the future of their individual liberty [Inside Stories](#) Kathleen B. deMarrais,2012-12-06 Although articles reporting research studies are helpful in acquainting students with methodological approaches they often make the process look so straightforward clean and effortless It is rare to find an article that tells the real story behind the finished product By having real researchers tell their own stories of mucking around with methodological and ethical issues in qualitative research we get a more realistic human story of the process This is a collection of such stories Authors were asked to describe their own experiences with methodological and ethical

struggles as they engaged in their work Each of the essays offers insight into the research approach used as well as particular issues which became apparent during the research process Key issues raised by the authors include early learnings gaining entry overlapping conflicting roles and the boundaries of these roles differential power relationships who tells the story and whose story is told ethical concerns related to confidentiality and the influence of a researcher s particular philosophy or theoretical framework on his or her research Throughout the book we see scholars whose personal stories or autobiographies intersect closely with their research projects deMarrais introduces a unique framework to help students gain an overview of qualitative research methods and the underpinnings and processes in these approaches This framework is centered on the ways we understand phenomena using qualitative research approaches that engage archival knowledge narrative knowledge or observational knowledge
