Education and Responsibility Tunis Romein, 2021-03-17 This book reveals the sources of the disquiet prevailing among educators over the apparent failure of the public school system to develop moral responsibility in America's youth The doctrine of separation of church and state has made sectarian religious training illegal in public schools and Tunis Romein shows that the task of providing moral guidance suddenly thrust upon educators has disclosed their deep schisms in educational philosophy basic contradictions which have split American education from top to bottom Romein explains the basic conflicts in education by examining three educational philosophies progressivism educational reconstructionism and classical humanism and comparing all of them with the traditional Christian view He holds that all educational philosophies

whether secular or not are based on faith and that all can be tested with regard to their beliefs about the nature of man and about the kind of moral responsibility education should develop in man With sincerity and frankness Romein analyzes the moral and intellectual poverty of much of the thinking dominant in education today and he shows the necessity as well as the difficulty of making faith in God once more the underlying influence in American education **Educating for Peace**

culture can be understood as material and social practice This definition is useful for informing researchers nuanced explorations of the nature of science and inclusive decisions about the practice of science education Sewell 1999 As fields of material social practice and worlds of meaning cultures are contradictory contested and weakly bounded The notion of culture as material social practices leads researchers to accept that material practice is as important as conceptual development social practice However in education and science education there is a tendency to ignore material practice and to focus on social practice with language as the arbiter of such social practice Often material practice such as those associated with scientific instruments and other apparatus is ignored with instruments understood as inscription devices conduits for language rather than sources of material culture in which scientists share material other than words Baird 2004 p 7 when they communicate new knowledge and realities While we do not ignore the role of language in science we agree with Barad 2003 that perhaps language has too much power and with that power there seems a concomitant loss of interest in exploring how matter and machines instruments contribute to both ontology and epistemology in science and science education
