Educating the Majority Carol Pearson, Donna L. Shavlik, Judith G. Touchton, 1989      The Rise of Women in Higher Education Gary A. Berg, 2019-11-28 The story of the American university in the past half century is about the rise of women in participation as students faculty members college athletes and in subsequently changing the overall university culture for the better Now almost sixty percent of the overall college student population in America is female and still growing By the year 2000 women surpassed men worldwide in attendance at higher education institutions At the same time after years of a disproportionate dominant male professoriate female faculty members are now becoming the majority of university professors While top university presidents are still largely male women have achieved real gains in the overall administrative ranks and trustee positions In all areas of the university disparities still exist in terms of compensation and balance in key areas of the academy but the overall positive trend is clear Few to this date have recognized and chronicled this extraordinary change in college education one of society's fundamental and influential institutions For universities the test for the future is to make the changes needed in broad areas within higher education from financial aid to curriculum student activities and overall campus culture in order to better foster a newly empowered majority of women students

**Challenged by Coeducation** Leslie Miller-Bernal, Susan L. Poulson, 2007-01-22 Challenged by Coeducation details the responses of women's colleges to the most recent wave of Women's colleges originated in the mid nineteenth century as a response to women's exclusion from higher education Women's academic successes and their persistent struggles to enter men's colleges resulted in coeducation rapidly becoming the norm however Still many prestigious institutions remained single sex notably most of the Ivy League and all of the Seven Sisters colleges In the mid twentieth century colleges concerns about finances and enrollments as well as ideological pressures to integrate formerly separate social groups led men's colleges and some women's colleges to become coeducational The admission of women to practically all men's colleges created a serious challenge for women's colleges Most people no longer believed women's colleges were necessary since women had virtually unlimited access to higher education Even though research spawned by the women's movement indicated the benefits to women of a room of their own few young women remained interested in applying to women's colleges Challenged by Coeducation details the responses of women's colleges to this latest wave of coeducation Case studies written expressly for this volume include many types of women's colleges Catholic and secular Seven Sisters and less prestigious private and state liberal arts and more applied northern southern and western urban and rural independent and coordinated with a coeducational institution They demonstrate the principal ways women's colleges have adapted to the new coeducational era some have been taken over or closed but most have changed by admitting men and thereby becoming coeducational or by offering new programs to different populations Some women's colleges mostly those that are in cities connected to other colleges and prestigious with a high endowment still enjoy success Despite their dramatic drop in

numbers from 250 to fewer than 60 today women's colleges are still important editors Miller Bernal and Poulson argue With their commitment to enhancing women's lives women's colleges and formerly women's colleges can serve as models of egalitarian coeducation

**Higher Education for Women in Postwar America, 1945-1965** Linda Eisenmann, 2006-01-19 Outstanding Academic Title for 2007 Choice Magazine This history explores the nature of postwar advocacy for women's higher education acknowledging its unique relationship to the expectations of the era and recognizing its particular type of adaptive activism Linda Eisenmann illuminates the impact of this advocacy in the postwar era identifying a link between women's activism during World War II and the women's movement of the late 1960s Though the postwar period has been portrayed as an era of domestic retreat for women Eisenmann finds otherwise as she explores areas of institution building and gender awareness In an era uncomfortable with feminism this generation advocated individual decision making rather than collective action by professional women generally conceding their complicated responsibilities as wives and mothers By redefining our understanding of activism and assessing women's efforts within the context of their milieu this innovative work reclaims an era often denigrated for its lack of attention to women
