Traditions in German-Speaking Mathematics Education Research Hans Niels Jahnke, Lisa Hefendehl-Hebeker, 2019-02-13 This open access book shares revealing insights into the development of mathematics education research in Germany from 1976 ICME 3 in Karlsruhe to 2016 ICME 13 in Hamburg. How did mathematics education research evolve in the course of these four decades? Which ideas and people were most influential and how did German research interact with the international community? These questions are answered by scholars from a range of fields and in ten thematic sections: 1 a short survey of the development of educational research on mathematics in German speaking countries, 2 subject matter didactics, 3 design science and design research, 4 modelling, 5 mathematics and Bildung, 1810 to 1850, 6 Allgemeinbildung, Mathematical Literacy and Competence Orientation, 7 theory traditions, 8 classroom studies, 9 educational research and 10 large scale studies. During the time span presented here profound changes took place in German speaking mathematics education research. Besides the traditional fields of activity like subject matter didactics or design science, completely new areas also emerged which are characterized by various empirical approaches and a closer connection to psychology, sociology, epistemology and general education research. Each chapter presents a respective area of mathematics education in Germany and analyzes its relevance for the development of the research community not only with regard to research findings and methods but also in terms of interaction with the educational system. One of the central aspects in all chapters concerns the constant efforts to find common ground between mathematics and education. In addition, readers can benefit from this analysis by comparing the development shown here with the mathematical education research situation in their own country.

single country arguing for the two German states and the three political systems Prof Dr L szl K rti Institute of Applied Social Sciences University of Miskolc Hungary This book contrasts three very different incarnations of Germany the totalitarian Third Reich the communist German Democratic Republic and the democratic Federal Republic of Germany up to 1990 in terms of their experiences with and responses to nonconformity dissent opposition and resistance and the role played by those factors in each case Although even innocent nonconformity came with a price in all three systems and in the post war occupation zones the price was the highest in Nazi Germany It is worth stressing that what qualifies as nonconformity and dissent depends on the social and political context and thus changes over time Like those in active dissent opposition or resistance nonconformists are rebels whether they are conscious of it or not and have repeatedly played a role in pushing for change whether through reform of legislation transformation of the public s attitudes or even regime change

Rust, Diane Rust, 2018-05-03 Originally published in 1995 This study of the integration of East and West German education following the collapse of the German Democratic Republic in 1989 focuses on policy formation and implementation during this period of great social and political turbulence It is the result of a research project undertaken shortly after the unification The authors lived in East Germany for a full year looking carefully at individual schools vocational training centers teacher colleges and universities The book considers questions of how education policy is successfully formulated conditions in which that policy is implemented and the consequences of the implemented educational reform The first chapters present the context and history of German education and the later chapters discuss the unification and the formation of the new school laws and the successes and failures The authors research shows that even before the unification East Germans had already opted for a system consistent with West German
