R.c.mishra,2009 Researching Global Education Policy D. Brent Edwards Jr.,Antoni Verger,Marcia McKenzie,Keita Takayama,2024-07-30 The movement of policy is a core feature of contemporary education reform Many different concepts including policy transfer borrowing and lending travelling diffusion and mobility have been deployed to study how and why policy moves across jurisdictions scales of governance policy sectors or organisations However the underlying theoretical perspectives and the foundational assumptions of different approaches to policy movement remain insufficiently discussed To address this gap this book places front and center questions of theory ontology epistemology and method related to policy movement It explores a wide diversity of approaches to help understand the policy movement phenomena providing a useful guide on global studies in education as well as insights into the future of this dynamic area of work Globalization and Education

Nelly P. Stromquist,Karen Monkman,2014-03-04 We offer in this book a collection of chapters that reflect a broad range of issues linking globalization to education in an accessible yet theoretically grounded and detailed form The authors analyze phenomena on the global plane in local spaces and in the connections between the global and the local New developments such as the growing impact of technology on education the emergence of new policy actors the growing expansion and segmentation of higher education the salience of human rights among others are emerging as powerful agendas shaping all levels of education In fundamental ways the forces of globalization challenge the previous approaches and theories of national development Recognizing the areas of convergence dissonance and conflict should help us grasp with greater clarity the implications of globalization for education and knowledge in the XXI century The contributors to this book include both well known scholars in the field of comparative education as well as young scholars The chapters present a balanced geographical coverage in terms of authors and the countries regions examined The second edition has been

thoroughly updated throughout and contains seven new chapters The expanding interest in the intersection of education and globalization has brought up several new topics including the salience of global education policies notably EFA the expansion and differentiation of higher education the emphasis on work related training the increasing role of non state actors such as the transnational corporations and greater attention to human rights Also in this new edition is a chapter on qualitative methodologies especially suitable to the understanding of the intersection of globalization and education Education

James Walker Ben-El-Mechaieq, Arlene Kaplan Daniels, Current discussions of education from Jencks's Inequality to Coleman's recent controversial pronouncements on desegregation orders and white flight concentrate on the efficacy of educational reform The articles in this anthology collected from two issues of the journal Social Problems all consider this topic The volume is divided into six sections each exploring different aspects of education In an introductory essay the editors state the theme of the work and outline the approaches and focuses of the individual essays Daniels and Benet provide a framework within which the reader can digest and interpret the various contributions and raise a series of questions intended to guide future educational research They maintain that only interdisciplinary study can enable researchers to understand the play between individual aspirations and interconnecting social systems and institutions in the development of the growing exasperation with or indifference to the schooling question Originally sponsored by the Society for the Study of Social Problems this work provides refreshing insights into the nature of contemporary education and explores new areas of research not previously discussed It follows a social system approach to education and advocates it as a model for future researchers Serves an important role in the current assessment of American education Ray C Rist Cornell University **International Assistance and State-University Relations , Higher Education: Handbook of Theory and Research** J.C. Smart, 2012-12-06 To recapitulate Greeks differ from Independents and from the academy's value priorities but for the most part these differences derive from antecedent characteristics Moreover there are some grounds for speculating that these antecedent differences reflect fundamental temperamental differences extraversion and gregariousness mediated by social interaction as opposed to interaction through ideas Only to a limited degree does the Greek system appear to adversely affect the acquisition and assimilation of the academy's value priorities i.e. students as a whole Greek and Independent alike appear to become more independent liberal socially concerned and culturally sophisticated by graduation However the Greek system's effect on the behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy's agenda appears dependent on an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy's educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy's agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized

**Public Policy to Reduce Inequalities across Europe** Paul Cairney,Michael Keating,Sean Kippin,Emily St Denny,2022-07-28 This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed Yet inequality policy is notoriously complex and contested This book approaches the issue from two linked perspectives First a focus on functional requirements highlights what policymakers think they need to deliver policy successfully and the gap between their requirements and reality We identify this gap in relation to the theory and practice of policy learning and to multiple sectors to show how it manifests in health education and gender equity policies Second a focus on territorial politics highlights how the problem is interpreted at different scales subject to competing demands to take responsibility This contestation and spread of responsibilities contributes to different policy approaches across spatial scales We conclude that governments promote many separate equity initiatives across territories and sectors without knowing if they are complementary or contradictory This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments It could also be part of a strategy to make a rhetorically radical case while knowing that they will translate into safer policies It allows them to replace debates on values regarding whose definition of equity matters and which inequalities to tolerate with more technical discussions of policy processes Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities
