Special Issue: Violent Youth Radicalisation: Perspectives and Solutions ,2020-12-21 This timely special issue looks at a current pressing societal challenge that is truly global in its existence but very local in the way it plays out in various geographical social and political contexts Terrorism and extremism are undoubtedly among the biggest problems the world is facing today and is leaving in its wake a trail of death and destruction where the human and social costs are perhaps more significant than wars fought between countries on the world stage These realities breed suspicion hatred and feelings of revenge and invariably result in a spiral of violence that seemingly has no end Not only is there a need to explore the various factors leading to violent youth radicalisation it is clear that young people need to be considered not as victims at risk but rather as responsible agents of positive change This issue focuses on violent youth radicalisation in the

context of Professor Gavrielides The Youth Empowerment and Innovation Project YEIP which looked at the problem of violent youth radicalisation across seven European Countries The project sought to propose a uniquely different way of combatting violent youth radicalisation by proposing an alternative to punitive means so often favoured by governments That alternative proposed was to use Positive psychology and the Good Lives model to intervene with young people at risk of violent radicalisation focusing on positive identity and well being on the premise that young people who had a positive view of themselves would be less likely to be drawn into violent radicalisation DOI 10 13140 RG 2 2 22734 33606 ISBN 978 1 911634 22 5 Journal ISSN online 2056 2985

Sneider,2014-11-25 How to engineer change in your middle school science classroom With the Next Generation Science Standards your students won t just be scientists they ll be engineers But you don t need to reinvent the wheel Seamlessly weave engineering and technology concepts into your middle school math and science lessons with this collection of time tested engineering curricula for science classroom materials Features include A handy table that leads you to the chapters you need In depth commentaries and illustrative examples A vivid picture of each curriculum its learning goals and how it addresses the NGSS More information on the integration of engineering and technology into middle school science education Resources for Teaching Middle School Science Smithsonian Institution,National Academy of Engineering,National Science Resources Center of the National Academy of Sciences,Institute of Medicine,1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were

selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

Teachers Engaged in Research Stephanie Z. Smith, Marvin E. Smith, 2006-03-01. This volume was written primarily for teachers who have developed or who are being encouraged to develop an awareness of and commitment to teaching mathematics for understanding. The research findings presented in these chapters suggest instructional implications worthy of these teachers' consideration. Often the authors in this volume describe instructional practices or raise issues that have the potential to broaden views of teaching and learning mathematics. These chapters provide interesting problems and tasks used in the authors' work that readers can use in their own classrooms.
