Read, Natalya Voskresenskaya, 1995 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company     Understanding Educational Reform in Global Context Mark Ginsburg, 2012-10-12 This book focuses on important theoretical and policy debates on educational reform with detailed analyses of reforms in 11 countries It also explores the effects of geographical location political ideology and economic structure on shaping educational reform Individual case studies are included on Australia Cote d Ivoire England Hungary Israel Mexico New Zealand Nicaragua Spain Tanzania and the United States The book covers the role of reform in changing education and addressing problems in the educational system as well as its wider role in deflecting crises in the political and economic system plus the effect of reform on educators and educators upon reform Extensive bibliography and reference lists accompany each chapter including the introduction and conclusion Contributors include N Dri Th rese Assi Lumumba John M Barrington Susan F Cooper Peter Darvas Sara Morgenstern de Finkel Esther E Gottlieb Tukumbi Lumumba Kasongo Don Martin Henry D R Miller Rolland Paulston Rajeshwari Raghu Susan Rippberger Susan L Robertson Carlos Alberto Torres George E Urch Roger R Woock and Hugo Zegarra     **The Unification of German Education** Val Dean Rust, Diane Rust, 1995 This study of the integration of East and West German education following the collapse of the German Democratic Republic in 1989 focuses on policy formation and implementation during this period of great social and political turbulence It is the result of a research project undertaken shortly after the unification The authors lived in East Germany for a full year looking carefully at individual schools vocational training centers teacher colleges and universities

They asked macro analytic questions What are the conditions in which educational policy is successfully formulated How is this educational policy implemented What are the consequences of this policy From the start West Germany demanded a complete dismantling of the educational system in the former German Democratic Republic West German political leaders insisted as a condition of unification that all important agreements concerning education made by the GDR states be accepted by the new states The authors research shows that even before the unification East Germans had already opted for a system consistent with West German education law However the West Germans disregarded these changes and imposed their own version of reform on East Germany The study reveals that in this period of confusion the East Germans did not fully analyze the implications of the imposed conditions which now have unforeseen negative consequences The German situation is of great interest to all educators particularly students of educational policy making as well as researchers in political science economics and sociology *Teacher Education in Industrialized Nations* Ivan Z. Holowinsky, Nobuo K.

Shimahara, 2014-04-08 The original essays in this volume examine reform related issues in teacher education in Great Britain Canada Japan Ukraine United States and Western Europe A distinguished group of educators reviews the social context of the teacher the economics and value of teaching the pace of change government policy and teacher control of the profession and the evolving role of the teacher and education system in the face of political and social upheaval **Women,**

**Education, and Development in Asia** Grace C.L. Mak, 2013-11-26 This volume of twelve original essays examines the interplay between women's education and development and if and how it has changed women's status in selected nations in Asia Educational expansion in recent decades have benefitted women in Asia at least in quantitative terms Industrialization has also created room for increased waged employment for them However the relative openness of these systems has not been paralleled at the cultural level Women in Asia which remains largely patriarchal are thus caught in contradictions This volume examines how women use and compromise with opportunities and limits in education the role of education in their economic participation and the enhancement and tension brought to their family roles The volume is edited from a cross national perspective The chapters each covering a nation rest on a common framework Each begins with a brief historical account of education for women It then investigates the extent women have been able to take advantage of them What follows is an analysis of how women use their education in the labor market and in the family Society's definition of women's roles in the family often acts to reduce the effect of schooling on women's economic participation This interplay is further complicated by such factors as social class and or caste religion and ethnicity **Education and Disability in**

**Cross-Cultural Perspective** Susan Jeanne Peters, 2013-11-26 A radical departure from previous chronicles of education for people with disabilities this book views special education from a broader perspective Its central thesis is that cultural values and expectations play a dominant role in understanding the structure and function of special education While theories of the social construction of disability have been written about in a growing body of research since the 1960s no attempt has been

made to create a cross cultural framework This work offers such a framework Eight chapters written by educators in each country s educational system cover the following nations China Great Britain Hungary Japan Iran Pakistan United States and Zimbabwe Historical discussions in each chapter provide a context for current practice An index and illustrations are also included

**Education for All** Dean H. Nielson, William K. Cummings, 2014-04-08 Modern education conceived in the late 18th century and expanded in the early 19th century to promote enlightenment and social equality may finally be nearing its institutional limit Over the past decade following nearly a century of steady gains there has been little further advancement in modern education The modern system has proved effective in serving the interests of the established core of contemporary society but ineffective in reaching for the periphery The contributors to this volume offer various corrective approaches to correct this state of affairs

**Third World Education** Anthony R. Welch, 2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged
