Balsley,2016-01-25 Why did the Lord see fit to include the book of Ecclesiastes in His inspired Word Down through the centuries many people have wondered how Solomon could have moved so far from his walk with the Lord and the wisdom of the Proverbs to the pessimism of Ecclesiastes in one lifetime For this reason some have questioned Solomons authorship of the book But Solomon is only one of many who have taken a spiritual detour in life As a result there are many people in our nation and our world who can readily identify with the outlook of Ecclesiastes because they too are living their lives as Solomon did for a time under the sun This verse by verse tour of Solomons experience will help you understand where Solomons spiritual detour took him and where he finally came to realize he should have been going instead You will be encouraged to move out from under the sun to the abundance of life in the light of the Son *Death Ground* Daniel P. The Morenci Marines Kyle Longley,2015-06-15 In 1966 nine young men left the Arizona desert mining camp of Morenci to serve their country in the far flung jungles of Vietnam in danger zones from Hue to Khe Sanh Ultimately only three survived Each battled survivor s guilt difficult re entries into civilian life and traumas from personally experiencing war and losing close friends along the way Such stories recurred throughout America but the Morenci Marines stood out ABC News and Time magazine recounted their moving tale during the war and in 2007 the Arizona Republic selected the Morenci Nine as the most important veterans story in state history Returning to the soldiers Morenci roots Kyle Longley s account presents their story as unique by setting and circumstance yet typical of the sacrifices borne by small towns all across America His narrative spotlights a generation of young people who joined the military during the tumultuous 1960s and informs a later generation of the hard choices made many with long term consequences The story of the Morenci Marines also reflects that of their hometown a company town dominated by the Phelps Dodge Mining Corporation where the company controlled lives and the labor strife was legendary The town s patriotic citizens saw Vietnam as a just cause moving Clive Garcia s mother to say He died for this cause of freedom Yet while their sons fought and sent home their paychecks Phelps Dodge sought to destroy the union that kept families afloat pushing the government to end a strike that it said undermined the war effort Morenci was also a place where cultures intermingled and the nine friends included three Mexican Americans and one Native American Longley reveals how their backgrounds affected their decisions to join and also helped the survivors cope with Mike Cranford racing his Harley on back roads at high speeds while Joe Sorrelman tried to deal with demons of war through Navajo rituals Drawing on personal interviews and correspondence that sheds new light on the Morenci Nine Longley has written a book as much about loss grief and guilt as about the battlefield It makes compelling reading for anyone who lived in that era and for anyone still seeing family members go off to fight in controversial wars

The Pursuit of Technological Superiority and the Shrinking American Military Daniel R. Lake,2019-01-22 Why has the US military begun to suffer from overstretch in recent decades Why is one of the largest militaries in the world and the most expensive by far periodically stressed by the operational demands placed upon it This book argues that recent problems with overstretch are the result of a heavy reliance on technology to solve tactical and strategic problems Over the last seven decades the US armed services have consistently chosen to push the technological

frontier out in an effort to first gain and then maintain qualitative superiority over potential foes The high procurement and support costs associated with cutting edge weapon systems has resulted in a military that is shrinking in both absolute size and in the relative share of combat forces The culmination of this process is a US military that increasingly lacks the capacity needed to conduct operations without putting significant stress on its personnel and equipment Lake argues that this pattern is a manifestation of an American cultural disposition favoring technology He shows that this affinity for technology is present in the organizational cultures of all the armed services though not to the same degree By examining procurement programs for each armed service this book reveals how attempts to develop and leverage superior technology has resulted in some notable program failures high procurement costs for the latest generation of equipment with associated production cuts and the high support requirements that are causing the relative share of combat forces to shrink Lake's analysis of recent initiatives by the armed services suggests that this pattern is likely to continue with the US military remaining prone to overstretch whenever its operational tempo increases above the peacetime baseline
