**Fibre-reactive Dyes** Walter Francis Beech, 1970      *Modern Colorants: Synthesis and Structure* A.T. Peters, H.S. Freeman, 2014-02-19 Although the research activities of dyestuff chemists worldwide have been influenced to a great extent in recent years by the need to respond to a variety of environmental issues associated with the manufacture and application of synthetic dyes and pigments a significant level of targeted research continues to be devoted to new chemistry aimed at enhancing the technical properties of dyes in commerce This book is a presentation of various aspects of basic research conducted during the past decade but not reported in the recent review literature The coverage herein is unique in that it emphasizes systematic approaches commonly utilized in the design and synthesis of dyes and pigments and the required intermediates While it is well known that certain transition metals are important in the synthesis of technically viable metallized dyes for polyamide and protein fibers these metals are demonstrated in Chapter 1 also to be effective agents in the regiospecific placement of substituents into azo compounds The scope and limitations of this chemistry are presented In other synthetic work a description of the different processes employed to produce the major families of reactive dyes is presented In Chapter 4 special attention is given to reactive dyes containing more than one reactive group and to the more recent developments in the field The two chapters which follow provide a review of the recent literature pertaining to novel chromophores and dyes for the D2T2 process respectively      Colour Chemistry Robert M Christie, 2007-10-31 This book provides an up to date insight into the chemistry behind the colour of the dyes and pigments that make our world so colourful The impressive breadth of coverage starts with a dip into the history of colour science Colour Chemistry then goes on to look at the structure and synthesis of the various dyes and pigments along with their applications in the traditional areas of textiles coatings and plastics and also the ever expanding range of high tech applications Also discussed are some of the environmental issues associated with the manufacture and use of colour The broad and balanced coverage presented in this book makes it ideal for students and graduates In addition many specialists in industry or academia will also benefit from the overview of the subject that is provided      **Cotton Dyeing** Margaret Elizabeth Ainscow, 1985      The Coloration of Wool and Other Keratin Fibres David M. Lewis, John A. Rippon, 2013-05-20 Keratin fibres particularly wool fibres constitute an important natural raw material in textiles due to their comfort and thermal properties Wool coloration demands an understanding of the complex nature of the interplay between wool fibre chemistry morphology and the coloration processes The Coloration of Wool and other Keratin Fibres is a comprehensive treatment written by leading international experts of the chemistry and chemical processes involved in wool dyeing printing preparation and finishing The book covers the chemical and physical structure of wool keratin fibres detailing their complex heterogeneity and the subtle links between fibre structure and dyeability the coloration of fabrics containing wool including a variety of wool blends such as wool silk wool polyester and wool cotton and luxury keratin fibres such as mohair cashmere and camel the chemistry of the various types of

dyes utilised in wooldyeing and in depth discussions on the physical properties to optimise these processes practical application of dyes to wool in all its forms loose stock combed tops yarns and piece goods is covered in the chapter on wool dyeing machinery two chapters one on bleaching and whitening and one on dyeing human hair provide a valuable extension to the topic of cosmetic chemistry The Coloration of Wool and other Keratin Fibres is essential reading for professionals worldwide working in companies involved in the dyeing and printing of wool wool blends and other keratin fibres and also for the producers of dyes and auxiliary dyeing agents It is a valuable resource for teachers and students of universities and technical institutes as well as for researchers who are focusing their investigations on wool wool blends human hair or dyes and auxiliaries Published in partnership with the Society of Dyers and Colourists SDC Find out more at <http://www.wiley.com/go/sdc>

**Forensic Examination of Fibres** James Robertson, Claude Roux, Kenneth G. Wiggins, 2017-12-01 In order for forensic fibre examiners to fully utilize fibre and textile evidence during their analysis they require not only specialised forensic knowledge but also in depth knowledge of fibres yarns and fabrics themselves Production both the chemical and physical structure and the properties of these materials is required in order to determine the value of fibre evidence This includes knowing production figures fashion changes sudden arrivals of new materials dye variability and numerous other factors that may have a bearing on the information obtained Fully updated with the latest advances Forensic Examination of Fibres Third Edition continues in the tradition of the First 1992 and Second Editions 1999 as the premier text on the subject of forensic fibre analysis The international team of contributing authors detail the recovery of the evidence through the different stages of laboratory examination to the evaluation of the meaning of findings The coverage has been considerably expanded and all material has been revised and wholly updated Topics covered include examining damaged textiles infrared microspectroscopy and thin layer chromatography and colour analyses This edition also highlights the critical role of quality assurance in ensuring the reliability of the technical observations and results and in doing so looks at the implications of supervisory managers and labs in the accurate and responsible analysis of such evidence Features include Outlining evidentiary process from collecting and preserving the evidence at the crime scene through the laboratory analysis of fibres Detailing the latest developments and emerging technologies including Kevlar and other such advances in fibre technology Coverage of a broad array of fibres both natural cellulose protein and mineral and man made fibres including synthetic inorganic and regenerated Forensic Examination of Fibres Third Edition is a much needed update to the classic book serving as an indispensable reference to crime scene technicians laboratory forensic scientists and microscopists students in police forensic and justice science programs

**Fibres to Smart Textiles** Asis Patnaik, Sweta Patnaik, 2019-08-08 Fibres to Smart Textiles Advances in Manufacturing Technologies and Applications offers comprehensive coverage of the fundamentals and advances in the textile and clothing manufacturing sectors It describes the basics of fibres yarns and fabrics and their end use in the latest developments and applications in the field and addresses environmental

impacts from textile processes and how to minimize them This book serves as a single comprehensive source discussing textile fibres yarn formation filament formation techniques woven fabric formation knitting technologies nonwoven manufacturing technologies braiding technologies and dyeing printing and finishing processes Testing of textile materials environmental impacts of textile processes and use of CAD and CAM in designing textile products are also included The book also discusses applications including textile composites and biocomposites technical textiles smart textiles and nanotextiles With chapters authored by textile experts this practical book offers guidance to professionals in textile and clothing manufacturing and shows how to avoid potential pitfalls in product development

**Forensic Examination of Fibres, Second Edition** James Robertson, Claude Roux, Kenneth G. Wiggins, 2002-09-11 This book is the definitive text for forensic scientists police and lawyers who may be involved with the use of textile fibres to provide evidence in criminal cases While covering the subject in detail from recovery of the evidence through the different stages of laboratory examination to evaluating the meaning of findings it is written in such a way that it should be interesting and understandable to the beginner and to the layman as well as to the expert
