

# FIBRE CHANNEL ARBITRATED LOOP (FC-AL) TOPOLOGY

- It is a high-speed **FC topology** in which **FC ports** use arbitration to establish a **point-to-point circuit** and prevent multiple ports from sending **frames** at the same time.
- Here devices are connected in a one-way **ring**. So, when ports in a loop topology have information to transmit, they must send out an arbitration **signal** to decide which port can use the **channel**. The port in control of the channel then sends an "open" signal to the destination port and transmits its data. Since all the ports in a loop are connected, every port will see and pass along the data -- but ignore the data unless it is addressed to that particular port.
- FC-AL can connect up to 126 **ports** on one **controller**.
- It is still used internally in many Fibre Channel **switches** but rarely to connect hosts to storage these days

collaboration and electronic commerce      **StarBriefs 2001** ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions      Fibre Channel Over Ethernet (FCoE) Robert W. Kembel,2010-01 Fibre Channel over Ethernet FCoE burst upon the data center storage scene in April of 2007 with a joint press release issued by ten of the leading companies in the storage industry Since that initial press release FCoE has generated an extraordinary amount of discussion and controversy within the industry The purpose of this book is to examine the FCoE technology and provide an understanding of the reasons behind its development and ultimate applications Just as Fibre Channel rode the way of Storage Area Networking and brought an entirely new paradigm to storage attachment FCoE is riding the wave of the converged data center Ethernet The realization of a converged data center network will fundamentally change the storage landscape and open the storage market to new ideas architectures and products Because FCoE is based on both Fibre Channel and Ethernet an understanding of both of these technologies is required to fully understand FCoE It is not the intent of this book to cover those technologies in depth The companion books in the Fibre Channel Consultant series already provide a thorough discussion of the Fibre Channel technologies and protocols Similarly there are many excellent books that already cover Ethernet This book targets the marriage of those two technologies and explains how FCoE leverages the advantages of both technologies as the storage component of a converged data center Ethernet Using more than 160 figures and 25 tables to illustrate the essential concepts and operation of FCoE this book proceeds step by step from basic concepts through detailed examination of all FCoE protocols Unlike other texts including the standards themselves Fibre Channel over Ethernet expands on key factors such as configurations deployment scenarios and the benefits of FCoE It s the ultimate resource for anyone involved in this dynamic technology
