Fibromyalgia Syndrome Fighting The Devil With T:

The Fibromyalgia Controversy Clement M. Hall, 2013-04-29 As many as fifteen million American women or 5 percent of the adult female population in the US suffer from the disabling medical condition known as fibromyalgia. If one takes into account husbands, partners, children, and other close relatives, the proportion of the American population directly or indirectly affected by fibromyalgia could be as high as 10 percent or thirty million persons. Nonetheless, the medical community is divided over the reality of this condition. One side argues, sometimes heatedly, that the patients are masquerading, pretending a disability they know they do not have. The other side counters with equal passion that fibromyalgia sufferers are abused by a society that fails to give them the support they deserve while painfully suffering from this severely debilitating illness. Without taking sides, Dr. M. Clement Hall presents six fictional, though factually based, case studies of typical patients from differing socioeconomic backgrounds and describes the varying investigations, diagnoses, and treatments they have undergone. Each of these case studies represents a composite of many years of clinical practice rather than one specific patient. Collectively, they cover the range of experiences fibromyalgia patients are likely to have encountered. By taking this unique approach, Dr. Hall presents an objective overview of the fibromyalgia situation today in North America. Patients, family members, and physicians will see themselves reflected in the descriptions and will gain a broader understanding of this challenging illness. M. Clement Hall, MD, Toronto, Ontario, Canada, now retired, was the director of continuing education in the emergency department of Scarborough Hospital. He is the author of *Trauma Surgeon* among numerous other works.

Fibromyalgia Syndrome- Fighting the Devil With T Marilyn Sue, 2002-11-01 FORWARDtc FORWARD The Book you are about to read portrays a determined woman who sought to learn as much as she could about fibromyalgia syndrome. In her quest, she also came to terms with the fact that knowledge of the syndrome itself was simply not enough to attempt to gain control over her personal situation. So, with a thirst that could not be quenched, she proceeded to seek other information that specifically pertained to learning to live with any type of painful, incurable, and chronic illness. Marilyn has been a patient of mine for many years. I know that fibromyalgia has been a heavy burden for her to carry and that, because of its intensity on her physical and emotional being, she has lost a great deal in her life. Although she has spent many years suffering with chronic pain, her spirit has yet to be broken. She continually strives to make a better life for herself in spite of her illness. Reading her book has convinced me that she has learned a great deal from both her personal experiences and her research. Her book is written in a clear and concise manner that can be easily referred to time and time again and represents her own personal views and opinions strictly from a patient's standpoint. She wishes to share her personal experiences and extensive research with others that might benefit from them. Her book is a must-read for anyone that is afflicted with this disorder and for those in close connection with someone that has it. Kenneth Williams, D.C. *A More Excellent Way* Henry W.
