## **Fidelity With Plausibility Modest Christologies In The Twentieth Century:**

**Fidelity with Plausibility** Wesley J. Wildman, 1998-01-01 Virtually all human endeavors can be analyzed and modeled and understood through computer aided study and that is very much at the core of operations research game theory and decision science Understanding the potential impact of any action is critical to the success of that action and in ESTIMATING IMPACT Alexander Kott and Gary Citrenbaum with a stellar group of contributors demonstrate how military or humanitarian interventions or the decision not to intervene can be rigorously analyzed beforehand and their likely impacts and ramifications predicted at levels appropriate to their scope A wide range of modeling programs are available that support plan assessment and impact forecast and they allow accurate prediction within an interdependent set of political military economic social information and infrastructure systems and experts involved in the use and development of these tools demonstrate how when and why they should be used Religion within the Limits of History Alone Demian

Wheeler, 2020-09-01 Among the greatest challenges facing religious thinkers today is that created by historicism the notion that human beings and their myriad understandings of reality are utterly historical conditioned by contingent circumstances and tied to particular contexts In this book Demian Wheeler confronts the historicist challenge by delineating and defending a particular trajectory of historicist thought known as pragmatic historicism Rooted in the German Enlightenment and fully developed within the early Chicago school of theology pragmatic historicism is a predominantly American tradition that was philosophically nurtured by classical pragmatism and its intellectual siblings naturalism and radical empiricism Religion within the Limits of History Alone not only undertakes a detailed genealogy of this pragmatic historicist lineage but also sets forth a constructive program for contemporary theology by charting a path for its future development Wheeler shows that pragmatic historicism is an underdeveloped resource for contemporary theology since it offers a model for normative religious thought that is theologically compelling yet wholly nonsupernaturalistic deeply pluralistic unflinchingly liberal and radically historicist Making Memory Alana M Vincent, 2014-11-27 The twentieth century has been called a century of

horror Proof of that designation can be found in the vast and ever increasing volume of scholarly work on violence trauma memory and history across diverse academic disciplines This book demonstrates not only the ways in which the wars of the twentieth century have altered theological engagement and religious practice but also the degree to which religious ways of thinking have shaped the way we construct historical narratives Drawing on diverse sources from the Hebrew Bible to Commonwealth war graves from Greek tragedy to post Holocaust theology Alana M Vincent probes the intersections between past and present memory and identity religion and nationality The result is a book that defies categorization and offers no easy answers but instead pursues an agenda of theological realism holding out continued hope for the restoration of the world Partaking of God Denis Edwards, 2014 The natural world around us is in crisis We know it has a dynamic evolutionary character How might we understand this world in relationship to God Partaking of God builds on the foundations

of the dynamic trinitarian theology of Athanasius It develops into a theology of the Word as the divine Attractor and the Spirit as the Energy of Love in evolutionary emergence Then it explores God s suffering with creatures the humility of God in creation church teaching on the human soul in relation to neuroscience and grace and original sin in relationship to evolution It culminates in a Christian theology of ecological conversion Incarnation Niels Henrik Gregersen,2015-07-01 Deeply engaged with both the tradition and the contemporary world the book leads readers to an understanding of deep incarnation interpreting this central Christian idea to address the needs of the entire created order and allows Christology to be relevant and meaningful when responding to the challenges of scientific cosmology and of global religious pluralism **The**

relationship between religious studies and theology and the place of each in the modern secular university **Jesus, Symbol of God** Roger Haight,1999 Already hailed as a landmark in contemporary Catholic theology Jesus Symbol of God surveys scriptural data the key moments in the development of doctrine and the distinctive horizons of our contemporary world to develop a comprehensive and systematic christology for our time The task of christology is to explain what it means to say that Jesus is the bearer and revealer of God in the Christian community the decisive mediation of God s salvation or in other words the symbol of God Ernst Troeltsch and Comparative Theology Echol Lee Nix,2010 Ernst Troeltsch and

Comparative Theology examines the methodological attempts of Ernst Troeltsch and Robert Neville for discerning Christian normativity The investigation of Troeltsch focuses on his treatment of the absoluteness of Christianity and highlights the crisis brought upon absolute religious claims by the study of the history of religions By rejecting both the supernatural exclusive apologetic of orthodox Protestantism and the evolutionary apologetic of liberal Protestantism Troeltsch insists that theology s method should be the history of religions method die religionsgeschichtliche Methode Like Troeltsch Neville agrees with historical inquiries but contrary to Troeltsch Neville advances an axiological hypothesis to thinking which is founded in valuation Neville explains the role of valuation at the imaginative level of thinking and relates it to his theory of normative truth in religious symbols This study shows that Neville begins with Troeltsch s methodological presuppositions

but achieves more normative theology than Troeltsch especially on ways in which God is engaged in symbolically shaped thinking and practice Both thinkers offer creative insights for theology that make possible a critical comparison of truth claims regarding the validity of Christianity in and for a historically conscious age Defining Religion Robert Cummings Neville, 2018-01-18 Provides a new orientation to philosophy of religion and a new theory of how religion ought to be defined In this collection of essays written over the past decade Robert Cummings Neville addresses contemporary debates about the concept of religion and the importance of the comparative method in theology while advancing and defending his own original definition of religion Neville's hypothesis is that religion is a cognitive existential and practical engagement of ultimate realities five ultimate conditions of existence that need to be engaged by human beings The essays which range from formal articles to invited lectures develop this hypothesis and explore its ramifications in religious experience philosophical theology religious studies and the works of important thinkers in philosophy of religion Defining Religion is an excellent introduction to Neville's work especially to the systematic philosophical theology presented in his magisterial three volume set Philosophical Theology **A Science and Religion Primer** Heidi A. Campbell, Heather Looy, 2009-03-01 A Science and Religion Primer is a unique resource an encyclopedia an annotated bibliography and a survey of the relationship between two equally complex fields Editors Heidi Campbell and Heather Looy begin their work with four chapters from expert contributors history of the science and religion dialogue the role of philosophy in the science and religion dialogue theology's intersection with the science and religion dialogue and science and technology in light of religion Entries cover such diverse topics as philosopher of science Karl Popper the anthropic principle Gaia theodicy hermeneutics Intelligent Design and more Professors and students of theology religion and science at both the undergraduate and graduate levels will welcome this contribution A Science and Religion Primer is an accessible and affordable contribution to interdisciplinary studies and provides a respectful conversation between science and faith Christ Actually James Carroll, 2014 Critically acclaimed and bestselling author James Carroll has explored every aspect of Christianity faith and Jesus Christ except this central one What can we believe about and how can we believe in Jesus in the twenty first century in light of the Holocaust and other atrocities of the twentieth century and the drift from religion that followed **Troeltsch's Eschatological Absolute** Evan Kuehn, 2020 Ernst Troeltsch is widely recognized as having played an important role in the development of modern Protestant theology but his contribution is usually understood as largely critical of traditional modes of theological inquiry He is best known for his historicist critique of dogmatic theology and seen either as the closing chapter of nineteenth century liberalism or as a proto postmodernist Central to this pivotal period in modern theology stands the problem how can we articulate a doctrine of ultimate reality such that a meaningful and coherent account of the world is available without our understanding of God thereby becoming conditioned by the world itself Evan Kuehn demonstrates that historiographical assumptions about twentieth century religious thought have obscured the coherence and relevance of Troeltsch's

understanding of God history and eschatology An eschatological understanding of the Absolute Kuehn contends stands at the heart of Troeltsch's theology and the problem of historicism with which it is faced Troeltsch's eschatological Absolute must be understood in the context of questions that were being raised at the turn of the twentieth century both by research on New Testament apocalypticism and by modern critical methodologies in the historical sciences His theory of the Absolute is central to his views on religion and religious ethics and provides practitioners of constructive studies in religion with important resources for engaging with sociological and historical studies where Troeltsch's status as a classical figure is widely recognized

**On the Scope and Truth of Theology** Robert C. Neville, 2006-06-05 A genuinely fresh theological project that accounts for the interdisciplinary nature of religion and its discontents

**Religious Truth** Robert Cummings Neville, 2001-01-01 Explores religious truth in a range of world religions and discusses the issue and philosophical implications of comparison itself

Religion in Multidisciplinary Perspective F. LeRon Shults, Robert Cummings Neville, 2022-01-01 Religion in Multidisciplinary Perspective provides the first comprehensive treatment of the work of Wesley J Wildman one of the most inventive thinkers in the field of religious studies Scholars with expertise in philosophical theological and scientific approaches to the study of religion offer critical and constructive engagements with Wildman's astonishingly creative and integrative oeuvre The essays address themes that will be of interest to those concerned with the current state of scholarship on religion from a variety of disciplines including philosophy theology ethics psychology sociology anthropology and others The volume concludes with a response by Wildman

**Creation** Fraser N. Watts, 2008 This text arises from a conference of the International Society for Science and Religion ISSR held in Boston in August 2004 Chapters include Concepts of Law and Probability in Theology and Science The Development of the Concept of Laws of Nature Chance and Evolution and God and Probability

*Creation* Fraser Watts, 2018-12-17 Published in 1999 How can we reconcile assumptions about the lawfulness of the universe with provision for chance events Do the laws of nature indicate what absolutely must happen or just what is most likely to happen These are important questions for both science and theology and are explored here in the first in depth coverage of an important but neglected topic Including perspectives from prestigious contributions and published with the backing of the International Society for Science and Religion ISSR *Creation* Law and Probability employs the disciplines of history and philosophy as well as cosmology evolutionary biology and neuroscience in a fascinating dialogue of faith traditions

The Trinity and an Entangled World John Polkinghorne, 2010-08-25 Besides containing insights from both expert scientists and theologians The Trinity and an Entangled World considers the way in which these parallel insights can contribute to a harmonious dialogue between science and religion Book Jacket
