**Fiefs and Vassals** Susan Reynolds,1994 *Fiefs and Vassals* is a book that will change our view of the medieval world Offering a fundamental challenge to orthodox conceptions of feudalism Susan Reynolds argues that the concepts of fiefs and vassalage that have been central to the understanding of medieval society for hundreds of years are in fact based on a misunderstanding of the primary sources Reynolds demonstrates convincingly that the ideas of fiefs and vassalage as currently understood far from being the central structural elements of medieval social and economic relations are a conceptual lens through which historians have focused the details of medieval life This lens according to Reynolds distorts more than it clarifies With the lens removed the realities of medieval life will have the chance to appear as they really are more various more individual more complex and perhaps richer than has previously been supposed This is a radical new examination of social relations within the noble class and between lords and their vassals the distillation of wide ranging research by a leading medieval historian It will revolutionize the way we think of the Middle Ages

[Feud, Violence and Practice](#) Belle S. Tuten,Tracey L. *Writing Normandy* Felice Lifshitz,2020-11-19 *Writing Normandy* brings together eighteen articles by historian Felice Lifshitz some of which are published here for the first time

The articles examine the various ways in which local and regional narratives about the past were created and revised in Normandy during the central Middle Ages. These narratives are analyzed through a combination of both cultural studies and manuscript studies in order to assess how they functioned, who they benefitted, and the various contexts in which they were transmitted. The essays pay particular attention to the narratives built around venerated saints and secular rulers, and in doing so bring together narratives that have traditionally been discussed separately by scholars. The book will appeal to scholars and students of cultural history and medieval history as well as those interested in manuscript studies. CS1095

**Law and Language in the Middle Ages**, 2018-07-10. *Law and Language in the Middle Ages* investigates the encounter between law and legal practice from the linguistic perspective. The essays explore how legal language expresses and advances power relations along with the ways in which the language of law legitimates power. The wide geographical and chronological scope showcases how power legitimacy and language interact, moving the discussion beyond traditional issues of identity or the formation of nation states and their institutions. What emerges are different strategies reflective of the diverse and pluralistic political, legal, and cultural worlds of the Middle Ages. Contributors are Michael H. Gelting, Dirk Heirbaut, Carole Hough, Anette Kremer, Ada Maria Kuskowski, Anders Leegaard Knudsen, Andr. Marques, Matthew McHaffie, Bruce O'Brien, Paul Russell, Werner Schfke, and Vincenz Schwab.

**Law and History in the Latin East**, Peter W. Edbury, 2023-05-31. This second collection of papers by Peter Edbury focuses primarily on the literature either composed in the Latin East or closely associated with it. The legal treatises from the kingdom of Jerusalem and from Cyprus and Antioch have long been recognized as providing insights into the juridical and social history of these places in the twelfth and thirteenth centuries, and some of the papers reissued here reflect the author's work in reediting two of the most famous of these treaties: those by John of Ibelin/Jaffa and Philip of Novara. The studies on historical literature are chiefly concerned with vernacular texts, most notably the Old French translation of William of Tyre and its Continuations, again much a result of his current work on a new edition of the Continuations and the associated text known as *La Chronique d'Ernoul*. Other papers concerned with aspects of the narrative traditions that furnish a significant part of our knowledge of Lusignan Cyprus in the thirteenth and fourteenth centuries, and with which in one way or another Peter Edbury has been engaged since the early 1970s.

Reform and the papacy in the eleventh century, Kathleen G. Cushing, 2020-01-03. This book explores the relationship between the papacy and reform against the backdrop of social and religious change in later tenth and eleventh century Europe. Placing this relationship in the context of the debate about transformation, it reverses the recent trend among historians to emphasise the reform developments in the localities at the expense of those being undertaken in Rome. It focuses on how the papacy took an increasingly active part in shaping the direction of both its own reform and that of society, whose reform became an essential part of realising its objective of a free and independent Church. It also addresses the role of the Latin Church in western Europe around the year 1000, the historiography of reform, the significance of the Peace of

God as a reformist movement the development of the papacy in the eleventh century the changing attitudes towards simony clerical marriage and lay investiture reformist rhetoric aimed at the clergy and how reformist writings sought to change the behaviour and expectations of the aristocracy Summarising current literature while presenting a cogent and nuanced argument about the complex nature and development of reform this book will be invaluable for an undergraduate and specialist audience alike

**Desiring Discourse** James Paxon, Cynthia Gravlee, 1998-12 These essays examine the central role played by Ovid in medieval amatory literature In so doing they address the theoretical problems of the entrenched aesthetics of reception long tied to the Ovidian Middle Ages while they also seek at times to overturn many of the prior critical perceptions associated with Ovidian suasive discourse in particular the unproblematized assertion of male will and the erasure of female voice Responding to the great fund of critical work done on amatory literature in the Middle Ages a literature thus far organized into an array of categories such as the rhetorical institution of persuasion and seduction the Ovidian heritage *aetas ovidiana* the language of amatory trial the genealogy of the romance and the convention of courtly love this volume seeks to provide a comprehensive look at the rhetorical and social conditions of desire

**Lordship and Locality in the Long Twelfth Century** Hannah Boston, 2024 A new perspective on lordship in England between the Norman Conquest and Magna Carta Multiple lordship that is holding land or owing allegiance to more than one lord simultaneously was long regarded under the western European feudal model as a potentially dangerous aberration and a sign of decline in the structure of lordship Through an analysis of the minor lords of Leicestershire Derbyshire and Staffordshire during the long twelfth century this study demonstrates conversely that multiple lordship was at least as common as single lordship in this period and regarded as a normal practice and explores how these minor lords used the flexibility of lordship structures to construct localised centres of authority in the landscape and become important actors in their own right Lordship was moreover only one of several forces which minor lords had to navigate Regional society in this period was profoundly shaped by overlapping ties of lordship kinship and locality each of which could have a fundamental impact on relationships and behaviour These issues are studied within and across lords honours around religious houses and urban areas and in a close case study of the abbey of Burton upon Trent This book thus contextualises lordship within a wider landscape of power and influence

**The Principality of Antioch and Its Frontiers in the Twelfth Century** Andrew D. Buck, 2017 An investigation into how Antioch maintained itself as an independent principality during a period of considerable challenges

From House Societies to States Juan Carlos Moreno Garcia, 2022-10-21 The organization and characteristics of early and ancient states have become the focus of a renewed interest from archaeologists ancient historians and anthropologists in recent years On the one hand neo evolutionary schemas of political transformation find it difficult to define some of their most basic concepts such as chieftdom complex chieftdom and state not to mention the transition between them On the other hand teleological interpretations based on linear dynamics from less to increasingly more complex political structures in

successive steps impose biased and too rigid views on the available evidence In fact recent research stresses the existence of other forms of socio political organization less vertically integrated and more heterarchical that proved highly successful and resilient in the long term in tying together social groups What is more such forms quite often represented the basic blocks on which states were built and that managed to survive once states collapsed Finally nomadic maritime and mountain populations provide fascinating examples of societies that experienced alternative forms of political organization sometimes on a seasonal basis In other cases their consideration as marginal populations that cultivated specialized skills ensured them a certain degree of autonomy when living either within or at the borders of states This book explores such small scale socio political organizations their potential and the historical trajectories they stimulated A selection of historical case studies from different regions of the world may help rethink current concepts and views about the emergence and organization of political complexity and the mechanisms that prevented occasionally the emergence of solid polities They may also cast some light over trajectories of historical transformation still poorly understood as are the limits of effective state power This book explores the importance of comparative research and long term historical perspectives to avoid simplistic interpretations based on the characteristics of modern Western states abusively used retrospectively
