 Going, 1899 Excerpt from book CHAPTER V GREEN LEAVES AT WORK Between the budding and the falling leaf Stretch  
 happy skies With colors and sweet cries Of mating birds in uplands and in glades The world is rife 7 B Aldrich When spring  
 long waited for has come indeed and young leaves are unfolding in May sunshine we find the ground beneath the branches  
 strewn with half transparent green or brownish scales In city parks they litter the asphalt walks and drift along their edges  
 into little heaps They are bud scales whose day of usefulness is over They have braved all the rigors of storm and frost while  
 folded safe within them lay the foliage of the coming summer destined to expand in tender colors under happy skies But the  
 bud scales seldom have any beauty save the beauty of fitness They and the sleeping life which they enfold together constitute  
 the winter bud It contains very little water in its tissues and so can withstand low temperatures without freezing The bud  
 scales live in a chill and sombre world and when the sky is blue and full of light they fall and perish in the heart of spring Yet  
 they are themselves imperfectly formed and partially developed leaves Under certain exceptional circumstances they have  
 shown their possibilities and developed into typical leaves And under most circumstances there is in them the arrested power  
 to become like the green foliage of summer Stunted as they are these scales have done work which perfect leaves could  
 never do Their horny substance has shed the cold rains of winter resisted the frost and protected the tips and shoots in which  
 the life of the branches lay dormant We owe to the bud scales most of the beauty of the summer world Their highest  
 usefulness has been attained through sacrifice of their own      **The Forest and the Field. By H. A. L. Eveson , the "Old**
