Field Desorption Mass Spectrometry:

Field Desorption Mass Spectrometry Laszlo Prokai, 1989-12-11 Principles of Field Ionization and Field Desorption Mass Spectrometry H. D. Beckey, 2016-07-29 Principles of Field Ionization and Field Desorption Mass Spectrometry delves deeper into field ionization and field desorption The book covers the five main subareas of field ionization and field desorption mass spectrometry that has grown in importance Coverage includes the theory of field ionization and field desorption field ionization and field desorption techniques and sources high field surface chemistry kinetics and mechanisms of decomposition of field ions in the gas phase and qualitative and mixture analysis with field ionization and field desorption mass spectrometry The text is recommended for students experts and researchers in chemistry especially those who wish to learn more or have an in depth study about field ionization and field desorption its principles and its applications in chemistry

Some field ionization Jan J. Zwinselman, 1983 **Experiments with Field Ionization and Field Desorption Mass Spectrometry** Carl Edward Rechsteiner, 1977 Field Ionization Mass Spectrometry Hans-D. Beckey, 2017-02-22 Field Ionization Mass Spectrometry focuses on developments in field ionization FI mass spectrometry and describes its applications in physical chemistry with emphasis on mass spectrometric problems Physico chemical problems as well as problems of chemical analysis are considered based on issues such as the probability of field ionization field dissociation and charge distribution kinetics of ion decomposition in high fields negative ions surface diffusion activation of FI emitters and elucidation of the structures of organic compounds This book is comprised of four chapters and begins with a short review on some of the most important directions of research in FI mass spectrometry Two main fields of research are discussed physico chemical investigations and quantitative analysis or structural determination of organic substances The next chapter is devoted to focusing and non focusing sources of FI and covers topics such as methods for production of FI tips and thin wires together with the use of tips and carbon filaments as FI emitters The last two chapters focus on the application of the FI mass spectrometer to physico chemical problems and to quantitative analysis of homologous series of organic substances such as alkanes alkenes alkynes amines and alcohols This monograph is intended primarily for chemists and mass spectrometrists

Some Emitter Surface Modifications in Field Ionization and Field Desorption Mass Spectrometry Tim Lee Youngless, 1980 **Some Field Ionization Kinetic and Negative Ion Field Desorption Mass Spectrometry Studies** Jan Johan Zwinselman, 1983 **Field Ionization, Mass Spectrometry** Hans-D Beckey, 1971-12-31 No detailed description available for Field Ionization Mass Spectrometry Mass Spectrometry Jürgen H Gross, 2011-02-14 This book offers a balanced mixture of practice oriented information and theoretical background as well as numerous references clear illustrations and useful data tables Problems and solutions are accessible via a special website This new edition has been completely revised and extended it now includes three new chapters on tandem mass spectrometry interfaces for sampling at atmospheric pressure and inorganic mass spectrometry Principles of Field Ionization and Field Desorption Mass

Spectrometry H. D. Beckey, Hans-D Beckey, 1971 Field Ionization Mass Spectrometry focuses on developments in field ionization FI mass spectrometry and describes its applications in physical chemistry with emphasis on mass spectrometric problems Physico chemical problems as well as problems of chemical analysis are considered based on issues such as the probability of field ionization field dissociation and charge distribution kinetics of ion decomposition in high fields negative ions surface diffusion activation of FI emitters and elucidation of the structures of organic compounds This book is comprised of four chapters and begins

Mass Spectrometry of Polymers Giorgio Montaudo, Robert P. Lattimer, 2001-10-29 Mass Spectrometry MS has rapidly become an indispensable tool in polymer analysis and modern MS today complements in many ways the structural data provided by Nuclear Magnetic Resonance NMR and Infrared IR methods Recent advances have sparked a growing interest in this field and established a need for a summary of progress made and results

Ionization Methods in Organic Mass Spectrometry Alison E Ashcroft, 2007-10-31 Ionization Methods in Organic Mass Spectrometry is a basic practical guide for scientists of all disciplines who wish to analyse samples by organic mass spectrometry Concentrating on instrumental operation this book gives step by step instructions on how to set up and how to achieve the best results using a range of ionization methods including atmospheric pressure chemical ionization electrospray ionization and matrix assisted laser desorption ionization Ionization Methods in Organic Mass Spectrometry will enable a beginner or practitioner with limited experience to choose the most appropriate ionization technique in application areas such as biomolecules drugs and metabolites pesticides polymers and many other organic compounds It will be a valuable practical guide for technicians graduates students or researchers or indeed anyone new to practical organic mass spectrometry

Carbohydrate Analysis Z. El Rassi, 1994-11-11 Carbohydrates and glycoconjugates play an important role in several life processes The wide variety of carbohydrate species and their inherent polydispersity and heterogeneity require separation techniques of high resolving power and high selectivity such as high performance liquid chromatography HPLC and capillary electrophoresis HPCE In the last decade HPLC and recently HPCE methods have been developed for the high resolution and reproducible quantitation of carbohydrates Despite the importance of these two column separation technologies in the area of carbohydrates no previous book describes specialized methods for the separation purification and detection of carbohydrates and glycoconjugates by HPLC and HPCE Therefore the objective of the present book is to provide a comprehensive review of carbohydrate analysis by HPLC and HPCE by covering analytical and preparative separation techniques for all classes of carbohydrates including mono and disaccharides linear and cyclic oligosaccharides branched heterooligosaccharides e g glycans plant derived oligosaccharides glycoconjugates e g glycolipids glycoproteins carbohydrates in food and beverage compositional carbohydrates of polysaccharides carbohydrates in biomass degradation etc The book will be of interest to a wide audience including analytical chemists and biochemists carbohydrate glycoprotein and glycolipid chemists molecular biologists biotechnologists etc It will also be a useful reference work for both the

experienced analyst and the newcomer as well as for users of HPLC and HPCE graduates and postdoctoral students
