William S. Leet, 2001 This 592 page spiral bound reference provides a baseline of information for all those involved with managing living marine resources in California and chronicles changes that have occurred in many of the state's fisheries. Organized by marine ecosystems, bays and estuaries nearshore and offshore. Includes illustrated species descriptions with details of biological knowledge, fishery history, landings data, population status, and references. Also includes sections on marine birds and mammals and appendices containing management considerations by species, a glossary of technical terms and acronyms, and fishing gear illustrations. Jointly produced by the California Sea Grant Extension Program and the California Department of Fish and Game following the passage of the Marine Life Protection Act in January 1999. **Key to Field Identification of Anadromous Juvenile Salmonids in the Pacific Northwest** Robert J. Seliskar, John L. Gallagher, 1983 *In Search of Meaning and Coherence* Wolff-Michael Roth, 2019-02-18

In the course of his research career, much of which was based in his own classrooms, Wolff-Michael Roth explored numerous new theoretical frameworks when the old ones proved to be unable to account for the data. In this book, surrounding 11 of his publications spanning 20 years of work, the author tells a story of how science education research concretely realized and singularized itself. That is, rather than taking sole credit for the work that ultimately came to bear his name, Roth develops a historical narrative in which his work came to realize cultural historical possibilities inherent in the field of science education. But perhaps because some types of this work came to be realized for a first time, Roth's research also came to be characterized by others in the community as cutting edge. This work therefore presents as much an autobiographical narrative as it presents a cultural historical recollection of science education as it unfolded over the past two decades.
