Education at a Glance 2008 OECD Indicators OECD, 2008-09-08 A rich comparable and up to date array of indicators on the performance of education systems in OECD countries Introduction to Forests and Renewable Resources John C.

Hendee, Chad P. Dawson, Wenonah F. Sharpe, 2012-02-03 For 75 years few textbooks have served a topic as well as Introduction to Forests and Renewable Resources. Widely recognized for its comprehensive yet engaging coverage, this major revision provides an outstanding up-to-date overview of management issues, conservation policies, and practices related to forests and renewable resources, and an authoritative perspective on how these topics are evolving. New directions are covered, including green certification of forest management and wood products, improved harvest practices in response to public concerns, carbon sequestration, and ecological services as important forest yields, ecosystem restoration, and resilience as management responds to concerns about global warming and more. Well illustrated with new examples, case studies, and abundant photos, this eighth edition describes the importance and history of forests, evolution of policy, North American distribution of forests, and moves on to describe forest health strategies to combat insects, disease, damage from mammals, and fire. Ecological principles are explained as a basis for forest management, with chapters on management of the associated resources of wildlife, watersheds, and streams, range resources, outdoor recreation, and wilderness. Market concerns and technology are embraced in chapters on economics, measurement, and analysis, harvesting, and forest products. Concluding chapters describe management of forests and renewable resources by the federal government, by states, by private land owners, and in urban areas and communities. For forestry, natural resource, and environmental science students, involved citizens, and resource users and professionals, this book is your reference and guide to forests and renewable resources.
