## **Field Techniques In An Urban Language Study:**

Field Techniques in an Urban Language Study Roger W. Shuy, Walt Wolfram, William K. Riley, 1968 This volume is essentially a report of the methodology employed in the survey of Detroit speech carried out in 1966-67 by the staff of the Detroit Dialect Study. Research was done through Michigan State Univ under contract with the Cooperative Research Branch U S Office of Education. As a methodological study, this work is generally descriptive rather than theoretical in order to provide a practical base for large scale urban language study. *Field Techniques in an Urban Language Study* James K. Bachmann, 1970 **Field techniques in an urban language study**, 1968 **Linguistic Field Methods** Bert Vaux, Justin Cooper, 2007-01-01 Linguistic Field Methods approaches the elicitation of linguistic data from native speaker informants in a novel and engaging manner. The authors follow introductory chapters surveying the general enterprise of field research with chapters exploring methods of eliciting data in eight major areas of current linguistic interest: phonetics, phonology, morphology, syntax, semantics, pragmatics, sociolinguistics, and dialectology and historical linguistics. **Field techniques in an urban language study.** [By] Roger W. Shuy, Walter A. Wolfram, William K. Riley Roger Wellington SHUY, William K. RILEY, Walt Wolfram, 1968 **Research Methods in Language Variation and Change** Manfred Krug, 2013-10-24 This systematic state-of-the-art survey is ideal for both novice researchers and professionals interested in extending their methodological repertoires. **Designing Questionnaires for Language Studies** Lamont Antieau, 2025-09-30 Designing Questionnaires for Language Studies is a guide to the design and use of questionnaires for empirical linguistic research, particularly in the areas of dialectology, sociolinguistics, and linguistic anthropology. Whether completed via written correspondence or through interviewing, questionnaires play an essential role in linguistic research. Yet the design of questionnaires is rarely taught formally, leaving researchers to learn effective design in practice. This practical and accessible text offers structured step-by-step guidance to provide researchers with the skills they need to make the most of questionnaire-based research. It also provides a history of the use of questionnaires in linguistic research and critically examines the assumptions and motivations inherent in their creation and administration, as well as that of the questions that populate them and discusses how biases can negatively affect the outcome of the research itself. Experience using these tools in the field has led to their refinement over time. Armed with this knowledge, readers can make informed decisions about how to structure their own questionnaires as they embark on linguistic investigations or use it to better understand the results of previous research that has relied on questionnaires for data collection. An Introduction to Sociolinguistics Ronald Wardhaugh, Janet M.
