Field Techniques and Research Methods in Geography Richard H. Stoddard, Robert H. Stoddard, 1982 Field Techniques and Research Methods in Geography Robert H. Stoddard, 1982 **Introduction to Geographic Field Methods and Techniques** John F. Lounsbury, Frank T. Aldrich, 1986 Fieldwork in Geography: Reflections, Perspectives and Actions Rod Gerber, Goh Kim Chuan, 2013-03-14 Geographers regard fieldwork as a vital instrument for understanding our world through direct experience for gathering basic data about this world and as a fundamental method for enacting geographical education The range of international geography and educational experts who contributed to this volume has demonstrated that the concept of fieldwork has a considerable history in the field of geography They have demonstrated that the theoretical aspects of fieldwork have been interpreted differently in regions around the world but the importance of fieldwork remains strong globally A fresh look at the pedagogic implications for fieldwork in formal education offers ideas both for promoting it in geographical education and for maintaining its place in the geography curriculum Audience Forward looking geographers and educators now recognise that alternative strategies especially those involving the use of information technology should be developed to reaffirm the centrality of fieldwork in geographical and wider education *Experiential Learning in Geography* Jonathan E. Wessell, 2025-02-27 This book provides insight into the importance and impacts that experiential learning has in geographic education Like the first book on experiential learning in geography this volume uses the same three areas experience evaluation and encounters as a guide but broadens the examination by looking at many different types of experiential learning There are inherent differences in planning such experiences both domestically and internationally that become evident throughout the text The book stresses the importance of reflection by the student in the learning process and can be used as a guide to planning As such this book is an essential read for students and faculty studying geography education *Research Methods in Geography* Basil Gomez, John Paul Jones, III, 2010-06-29 This comprehensive textbook offers a conceptual and practical introduction to research methodology data collection and techniques used in both human and physical geography Explores a full range of contemporary geographic techniques including statistics mathematical analysis GIS and remote sensing Unique in both content and organization it brings together a team of internationally recognized specialists to create a balanced approach between physical geography human geography and research techniques Includes a series of foundational chapters offering multiple perspectives on the central questions in research methods Examines the conceptual frameworks and practical issues behind data acquisition and analysis and how to interpret results Includes explanations of key terminology and exercises throughout **Field Techniques for Sea-Ice Research** Hajo Eicken, Maya Salganek, 2010-03-15 As much as one tenth of the world's oceans are covered with sea ice or frozen ocean water at some point during the annual cycle Sea ice thus plays an important often defining role in the natural environment and the global climate system This book is a global look at the changes in sea ice and the tools and techniques

used to measure and record those changes The first comprehensive research done on sea ice field techniques this volume will be indispensable for the study of northern sea ice and a must have for scientists in the field of climate change research

Graves-Brown,Rodney Harrison,Angela Piccini,2013-10-17 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and

provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past. In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology, psychology, philosophy, historical geography, science and technology studies, communications and media, ethnoarchaeology, forensic archaeology, sociology, film performance and contemporary art. This volume seeks to explore the boundaries of an emerging sub-discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research. It makes a significant intervention by drawing together scholars working on a broad range of themes, approaches, methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively.

Landscapes of Christianity James S. Bielo, Amos S. Ron, 2022-09-22. How do Christians make relationships with land central to their faith? How have the realities of materiality, geography and ecology shaped Christian territories of belonging and theologies of territory? What social, economic, political conditions surround exchanges between religion and nature? This book explores how Christianity intersects with nature to create unique religious landscapes. Case studies range from the Mormon Trail across the USA, completed by thousands every year, to the Catholic devotional cult of and shrine to St Padre Pio of Pietrelcina. Contributors examine the entangled forms of agency between nature and culture that are at work as Christians produce, consume, experience, imagine, inhabit, manage and struggle over formations of land. Focusing on Christian engagements with land forms in the early 21st century, this book advances the spatial turn in the study of religion, contributes to the anthropology of religion and the study of global Christianities, as well as our understanding of the relationship between Christianity, space and place.

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2004-02-05. Geography in America at the Dawn of the 21st Century surveys American geographers' current research in their specialty areas and tracks trends and innovations in the many subfields of geography. As such, it is both a state-of-the-discipline assessment and a topical reference. It includes an introduction by the editors and 48 chapters, each on a specific specialty. The authors of each chapter were chosen by their specialty group of the American Association of Geographers (AAG). Based on a process of review and revision, the chapters in this volume have become truly representative of the recent scholarship of American geographers. While it focuses on work since 1990, it additionally includes related prior work and work by non-American geographers. Includes a foreword by the eminent geographer Gilbert White.
