Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Global Change and Integrated Coastal Management** Nick Harvey,2007-05-31 Most of the world s population lives close to the coast and is highly dependent on coastal resources which are being exploited at unsustainable rates These resources are being subject to further pressures associated with population increase and the globalization of coastal resource demand This is particularly so for the Asia Pacific region which contains almost two thirds of the world s population and most of the world s coastal megacities The region has globally important atmospheric and oceanic phenomena which affect world climate such as the Asian Monsoon and the El Ni o Southern Oscillation phenomena The Asia Pacific region also has highly significant marine diversity but over the last few decades coastal resources such as mangroves coral reefs and fisheries have

experienced large scale depletion The need to find appropriate management solutions to these and other coastal issues is made more complex by the need to take account of international scientific predictions for global climate change and sea level rise which will further impact on these coasts The idea for this book arose from a meeting of coastal scientists in Kobe Japan in May 2003 The meeting was organized by the Asia Pacific Network for Global Change Research APN an inter governmental network comprising 21 member countries for the promotion of global change research and links between science and policy making in the region Costs and Benefits of Cross-country Labour Migration in the GMS Hossein Jalilian,2012

International labour migration can be characterized in three ways as human aspiration tradition and necessity For some people working overseas is a dream For others international labour mobility is a tradition For a great number of people however international labour migration is an economic necessity It is the only viable solution to realize their basic human right to a decent life GMS worker movements to Thailand typify all three characterizations of international labour mobility While this book focuses on the economic dimensions of international labour emigration principally from Cambodia Laos and Vietnam to Thailand it recognizes at the very outset the equal standing of non economic motivations for migration

Sex Without Consent Shireen J Jejeebhoy,Iqbal Shah,Shyam Thapa,2013-07-04 The pressing need to break the silence on non consensual sex among young people an issue shrouded by denial underreporting and stigma is self evident Despite the growing body of research regarding young people s sexual behaviours the study of coercive sexual experiences has generally been overlooked by both researchers and national programmes Available evidence has been scattered and unrepresentative

and despite this evidence non consensual sex among young people is perceived to be a rare occurrence This volume dispels any such misconception It presents a disturbing picture of non consensual sex among girls as well as boys and among married as well as unmarried young women in a variety of settings This volume documents moreover the expanse of non consensual experiences that young people face from unwanted touch to forced penetrative sex and gang rape Although the focus is on young females the volume also sheds light on the experience of young males as both victims and perpetrators This pioneering volume highlights key factors placing young people at risk whilst outlining the significant distinctive health and social implications they face Sex Without Consent also documents the unsupportive and sometimes abusive or negligent roles of families teachers health care providers and law enforcement agents outlines promising efforts intended to prevent non consensual sex or support survivors and argues for profound changes in norms and values that tolerate or encourage non consensual sex The editors based at the Population Council New Delhi the World Health Organization Geneva and Family Health International Virginia argue compellingly for a radical review and reform of existing programmes designed to prevent this kind of abuse and to support young survivors of sexual trauma in the developing world Addressing the magnitude determinants and consequences of sex without consent this volume provides evidence based directions for programming
