Understanding of Soils Nikola Patzel,Sabine Grunwald,Eric C. Brevik,Christian Feller,2023-09-22 Cultural understandings of soil are diverse and often ambiguous Cultural framing of soils is common worldwide and is highly consequential The implications of what place the earth has in people s world view and everyday life can be in line with or in conflict with natural conditions with scientific views or with agricultural practices The main assumption underlying this work is that soil is inescapably perceived in a cultural context by any human This gives emergence to different significant webs of meaning influenced by religious spiritual or secular myths and by a wide range of beliefs values and ideas that people hold in all societies These patterns and their dynamics inform the human soil relationship and how soils are cared for protected or degraded Therefore there is need to deal inter culturally with different sources and types of knowledge and experience regarding soil a need to cultivate soil awareness and situationally appropriate care through inter and intra cultural dialogues

and learning This project focuses on the human and intangible dimensions of soil To serve this aim the International Union of Soil Sciences IUSS founded a working group on Cultural Patterns of Soil Understanding that has resulted in this book which presents studies from almost all continents written by soil scientists and experts from other disciplines A major objective of this project is to promote intercultural literacy that gives readers the opportunity to appreciate soil across disciplinary and cultural boundaries in an increasingly globalized world

Logical and Computational Aspects of Model-Based Reasoning L. Magnani,N.J. Nersessian,Claudio Pizzi,2012-12-06 Information technology has been in recent years under increasing commercial pressure to provide devices and systems which help replace the human in his daily activity This pressure requires the use of logic as the underlying foundational workhorse of the area New logics were developed as the need arose and new foci and balance has evolved within logic itself One aspect of these new trends in logic is the rising importance of model based reasoning Logics have become more and more tailored to applications and their reasoning has become more and more application dependent In fact some years ago I myself coined the phrase direct deductive reasoning in application areas advocating the methodology of model based reasoning in the strongest possible terms Certainly my discipline of Labelled Deductive Systems allows to bring pieces of the application areas as labels into the logic I therefore heartily welcome this important book to Volume 25 of the Applied Logic Series and see it as an important contribution in our overall coverage of applied logic
