Aquaculture has gained a momentum throughout the world during recent decades which is unparalleled in other branches of food production. This book describes methods currently used for the production of those warm water table fish which are of major importance. Included are experiments and procedures which will help to combat the growing food problem through new production methods for animal protein. The aim of the work presented here is to promote the continuous production of warm water table fish independently of climate or environment within the least necessary space and even in regions with unsuitable weather or topography.

**Recurrent Pregnancy Loss** Howard J. A. Carp, 2014-12-10. Recurrent pregnancy loss presents a vexing clinical problem primarily for medical professionals treating patients in reproductive medicine and in maternal fetal medicine. However, with its numerous causes and various suggested treatment options, the problem is more multidisciplinary in nature, involving gynecology, genetics, endocrinology, immunology, pediatrics, and internal medicine. Exploring basic science and clinical applications, the second edition of the bestselling text *Recurrent Pregnancy Loss: Causes, Controversies, and Treatment* provides an authoritative and comprehensive update on advances in the understanding and management of this troubling phenomenon. The book covers basic scientific topics such as genetics and cytokines and profiles major advances in immunology, endocrinology, and thrombotic mechanism. It discusses the methodology of clinical research and the application of evidence-based medicine to clinical practice. It also reviews various late obstetric complications along with issues caused by extreme prematurity and possible resulting handicaps. This second edition presents new material on the latest controversies featuring opinions from both sides of ongoing debates. It includes new chapters on autoimmunity, third party reproduction, the use of immunostimulants such as CSF, and Chinese medicine. Designed for specialists working in reproductive medicine clinics and those involved with maternal fetal care, the book is also ideal for generalists and gynaecologists seeking a comprehensive view of developments in the field.
