challenges what he calls the hard edged boundaries of meaning by going beyond the customary limits of the genre in which he is writing By radically reworking the essay form Delany can explore and express the many layers of his thinking about the nature of art the workings of language and the injustices and ironies of social political and sexual marginalization Thus Delany connects in sometimes unexpected ways topics as diverse as the origins of modern theater the context of lesbian and gay scholarship the theories of cyborgs how metaphors mean and the narrative structures in the Star Wars trilogy Over the course of his career Kenneth James writes in his extensive introduction Delany has again and again thrown into question the world models that all too many of us unknowingly live by Indeed Delany challenges an impressive list of world models here including High and Low Art sanity and madness mathematical logic and the mechanics of mythmaking the distribution of wealth in our society and the limitations of our sexual vocabulary Also included are two essays that illustrate Delany's unique chrestomathic technique the grouping of textual fragments whose associative interrelationships a reader must actively trace to read them as a resonant argument Whether writing about Wagner or Hart Crane Foucault or Robert Mapplethorpe Delany combines a fierce and often piercing vision with a powerful honesty that beckons us to share in the perspective of these Longer Views An intellectually adventurous book Every page of every essay here rewards a second reading and a third Delany has a fearsomely stocked intellect and a wider range of experience than most writers can even imagine He is brilliant driven prolific The Nation One of science fiction's grand masters Delany's elegant command of language and deep insight into other authors' works are delightful to behold Booklist Rare personal frankness and stunning erudition Recommended for readers who enjoy the challenge of being led into remote regions of a gifted mind Library Journal **Solar Labyrinth** Robert Borski, 2004-05-20 Gene Wolfe's BOOK OF THE NEW SUN has been hailed by both critics and readers as quite possibly the best science fiction novel ever written And yet at the same time like another masterpiece of fiction James Joyce's Ulysses it's been deemed endlessly complex and filled with impenetrable mysteries Now however in the first book length investigation of Wolfe's literary puzzlebox Robert Borski takes you inside the twisting corridors of the tetralogy and along the way reveals his solutions to many of the novel's conundrums and riddles such as who really is Severian's lost twin sister almost certainly not who you think and why he believes the novel's main character may not even be the torturer Severian Furthermore and in essay after essay Borski demonstrates how a single master key will unlock many of the book's secret relationships all in the attempt to guide you through the labyrinth that is Gene Wolfe's BOOK OF THE NEW SUN **The Cambridge Companion to Postmodern American Fiction** Paula Geyh, 2017-04-24 Few previous periods in the history of American literature could rival the richness of the postmodern era the diversity of its authors the complexity of its ideas and visions and the multiplicity of its subjects and forms This volume offers an authoritative comprehensive and accessible guide to the American fiction of this remarkable period It traces the development of postmodern American fiction over the past half century and explores its key aesthetic cultural and political contexts It examines its principal styles and genres from the early
