Fifty More Years Below Zero Tributes And Meditations For The Naval Arctic Research Laboratorys:

Fifty More Years Below Zero David W. Norton, 2001 World War II cooperation among the circumpolar Allies helped launched the Naval Arctic Research Laboratory at Barrow Alaska There scientists developed the interdisciplinary research and knowledge and the crucial foundation of cooperation between the Inupiat peoples and scientists that would prove essential to the world of arctic science This book ties together the major events in the history of the lab demonstrating not only the important scientific developments that occurred there but also the colorful and often hilarious accounts of scientific adventure and Barrow lore that are part of life at the lab *The Challenges of Long Term Ecological Research: A Historical Analysis* Robert B. Waide, Sharon E. Kingsland, 2021-04-07 This volume explores the challenges of sustaining long term ecological research through a historical analysis of the Long Term Ecological Research Program created by the U S National Science Foundation in 1980 The book examines reasons for the creation of the Program an overview of its 40 year history and in depth historical analysis of selected sites Themes explored include the broader impact of this program on society including its relevance to environmental policy and understanding global climate change the challenge of extending ecosystem ecology into urban environments and links to creative arts and humanities projects A major theme is the evolution of a new type of network science involving comparative studies innovation in information management creation of socio ecological frameworks development of governance structures and formation of an International Long Term Ecological Research Network with worldwide reach The book s themes will interest historians philosophers and social scientists interested in ecological and environmental sciences as well as researchers across many disciplines who are involved in long term ecological research *The Whale and the Supercomputer* Charles Wohlforth, 2005-05-04 In *The Whale and the Supercomputer* scientists and natives wrestle with our changing climate in the land where it has hit first and hardest A traditional Eskimo whale hunting party races to shore near Barrow Alaska their comrades trapped on a floe drifting out to sea as ice that should be solid this time of year gives way Elsewhere a team of scientists transverses the tundra sleeping in tents surviving on frozen chocolate and measuring the snow every ten kilometers in a quest to understand the effects of albedo the snow s reflective ability to cool the earth beneath it Climate change isn t an abstraction in the far North It is a reality that has already dramatically altered daily life especially that of the native peoples who still live largely off the land and sea Because nature shows her footprints so plainly here the region is also a lure for scientists intent on comprehending the complexities of climate change In this gripping account Charles Wohlforth follows the two groups as they navigate a radically shifting landscape The scientists attempt to decipher its smallest elements and to derive from them a set of abstract laws and models The natives draw on uncannily accurate traditional knowledge borne of long experience living close to the land Even as they see the same things a Native elder watches weather coming through too fast to predict a climatologist notes an increased frequency of cyclonic systems the two cultures struggle to reconcile their vastly different ways of

comprehending the environment With grace clarity and a sense of adventure Wohlforth a lifelong Alaskan illuminates both ways of seeing a world in flux and in the process helps us to navigate a way forward as climate change reaches us all

Scientific Value of Arctic Sea Ice Imagery Derived Products National Research Council, Division on Earth and Life Studies, Polar Research Board, Committee on Climate, Energy, and National Security, Committee on the Scientific Value of Arctic Sea Ice Imagery Derived Products, 2009-06-30 During the 1990s a government program brought together environmental scientists and members of the intelligence community to consider how classified assets and data could be applied to further the understanding of environmental change As part of the Medea program collection of overhead classified imagery of sea ice at four sites around the Arctic basin was initiated in 1999 and two additional sites were added in 2005 Collection of images during the summer months at these six locations has continued until the present day Several hundred unclassified images with a nominal resolution of 1 meter have been derived from the classified images collected at the 6 Arctic sites To assist in the process of making the unclassified derived imagery more widely useful the National Research Council reviewed the derived images and considered their potential uses for scientific research In this book we explore the importance of sea ice in the Arctic and illustrate the types of information often unique in its detail that the derived images could contribute to the scientific discussion

Resources and Sustainable Development in the Arctic Chris Southcott, Frances Abele, David Natcher, Brenda Parlee, 2018-10-04 Over the past thirty years we have witnessed a demand for resources such as minerals oil and gas which is only set to increase This book examines the relationship between Arctic communities and extractive resource development With insights from leading thinkers in the field the book examines this relationship to better understand what if anything can be done in order for the development of non renewable resources to be of benefit to the long term sustainability of these communities The contributions synthesize circumpolar research on the topic of resource extraction in the Arctic and highlight areas that need further investigation such as the ability of northern communities to properly use current regulatory processes fiscal arrangements and benefit agreements to ensure the long term sustainability of their culture communities and to avoid a new path dependency This book provides an insightful summary of issues surrounding resource extraction in the Arctic and will be essential reading for anyone interested in environmental impact assessments globalization and Indigenous communities and the future of the Arctic region

Diplomacy on Ice James Gustave Speth, 2015-01-01 As the race for resources in distant parts of the planet gathers momentum most discussion has centered on the potential for conflict environmental destruction and upheaval from climate change This important book shifts the conversation about the Arctic and Antarctic from conflict to cooperation A multidisciplinary roster of experts provides fresh views of the polar regions focusing on diplomacy and the potential for cooperative international decision making Collectively the contributors illustrate the breadth of issues that complicate governance in the Arctic and Antarctic as well as parallels and differences between the politics of the two poles

One Health Morten Tryland, 2022-04-23 This multidisciplinary book discusses the manifold challenges arctic marine and terrestrial wildlife ecosystems and people face these times Major health threats caused by the consequences of climate change environmental pollution and increasing tourism in northern regions around the globe are explored The most common infectious diseases in wild and domesticated arctic animals are reviewed and the impact they could have on circumpolar ecosystems as well as on the lives of arctic people are profoundly discussed Moreover the book reviews arctic hunting herding and food conservation strategies and introduces veterinary medicine in remote indigenous communities Arctic One Health is authored by experts based in arctic regions spanning from North America over Europe to Asia to cover a broad range of topics and perspectives The book addresses researchers in Veterinary Medicine Ecology Microbiology and Anthropology The book contributes towards achieving the UN Sustainable Developmental Goals in particular SDG 15 Life on Land

Whales, They Give Themselves Karen Brewster, 2025-02-03 The Whales They Give Themselves is an intimate life history of Harry Brower Sr 1924 1992 an Inupiaq whaling captain artisan and community leader from Barrow Alaska In a life that spanned the profound cultural and economic changes of the twentieth century Brower s vast knowledge of the natural world made him an essential contributor to the Native and scientific communities of the North His desire to share his insights with future generations resulted in a series of conversations with friend and oral historian Karen Brewster who weaves Harry s stories with cultural and historical background into this innovative and collaborative oral biography Brower was deeply committed to Native culture and his life history is a moving expression of the Inupiaq way of life He was also influential in traditionally non Native arenas in which Native and non Native values sometimes collided Acting as a mediator between Inupiaq whalers and non Native scientists Brower communicated a vast understanding of bowhead whales and whaling that became the basis for a scientific research program and helped protect Inupiaq subsistence whaling He was a central architect of the Arctic Slope Regional Corporation boundaries and served for over twenty years as a consultant to scientists at the Naval Arctic Research Laboratory Brower s role in this collaborative research serves as one of the earliest and best examples of how scientists and Native experts can work together to advance knowledge Such approaches are now promoted by researchers around the world The Whales They Give Themselves not only conveys Brower s life story but also is a cross cultural journey of wisdom and friendship Whereas academic oral historians once strove to erase the presence of the interviewer in the name of objectivity Brewster recognizes the influence her specific relationship with Brower had on the way he narrated his life This volume is a major contribution to our understanding of northern peoples and a testament to the immense value of collaborative oral history

The Legacy of Project Chariot William Hedman, Charles Deters, 2007

LASHIPA Louwrens Hacquebord, 2012 This book contains most of the papers presented at the final LASHIPA workshop in St Petersburg Russia 2 4 November 2009 The workshop was organized to finalize the bilateral LASHIPA Russia Netherlands project and to discuss possible future cooperation between the participants of the sub project of the Eurocore

Boreas project and the participants of the International Polar Year project Large Scale Historical Exploitation of Polar Areas LASHIPA LASHIPA and CEE Boreas are linked together by different fields of expertise The common grounds of the two projects are the relation between industrial resource development and science in an international perspective Knowledge production and knowledge transfer from science to industry as well as between different national communities of resource users are very important in the Arctic as is transfer of legitimacy All these fields might give opportunities for future research The different contributions in this book try to answer some of these questions **Alaska Dinosaurs** Anthony R.

Fiorillo,2018-01-02 Anthony Fiorillo has been exploring the Arctic since 1998 For him like many others the Arctic holds the romance of uncharted territory extreme conditions and the inevitable epic challenges that arise For Fiorillo however the Arctic also holds the secrets of the history of life on Earth and its fossils bring him back field season after field season in pursuit of improving human understanding of ancient history His studies of the rocks and fossils of the Arctic shed light on a world that once was and provide insight into what might be *International Relations and the Arctic: Understanding Policy and Governance* Robert W. Murray,Anita Dey Nuttall,2014-06-26

Increased global interest in the Arctic poses challenges to contemporary international relations and many questions surround exactly why and how Arctic countries are asserting their influence and claims over their northern reaches and why and how non Arctic states are turning their attention to the region Despite the inescapable reality in the growth of interest in the Arctic relatively little analysis on the international relations aspects of such interest has been done Traditionally international relations studies are focused on particular aspects of Arctic relations but to date there has been no comprehensive effort to explain the region as a whole Literature on Arctic politics is mostly dedicated to issues such as development the environment and climate change or indigenous populations International relations traditionally interested in national and international security has been mostly silent in its engagement with Arctic politics Essential concepts such as security sovereignty institutions and norms are all key aspects of what is transpiring in the Arctic and deserve to be explained in order to better comprehend exactly why the Arctic is of such interest The sheer number of states and organizations currently involved in Arctic international relations make the region a prime case study for scholars policymakers and interested observers In this first systematic study of Arctic international relations Robert W Murray and Anita Dey Nuttall have brought together a group of the world s leading experts in Arctic affairs to demonstrate the multifaceted and essential nature of circumpolar politics This book is core reading for political scientists historians anthropologists geographers and any other observer interested in the politics of the Arctic region **Resilience Through**

Knowledge Co-Production Marie Rou  ,Douglas Nakashima,Igor Krupnik,2022-06-30 Collaborative exploration of global environmental crises focusing on the co production of knowledge from scientific indigenous sources *Treatise on Geomorphology*,2013-02-27 The changing focus and approach of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer reviewed papers published in geomorphic journals has grown

steadily for more than two decades and more importantly the diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil engineering computer science geographic information science and others has expanded dramatically As more good minds are drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide an important reference for users from undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the historical development of diverse topics within geomorphology provides context for ongoing research discussion of research strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to understanding Earth s surfaces and summaries of outstanding research questions highlight future challenges and suggest productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges upon how well landform scientists comprehend the dynamics of Earth s diverse surfaces This Treatise on Geomorphology provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of understanding Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the geomorphology research community and having won numerous awards in the field A host of noted international geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned

Whale Snow Chie Sakakibara, 2020-10-06 As a mythical creature the whale has been responsible for many transformations in the world It is an enchanting being that humans have long felt a connection to In the contemporary environmental imagination whales are charismatic megafauna feeding our environmentalism and aspirations for a better and more sustainable future Using multispecies ethnography *Whale Snow* explores how everyday the relatedness of the I upiat of Arctic Alaska and the bowhead whale forms and transforms the human through their encounters with modernity *Whale Snow* shows how the people live in the world that intersects with other beings how these connections

came into being and most importantly how such intimate and intense relations help humans survive the social challenges incurred by climate change In this time of ecological transition exploring multispecies relatedness is crucial as it keeps social capacities to adapt relational elastic and resilient In the Arctic climate culture and human resilience are connected through bowhead whaling In *Whale Snow* we see how climate change disrupts this ancient practice and in the process affects a vital expression of Indigenous sovereignty Ultimately though this book offers a story of hope grounded in multispecies resilience

Natural Processes and Human Impacts Sergey M. Govorushko, 2011-10-13 This highly topical book comes at a time when the two way relationship between humankind and the environment is moving inexorably to the top of the agenda It covers both sides of this delicate balancing act explaining how various natural processes influence humanity including its economic activities and engineering structures while also illuminating the ways in which human activity puts pressure on the natural environment Chapters analyze a varied selection of phenomena that directly affect people's lives from geological processes such as earthquakes and tsunamis to cosmic events such as magnetic storms The author moves on to consider the effect we have on nature ranging from the impact of heavy industry to the environmental consequences of sport and recreational pastimes Complete with maps photographs and detailed case studies this book provides a comprehensive overview of the biggest issue we face as a species the way we relate to the natural world around us This book includes more than 100 maps showing the global distribution of different natural processes human activities and more than 450 photographs from many countries and all oceans It will provide a valuable resource for both graduate students and researchers in many fields of knowledge Sergey Govorushko is a chief research scholar at the Pacific Geographical Institute Russian Academy of Sciences He is also Professor at the Far Eastern Federal University Vladivostok Sergey Govorushko received his PhD from the Institute of Geography Russian Academy of Sciences His research activities focus on the interaction between humanity and the environment including the impact of nature on humanity the impact of humanity on the environment and assessment of the interaction environmental impact assessment environmental audit etc He has authored eight and co authored seven monographs
