## **Fifty Years Of Events An Annotated Bibliography 1947 To 1997:**

**50 Years of Events** Roberto Casati, Achille C. Varzi, 1997      **Speaking of Events** James Higginbotham, Fabio Pianesi, Achille C. Varzi, 2000-04-13 In recent years the idea that an adequate semantics of ordinary language calls for some theory of events has sparked considerable debate among linguists and philosophers *Speaking of Events* offers a vivid and up to date indication of this debate with emphasis precisely on the interplay between linguistic applications and philosophical implications Each chapter has been written expressly for this volume by leading authors in the field including Nicholas Asher Pier Marco Bertinetto Johannes Brandl Denis Delfitto Regine Eckardt James Higginbotham Alessandro Lenci Terence Parsons Alice ter Meulen and Henk Verkuyl      **Metadata and Semantics Research** Juan Manuel Dodero, Manuel Palomo-Duarte, Pythagoras Karampiperis, 2012-11-07 This book constitutes the refereed proceedings of the 6th Metadata and Semantics Research Conference MTSR 2012 held in C diz Spain in November 2012 The 33 revised papers presented were carefully reviewed and selected from 85 submissions The papers are organized in a general main track and several others a track on metadata and semantics for open access repositories research information systems and infrastructures a second on metadata and semantics for cultural collections and applications and finally one on metadata and semantics for agriculture food and environment      **Advanced Information Systems Engineering Workshops** Marko Bajec, Johann Eder, 2012-07-04 This book constitutes the thoroughly refereed proceedings of eight international workshops held in Gda sk Poland in conjunction with the 24th International Conference on Advanced Information Systems Engineering CAiSE 2012 in June 2012 The 35 full and 17 short revised papers were carefully selected from 104 submissions The eight workshops were Agility of Enterprise Systems AgilES Business IT Alignment and Interoperability BUSITAL Enterprise and Organizational Modeling and Simulation EOMAS Governance Risk and Compliance GRCIS Human Centric Process Aware Information Systems HC PAIS System and Software Architectures IWSSA Ontology Models Conceptualization and Epistemology in Social Artificial and Natural Systems ONTOSE and Information Systems Security Engineering WISSE      **Donald Davidson** Kathrin Glüer, 2011-12-22 In this book Kathrin Glüer carefully outlines Donald Davidson s principal claims and arguments and discusses them in some detail providing a concise systematic introduction to all the main elements of Davidson s philosophy      **Aqedah** Jean-Pierre Fortin, Heiko Schulz, 2025-01-27 The Aqedah i e the story of the binding of Isaac by Abraham is a core text in all three Abrahamic religions and has been widely discussed in Judaism Christianity and Islam for centuries It still represents an intellectual moral and spiritual challenge for anyone who claims to be able to link morality and faith in God in a reasonably comprehensible way The contributions in this anthology address this challenge from philosophical theological and literary perspectives by considering exemplary problems epochs and authors pertaining to all three Abrahamic religions The first part contains seven contributions exploring the epistemic and or philosophical dimensions of the Aqedah The second part contains nine essays on the history of the interpretation of the Aqedah from Israelite Jewish Christian and Islamic

perspectives The three texts in the third and final part discuss narratological issues and reflections of the problem within modern Hebrew literature The volume complements and expands the existing scholarship on the subject above all through its consistently interreligious approach and the inclusion of current philosophical and literary sources and debates Spatial and Temporal Reasoning O. Stock, 2007-07-27 Qualitative reasoning about space and time a reasoning at the human level promises to become a fundamental aspect of future systems that will accompany us in daily activity The aim of Spatial and Temporal Reasoning is to give a picture of current research in this area focusing on both representational and computational issues The picture emphasizes some major lines of development in this multifaceted constantly growing area The material in the book also shows some common ground and a novel combination of spatial and temporal aspects of qualitative reasoning Part I presents the overall scene The chapter by Laure Vieu is on the state of the art in spatial representation and reasoning and that by Alfonso Gerevini gives a similar survey on research in temporal reasoning The specific contributions to these areas are then grouped in the two main parts In Part II Roberto Casati and Achille Varzi examine the ontological status of spatial entities Anthony Cohn Brandon Bennett John Gooday and Nicholas Gotts present a detailed theory of reasoning with qualitative relations about regions Andrew Frank discusses the spatial needs of geographical information systems and Annette Herskovits focuses on the linguistic expression of spatial relations In Part III James Allen and George Ferguson describe an interval temporal logic for the representation of actions and events Drew McDermott presents an efficient way of predicting the outcome of plan execution and Erik Sandewall introduces a semantics based on transitions for assessing theories of action and change In Part IV Antony Galton's chapter stands clearly between the two areas of space and time and outlines the main coordinates of an integrated approach Against the Grain Bradley B. Walters, 2008 To rise to the increasingly urgent challenge of understanding the relationship between human beings and the environment scholars need to step back and re evaluate their basic premises about how current explanations should shape the form and content of their research Against the Grain addresses a variety of topics in the field of human ecology including ecological anthropology evolutionary psychology environmental history and geography and challenges scholars to re think the adequacy of their methods and assumptions Andrew P Vayda concludes the volume with a critical commentary on these issues and more widely on the subject of explanation The result is an extremely useful and provocative prZcis for thinking about re evaluating and rectifying scholarly research *Parts and Places* Roberto Casati, Achille C. Varzi, 1999 Thinking about space is thinking about spatial things The table is on the carpet hence the carpet is under the table The vase is in the box hence the box is not in the vase But what does it mean for an object to be somewhere How are objects tied to the space they occupy In this book Roberto Casati and Achille C Varzi address some of the fundamental issues in the philosophy of spatial representation Their starting point is an analysis of the interplay between mereology the study of part whole relations topology the study of spatial continuity and compactness and the theory of spatial location proper This leads to a unified framework for spatial

representation understood quite broadly as a theory of the representation of spatial entities The framework is then tested against some classical metaphysical questions such as Are parts essential to their whole Is spatial co location a sufficient criterion of identity What if anything distinguishes material objects from events and other spatial entities The concluding chapters deal with applications to topics as diverse as the logical analysis of movement and the semantics of maps The Experience of God Robyn Horner,2022-10-20 Belief and credal commitment sometimes seem to make less and less sense in the West A kind of cultural amnesia has taken hold where formal religious adherence begins to seem almost unthinkable This is especially so for the idea of divine revelation Robyn Horner argues this means we need to re evaluate how theology proceeds focusing not so much on beliefs but on experience Exploring ways in which the experiential might open human beings up to divine possibility the author turns to phenomenology especially in the French philosophical tradition because it seeks to examine unrestrictedly what is given through involved encounter Bringing phenomenology and poststructuralism together Horner develops the idea of revelation as an event wherein God interrupts and exceeds human experience affecting and transforming it This striking concept named but largely unexplored by theology articulates a notion of supernatural revelation which now starts to appear both coherent and plausible Time and cross-temporal relations Giuliano Torrenco,2015-03-11T00:00:00+01:00 According to both ordinary and scientific thought two objects can enter into relation not only simultaneously but also at different times namely cross temporally For instance we understand comparisons between entities as they are at different times such as when we say that John is now taller than Michael was three years ago causally related events are often not simultaneous and objects of perceptions and perceivers usually have different temporal locations we see ordinary things as they were a few milliseconds ago we see the sun as it was eight minutes ago and so on However many philosophers consider cross temporality deceptive Relations according to the standard view can hold only between things existing in the same time In this book Torrenco defends the opposite view according to which relations can be cross temporally instantiated and thus cross temporal talk must be taken seriously The theory is based on the idea that persisting in time is tantamount to possessing temporal parts at different times and its central tenet is that persisting entities objects and events alike are cross temporally related by having distinct temporal parts entering into relations **Explaining Human Actions and Environmental Changes** Andrew P. Vayda,2009-05-15 In this selection of essays from the past two decades Vayda focuses on research and explanation concerned with causes of concrete events especially human actions and the environmental changes brought about by them **A Hospice in Change** Martin Lipscomb,2013-10-15 A Hospice in Change Applied Social Realist Theory reports upon a study into aspects of the ways in which structural and organisational developments professional cultures and bedside or patient focused clinical practice interact within a single UK institution While the findings of this study are time and context specific the events and social processes being described may nonetheless resonate closely with the experience of healthcare practitioners at other hospices both within and without the

UK The work examines themes and ideas that hospice and palliative care practitioners as well as those involved or interested more broadly in end of life issues may find relevant It is argued that differential morphogenesis can be identified between structures social and cultural and agents individual and group at an independent healthcare charity in southern England A Hospice in Change connects theory and philosophy with concrete research practice to provide a worked example of Margaret Archer's realist social theory

**Philosophy** Hans E. Bynagle, 2006-05-30 A newly reorganized up to date overview of key reference works in philosophy reflects a veritable explosion of reference sources both print and online published over the past decade Nearly 300 of the 700 entries consist of new material with an additional 50 entries substantially revised and updated English language sources are emphasized but important non English works are also well represented For professional philosophers philosophy educators students from beginning to graduate and librarians This guide represents a substantial updating and complete re organization of the author's 1997 Philosophy A Guide to the Reference Literature 2nd edition 1st edition 1986 It reflects a veritable explosion of reference sources both print and online in the field of philosophy over the past decade Nearly 300 entries or 40 percent are entirely new An additional 50 or so entries have substantial revisions recording new editions changes in serial publications series and websites or additional volumes completed in multi volume sets In addition it has been entirely re organized along topical lines Each of its twenty three chapters is divided into four sections 1 general sources 2 history of philosophy 3 branches of philosophy and 4 miscellanea This new arrangement accords better with the greatly expanded range of philosophy reference sources and makes it easier for the user to identify related sources of different types bibliographies dictionaries web gateways etc on the same topic Like its predecessor Guide to Reference Sources in Philosophy the 3rd edition aims to serve a diverse audience of professional philosophers philosophy educators students from beginning to graduate and librarians All entries include generous annotations that are often evaluative as well as descriptive English language sources are emphasized but non English works important to researchers or of interest to users with facility in other languages are also well represented

ARBA In-depth Martin Dillon, Shannon Graff Hysell, 2004-02-28 Unabridged reviews of reference books CD ROMs and Websites selected from the American Reference Books Annual from 1997 to 2003

Postanalytic and Metacontinental Jack Reynolds, James Chase, Ed Mares, James Williams, 2010-04-01 Analytic and Continental philosophy have become increasingly specialised and differentiated fields of endeavour This important collection of essays details some of the more significant methodological and philosophical differences that have separated the two traditions as well as examining the manner in which received understandings of the divide are being challenged by certain thinkers whose work might best be described as post analytic and meta continental Together these essays offer a well defined sense of the field of its once dominant distinctions and of some of the most productive new areas generating influential ideas and controversy In an attempt to get to the bottom of precisely what it is that separates the analytic and continental traditions the essays in this volume compare and contrast

them on certain issues including truth time and subjectivity The book engages with a range of key thinkers from phenomenology post structuralism analytic philosophy and post analytic philosophy examines the strengths and weaknesses of each tradition and ultimately encourages enhanced understanding dialogue and even rapprochement between these sometimes antagonistic adversaries      **The Truth Within** Gavin Flood,2013-10-25 The idea that there is a truth within the person linked to the discovery of a deeper more fundamental more authentic self has been a common theme in many religions throughout history and an idea that is still with us today This inwardness or interiority unique to me as an essential feature of who I am has been an aspect of culture and even a defining characteristic of human being an authentic private sphere to which we can retreat that is beyond the conflicts of the outer world This inner world becomes more real than the outer which is seen as but a pale reflection Remarkably the image of the truth within is found across cultures and this book presents an account of this idea in the pre modern history of Christianity Hinduism and Buddhism Furthermore in theistic religions Christianity and some forms of Hinduism the truth within is conflated with the idea of God within and in all cases this inner truth is thought to be not only the heart of the person but also the heart of the universe itself Gavin Flood examines the metaphor of inwardness and the idea of truth within along with the methods developed in religions to attain it such as prayer and meditation These views of inwardness that link the self to cosmology can be contrasted with a modern understanding of the person In examining the truth within in Christianity Hinduism and Buddhism Flood offers a hermeneutical phenomenology of inwardness and a defence of comparative religion      *A Companion to Metaphysics* Jaegwon Kim,Ernest Sosa,Gary S.
