

Sees More HS Needs in 5 Yrs. For Lynbrook

Lynbrook High School's new \$1.5 million addition, which will house 1,200 students, is expected to be completed by 1985, according to a study by the school district's board of education. The study, which was conducted by a committee of parents, teachers and administrators, found that the current facilities are inadequate for the school's needs in five years. The new addition will include a new gymnasium, a new cafeteria, and a new library. The school district's board of education is expected to approve the plan in the next few months.

Barbie Zelizer

Fifty Years Of The New York Daily News In Pictures:

Fifty Years the New York Daily News in Pictures Worth Gatewood, 1979-01-01 About to Die Barbie Zelizer, 2010-12-01 Due to its ability to freeze a moment in time the photo is a uniquely powerful device for ordering and understanding the world But when an image depicts complex ambiguous or controversial events terrorist attacks wars political assassinations its ability to influence perception can prove deeply unsettling Are we really seeing the world as it is or is the image a fabrication or projection How do a photo s content and form shape a viewer s impressions What do such images contribute to historical memory About to Die focuses on one emotionally charged category of news photograph depictions of individuals who are facing imminent death as a prism for addressing such vital questions Tracking events as wide ranging as the 1906 San Francisco Earthquake the Holocaust the Vietnam War and 9 11 Barbie Zelizer demonstrates that modes of journalistic depiction and the power of the image are immense cultural forces that are still far from understood Through a survey of a century of photojournalism including close analysis of over sixty photos About to Die provides a framework and vocabulary for understanding the news imagery that so profoundly shapes our view of the world

Everything Was Better in America David Welky, 2010-10-01 As a counterpart to research on the 1930s that has focused on liberal and radical writers calling for social revolution David Welky offers this eloquent study of how mainstream print culture shaped and disseminated a message affirming conservative middle class values and assuring its readers that holding to these values would get them through hard times Through analysis of the era s most popular newspaper stories magazines and books Welky examines how voices both outside and within the media debated the purposes of literature and the meaning of cultural literacy in a mass democracy He presents lively discussions of such topics as the newspaper treatment of the Lindbergh kidnapping issues of race in coverage of the 1936 Olympic games domestic dynamics and gender politics in cartoons and magazines Superman s evolution from a radical outsider to a spokesman for the people and the popular consumption of such novels as the Ellery Queen mysteries Gone with the Wind and The Good Earth Through these close readings Welky uncovers the subtle relationship between the messages that mainstream media strategically crafted and those that their target audience wished to hear **NLRB, the First 50 Years** , 1986 The Art of the Funnies Robert C. Harvey, 1994 The comic strip was created by rival newspapers of the Hearst and the Pulitzer organizations as a device for increasing circulation In the United States it quickly became an institution that soon spread worldwide as a favorite form of popular culture What made the comic strip so enduring This fascinating study by one of the few comics critics to develop sound critical principles by which to evaluate the comics as works of art and literature unfolds the history of the funnies and reveals the subtle art of how the comic strip blends words and pictures to make its impact Together these create meaning that neither conveys by itself The Art of The Funnies offers a critical vocabulary for the appreciation of the newspaper comic strip as an art form and shows that full awareness of the artistry comes from considering both the verbal and the visual

elements of the medium The techniques of creating a comic strip breaking down the narrative composition of the panel planning the layout have remained constant since comic strips were originated Since 1900 with Winsor McCay's Little Nemo in Slumberland key cartoonists have relied on the union of words and pictures to give the funnies their continuing appeal This art has persisted in such milestone achievements as Bud Fisher's Mutt and Jeff George McManus's Bringing Up Father Sidney Smith's The Gumps Roy Crane's Wash Tubbs and Captain Easy Harold Gray's Little Orphan Annie Chester Gould's Dick Tracy Zack Mosley's Smilin' Jack Harold Foster's Tarzan Alex Raymond's Secret Agent X-9 Jungle Jim and Flash Gordon Milton Caniff's Terry and the Pirates E. C. Segar's Popeye George Herriman's Krazy Kat and Walt Kelly's Pogo In more recent times with Mort Walker's Beetle Bailey Charles Schulz's Peanuts Johnny Hart's B. C. T. K. Ryan's Tumbleweeds Garry Trudeau's Doonesbury and Bill Watterson's Calvin and Hobbes the artform has evolved with new developments yet the aesthetics of the funnies remain basic The Art of The Funnies unearths new information and weighs the influence of syndication upon the medium Though the funnies go in ever new directions perceiving the interdependency of words and pictures as this book shows remains the key to understanding the art

The 'Daily news' jubilee, by J. McCarthy and sir J.R. Robinson Justin McCarthy, 1896

Journalism's Roving Eye John Maxwell Hamilton, 2011-08-15 In all of journalism nowhere are the stakes higher than in foreign news gathering For media owners it is the most difficult type of reporting to finance for editors the hardest to oversee Correspondents roaming large swaths of the planet must acquire expertise that home based reporters take for

granted facility with the local language for instance or an understanding of local cultures Adding further to the challenges they must put news of the world in context for an audience with little experience and often limited interest in foreign affairs a task made all the more daunting because of the consequence to national security In *Journalism's Roving Eye* John Maxwell Hamilton a historian and former foreign correspondent provides a sweeping and definitive history of American foreign news reporting from its inception to the present day and chronicles the economic and technological advances that have influenced overseas coverage as well as the cavalcade of colorful personalities who shaped readers perceptions of the world across two centuries From the colonial era when newspaper printers hustled down to wharfs to collect mail and periodicals from incoming ships to the ongoing multimedia press coverage of the Iraq War Hamilton explores journalism's constant and not always successful efforts at dishing the foreign news as James Gordon Bennett put it in the mid nineteenth century to describe his approach in the *New York Herald* He details the highly partisan coverage of the French Revolution the early emergence of special correspondents and the challenges of organizing their efforts the profound impact of the non yellow press in the run up to the Spanish American War the increasingly sophisticated machinery of propaganda and censorship that surfaced during World War I and the golden age of foreign correspondence during the interwar period when outlets for foreign news swelled and a large number of experienced independent journalists circled the globe From the Nazis intimidation of reporters to the ways in which American popular opinion shaped coverage of Communist revolution and the Vietnam War Hamilton covers every aspect of delivering foreign news to American doorsteps Along the way Hamilton singles out a fascinating cast of characters among them Victor Lawson the overlooked proprietor of the *Chicago Daily News* who pioneered the concept of a foreign news service geared to American interests Henry Morton Stanley one of the first reporters to generate news on his own with his 1871 expedition to East Africa to find Livingstone and Jack Belden a forgotten brooding figure who exemplified the best in combat reporting Hamilton details the experiences of correspondents editors owners publishers and network executives as well as the political leaders who made the news and the technicians who invented ways to transmit it Their stories bring the narrative to life in arresting detail and make this an indispensable book for anyone wanting to understand the evolution of foreign news gathering Amid the steep drop in the number of correspondents stationed abroad and the recent decline of the newspaper industry many fear that foreign reporting will soon no longer exist But as Hamilton shows in this magisterial work traditional correspondence survives alongside a new type of reporting *Journalism's Roving Eye* offers a keen understanding of the vicissitudes in foreign news an understanding imperative to better seeing what lies ahead
