Geriatric Nephrology Dimitrios G. Oreopoulos,2012-12-06 The year was 1943 As a third year medical student at Stanford I was about to witness the beginning of a medical miracle Dr Arthur Bloomfield Professor of Medicine had selected my patient a middle aged man who was dying of acute pneumococcal pneumonia as one of the first patients to receive miniscule doses by today s standards of his meagre supply of a new drug penicillin The patient s response amazed everyone especially this impressionable medical student The rest of the story is history With one stroke the introduction of

penicillin removed from the medical scene the friend of the aged lobar pneumonia The consequences which no one could have imagined at the time are still becoming manifest as other miracles such as respirators artificial kidneys and many potent new antibiotics have come upon the scene All of us are aware that these miracles have created a variety of new challenges around the states of dying and near dying We have no easy answers for these problems Nevertheless as dialysis techniques especially CAPD are applied more widely to the treatment of the elderly the task of helping the patient meet death with dignity becomes increasingly important and vexing because once begun dialysis is difficult to terminate
