coped with both exhilarating successes and sometimes tragic failures      **Sketches from a Pilot's Life** Curtis C. Truwer, 2003 Ten various real life experiences selected from 55 years of aviation life      **Marines**, 1998      **Sea Harrier Over the Falklands** Commander 'Sharkey' Ward, DSC, AFC, RN, 1993-08-05 Sharkey Ward commanded 801 Naval Air Squadron HMS Invincible during the Falkland War of April to June 1982 and was senior Sea Harrier adviser to the command on the tactics direction and progress of the air war He flew over 60 war missions achieved three air to air kills and took part in or witnessed a total of ten kills he was also the leading night pilot and was decorated with the Distinguished Service Cross for gallantry But what after all could 20 Sea Harriers operating from a flight deck bucketing about in the South Atlantic do against more than 200 Argentine military aircraft flown by pilots who as the raids against the British shipping proved displayed enormous skill and almost suicidal gallantry The world knows the answer now What is puzzling therefore is this book's truthful depiction of the attitudes of some senior non flying naval officers and of the RAF towards the men and indeed the machine that made possible the victory in the Falklands This first hand account charts in detail the naval pilots journey to the South Atlantic and how they took on and triumphantly conquered the challenges they faced It is a dramatic story leavened with accounts of the air to air fighting and of life in a squadron at sea and on a war footing But it is also a tale of inter Service rivalry bureaucratic interference and the less than generous attitudes of a number of senior commanders who should certainly have known better indeed some of them might even have lost the war through a lack of understanding of air warfare The author attempts to put the record straight      Congressional Record United States. Congress, 1996      **Striving for Air Superiority** Craig C. Hannah, 2002 Annotation Tactical bombing Gen Jimmy Doolittle reportedly observed is breaking the milk bottle Strategic bombing is killing the cow Most nations have historically chosen between building tactical and strategic air forces rarely has a state given equal weight to both The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us but in a Cold War world split between continental superpowers strategic bombing took precedence with calamitous consequences In the 1960s the U S Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command TAC had become little more than a handmaiden to the Strategic Air Command SAC TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities Its aircraft were designed to shoot at large lumbering bombers and not to engage in dog fights with highly maneuverable MiGs Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second rate force flying aging aircraft during the early years of the Cold War recovered briefly over Korea then slid into obsolescence during the 1950s His explanation of why America's fighter aircraft did not work in Vietnam is instructive and unsettling Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world He side steps politics and inter service rivalries to focus on the nuts and bolts of tactical air power The result is a factual informative account of how an air force first loses its way then finds its mission again      **The Rise and Fall of the**
