**Fighting for the Farm** Jane Adams, 2013-03-26 In North America industrial agriculture has now virtually displaced diversified family farming The prevailing system depends heavily on labor supplied by migrants and immigrants and its reliance on monoculture raises environmental concerns In this book Jane Adams and contributors anthropologists and political scientists among them analyze the political dynamics that have transformed agriculture in the United States and Canada since the 1920s The contributors demonstrate that people become politically active in arenas that range from the state to public discourse to relations between growers and their contractors or laborers and that politics is a process that is intimately local as well as global The farm financial crisis of the 1980s precipitated rapid consolidation of farms and a sharp decline in rural populations It brought new actors into the political process including organic farmers and environmentalists **Fighting for the Farm Rural America Transformed** considers the politics of farm policy and the consequences of the increasing alignment of agricultural interests with the global economy The first section of the book places North American agriculture in the context of the world system the second a series of case studies examines the foundations of current U S policy subsequent sections deal with the political implications for daily life and the politics of the environment Recognizing the influence of an array of political constituencies and arenas **Fighting for the Farm** charts a decisive shift since the early part of the twentieth century from a discursive regime rooted in economics to one that now incorporates a variety of environmental and quality of life concerns

**Farming for Us All** Michael Mayerfeld Bell, 2024-03-19 Climate change Habitat loss Soil erosion Groundwater depletion Toxins in our food Inhumane treatment of farm animals Increasing farm worker exploitation Hunger and malnutrition in the midst of plenty What will it take for farmers in the United States to embrace sustainable practices Michael Mayerfeld Bell's **Farming for Us All** first tackled this question twenty years ago providing crucial insight into how the structure of US agriculture created this situation and exploring by contrast the practices of farmers who are working together to radically change how they think learn and grow This updated edition of his now classic work reflects on the lessons learned over the past two decades Constrained by an oppressive nexus of markets regulations subsidies and technology farmers find themselves undermining their own economic and social security as well as the security of the land Bell turns to Practical Farmers of Iowa PFI that state's largest sustainable agriculture group He traces how PFI creates an agriculture that engages others farmers researchers officials and consumers in a common conversation about what agriculture could look like Through dialogue PFI members crossbreed knowledge discovering pragmatic solutions to help crops grow in ways that sustain families communities societies economies and environments **Farming for Us All** makes the case that for sustainable farming to flourish new social relations are as important to cultivate as new crops This book is necessary and hopeful reading for anyone concerned about the present and future of food and farming

**Farmers' Markets** , *Agrarian Landscapes in Transition* Charles Redman, David R. Foster, 2008-07-18

Agrarian Landscapes in Transition researches human interaction with the earth. With hundreds of acres of agricultural land going out of production every day, the introduction, spread, and abandonment of agriculture represents the most pervasive alteration of the Earth's environment for several thousand years. What happens when humans impose their spatial and temporal signatures on ecological regimes, and how does this manipulation affect the earth and nature's desire for equilibrium? Studies were conducted at six Long Term Ecological Research sites within the US, including New England, the Appalachian Mountains, Colorado, Michigan, Kansas, and Arizona. While each site has its own unique agricultural history, patterns emerge that help make sense of how our actions have affected the earth and how the earth pushes back. The book addresses how human activities influence the spatial and temporal structures of agrarian landscapes and how this varies over time and across biogeographic regions. It also looks at the ecological and environmental consequences of the resulting structural changes, the human responses to these changes, and how these responses drive further changes in agrarian landscapes. The time frames studied include the ecology of the earth before human interaction, pre-European human interaction, during the rise and fall of agricultural land use, and finally, the biological and cultural response to the abandonment of farming due to complete abandonment or a land use change such as urbanization.

**In Defense of Farmers** Jane Gibson, Sara Alexander, 2019-07-01. Industrial agriculture is generally characterized as either the salvation of a growing hungry global population or as socially and environmentally irresponsible. Despite elements of truth in this polarization, it fails to focus on the particular vulnerabilities and potentials of industrial agriculture. Both representations obscure individual farmers, their families, their communities, and the risks they face from unpredictable local, national, and global conditions: fluctuating and often volatile production costs and crop prices, extreme weather exacerbated by climate change, complicated and changing farm policies, new production technologies and practices, water availability, inflation, and debt, and rural community decline. Yet the future of industrial agriculture depends fundamentally on farmers' decisions. *In Defense of Farmers* illuminates anew the critical role that farmers play in the future of agriculture and examines the social, economic, and environmental vulnerabilities of industrial agriculture as well as its adaptations and evolution. Contextualizing the conversations about agriculture and rural societies within the disciplines of sociology, geography, economics, and anthropology, this volume addresses specific challenges farmers face in four countries: Bolivia, Brazil, Canada, and the United States. By concentrating on countries with the most sophisticated production technologies capable of producing the largest quantities of grains, soybeans, and animal proteins in the world, this volume focuses attention on the farmers whose labors, decision making, and risk taking throw into relief the implications and limitations of our global industrial food system. The case studies here acknowledge the agency of farmers and offer ways forward in the direction of sustainable agriculture.

Transforming the Prairies Shannon Stunden Bower, 2024-11-01. *Transforming the Prairies* proposes a new understanding of Canada's Prairie Farm Rehabilitation Administration (PFRA), complicating common views of the agency as a model of

effective government environmental management Between 1935 and 2009 the PFRA promoted agricultural rehabilitation in and beyond the Canadian Prairies with mixed and equivocal results The promotion of strip farming as a soil conservation technique for example left crops susceptible to sawfly infestations The PFRA s involvement in irrigation development in Ghana increased the local population s vulnerability to various illnesses And PFRA infrastructure construction intended to serve the public good failed to account for the interests of affected Indigenous peoples The PFRA is revealed as being a high modernist state agency that produced varied environmental outcomes and that contributed to consolidating colonialism and racism This investigation affirms the importance of engaging historical perspectives to help ensure that contemporary environmental management efforts support more just and sustainable futures *Tracking Country* Shane

Hamilton,2008-09-15 *Tracking Country* is a social history of long haul trucking that explores the contentious politics of free market capitalism in post World War II America Shane Hamilton paints an eye opening portrait of the rural highways of the American heartland and in doing so explains why working class populist voters are drawn to conservative politicians who seemingly don t represent their financial interests Hamilton challenges the popular notion of red state conservatism as a devil s bargain between culturally conservative rural workers and economically conservative demagogues in the Republican Party The roots of rural conservatism Hamilton demonstrates took hold long before the culture wars and free market fanaticism of the 1990s As Hamilton shows truckers helped build an economic order that brought low priced consumer goods to a greater number of Americans They piloted the big rigs that linked America s factory farms and agribusiness food processors to suburban supermarkets across the country *Tracking Country* is the gripping account of truckers whose support of post New Deal free enterprise was so virulent that it sparked violent highway blockades in the 1970s It s the story of bandit drivers who inspired country songwriters and Hollywood filmmakers to celebrate the last American cowboy and of ordinary blue collar workers who helped make possible the deregulatory policies of Jimmy Carter and Ronald Reagan and set the stage for Wal Mart to become America s most powerful corporation in today s low price low wage economy Some images inside the book are unavailable due to digital copyright restrictions *Family Farms: Survival and Prospect* Harold

Brookfield,Helen Parsons,2007-11-08 This book surveys the social conditions of family farming across the world and the conditions of its survival into the twenty first century **Ethical Eating in the Postsocialist and Socialist World** Yuseon

Jung,Jakob A. Klein,Melissa L. Caldwell,2014-02-21 Current discussions of the ethics around alternative food movements concepts such as local organic and fair trade tend to focus on their growth and significance in advanced capitalist societies In this groundbreaking contribution to critical food studies editors Yuseon Jung Jakob A Klein and Melissa L Caldwell explore what constitutes ethical food and ethical eating in socialist and formerly socialist societies With essays by anthropologists sociologists and geographers this politically nuanced volume offers insight into the origins of alternative food movements and their place in today s global economy Collectively the essays cover discourses on food and morality the material and social

practices surrounding production trade and consumption and the political and economic power of social movements in Bulgaria China Cuba Lithuania Russia and Vietnam Scholars and students will gain important historical and anthropological perspective on how the dynamics of state market citizen relations continue to shape the ethical and moral frameworks guiding food practices around the world **The American State from the Civil War to the New Deal** Paul D.

Moreno,2013-06-28 This book tells the story of constitutional government in America during the period of the social question After the Civil War and Reconstruction and before the second Reconstruction and cultural revolution of the 1960s Americans dealt with the challenges of the urban and industrial revolutions In the crises of the American Revolution and the Civil War the American founders and then Lincoln and the Republicans returned to a long tradition of Anglo American constitutional principles During the Industrial Revolution American political thinkers and actors gradually abandoned those principles for a set of modern ideas initially called progressivism The social crisis culminating in the Great Depression did not produce a Lincoln to return to the founders principles but rather a series of leaders who repudiated them Since the New Deal Americans have lived in a constitutional twilight not having completely abandoned the natural rights constitutionalism of the founders nor embraced the entitlement based welfare state of modern liberalism **Making Local Food Work** Brandi

Janssen,2017-04-15 When it comes to local food it takes more than knowing your farmer Brandi Janssen takes on some of the myths about how the local food system works and what it needs to thrive Advocates claim that small biodiverse farms will fundamentally change farming rural communities and the American diet For many simply by knowing our farmers we become champions of a new way of eating that revolutionizes our economy and society But that argument ignores the fact that if local food is to succeed it requires many of the trappings of conventional food production including processors middle men inspectors and regulators By listening to and working alongside people trying to build a local food system in Iowa Janssen uncovers the complex realities of making it work Although the state is better known for its vast fields of conventionally grown corn and soybeans it has long boasted a robust network of small diverse farms community supported agriculture enterprises and farmers markets As she picks tomatoes processes wheatgrass and joins a parents committee trying to buy local lettuce for a school lunch Janssen asks how small farmers and CSA owners deal with farmers market regulations neighbors who spray pesticides on crops or lawns and sanitary regulations on meat processing and milk production How can they meet the needs of large buyers like school districts Who does the hard work of planting weeding harvesting and processing Is local food production benefitting rural communities as much as advocates claim In answering these questions Janssen displays the pragmatism and level headedness one would expect of the heartland much like the farmers and processors profiled here It is doable she states but we are going to have to do more than shop at our local farmers market to make it happen This book is an ideal introduction to what local food means today and what it might be tomorrow **Misalliance** Edward Miller,2013-04-15 Diem's alliance with Washington has long been seen as a Cold War relationship gone bad undone by either American

arrogance or Diem's stubbornness Edward Miller argues that this misalliance was more than just a joint effort to contain communism It was also a means for each side to shrewdly pursue its plans for nation building in South Vietnam *The Global Food Economy* Tony Weis,2008-12-08 The Global Food Economy examines the human and ecological cost of what we eat The current food economy is characterized by immense contradictions Surplus food mountains bountiful supermarkets and rising levels of obesity stand in stark contrast to widespread hunger and malnutrition Transnational companies dominate the market in food and benefit from subsidies whilst farmers in developing countries remain impoverished Food miles mounting toxicity and the ecological hoofprint of livestock mean that the global food economy rests on increasingly shaky environmental foundations This book looks at how such a system came about and how it is being enforced by the WTO Ultimately Weis considers how we can find a way of building socially just ecologically rational and humane food economies

Corn Meets Maize Lauren Baker,2013 This compelling book explores the intimate connections between people and plants agriculture and cooking and the practical work of building local food networks and transnational social movements Lauren E Baker uses corn and maize to consider central debates about food security and food sovereignty biodiversity and biotechnology culture and nature as well as globalization and local responses in Mexico and beyond For the author corn symbolizes the commoditization of agriculture and the cultural spiritual ecological and economic separation of people from growing cooking and sharing food Conversely maize represents emerging food movements that address contemporary health environmental and economic imperatives while rooted in agricultural and culinary traditions The meeting of corn and maize reveals the challenge of and possibilities for reclaiming food from its commodity status in the global context of financial turmoil food crises and climate change *Southern Farmers and Their Stories* Melissa Walker,2006-09-01 The industrial expansion of the twentieth century brought with it a profound shift away from traditional agricultural modes and practices in the American South The forces of economic modernity specialization mechanization and improved efficiency swept through southern farm communities leaving significant upheaval in their wake In an attempt to comprehend the complexities of the present and prepare for the uncertainties of the future many southern farmers searched for order and meaning in their memories of the past In *Southern Farmers and Their Stories* Melissa Walker explores the ways in which a diverse array of farmers remember and recount the past The book tells the story of the modernization of the South in the voices of those most affected by the decline of traditional ways of life and work Walker analyzes the recurring patterns in their narratives of change and loss filling in gaps left by more conventional political and economic histories of southern agriculture *Southern Farmers and Their Stories* also highlights the tensions inherent in the relationship between history and memory Walker employs the concept of communities of memory to describe the shared sense of the past among southern farmers History and memory converge and shape one another in communities of memory through an ongoing process in which shared meanings emerge through an elaborate alchemy of recollection and interpretation In her careful analysis of more than five hundred

oral history narratives Walker allows silenced voices to be heard and forgotten versions of the past to be reconsidered Southern Farmers and Their Stories preserves the shared memories and meanings of southern agricultural communities not merely for their own sake but for the potential benefit of a region a nation and a world that has much to learn from the lessons of previous generations of agricultural providers *The Global Food System* William D. Schanbacher, 2014-07-23 This detailed analysis of the global food system looks at the way food is produced distributed and consumed in an effort to create a more equitable and healthful system worldwide With large scale famine afflicting regions around the globe and overconsumption and unhealthy eating habits destroying others many are beginning to wonder if access to food is less of a class based social problem and more of an ethical issue affecting the lives and livelihoods of people all over the world This thoughtful text provides a thorough examination of the factors contributing to this global concern exploring the complexities of international food supply and demand as well as the efforts to bring about a more just global food system Through this groundbreaking volume author and educator Will Schanbacher sheds light on flaws in the current structure and suggests ways to achieve a more balanced approach He considers the economics politics and activism behind and involved in the production distribution and consumption of the global food system In an effort to illuminate many problems associated with hunger inequality and injustice in the food system the book also offers many potential strategies and solutions for making a more healthy sustainable and equitable world Chapters contain both theoretical models and concrete practices for food security and offer strategies for creating an equitable system *Pig Tales: An Omnivore's Quest for Sustainable Meat* Barry Estabrook, 2015-05-04 A Splendid Table Staff Book Pick of the Year Estabrook a reporter of iron constitution and persistence has dug deep into the truth about the American pork industry without losing his sense of humor and humanity Christopher Kimball Wall Street Journal In *Pig Tales* New York Times best selling author of *Tomatoland* Barry Estabrook turns his attention to the dark side of the American pork industry Drawing on personal experiences raising pigs as well as sharp investigative instincts Estabrook covers the range of the human porcine experience He shows how these intelligent creatures are all too often subjected to lives of suffering in confinement and squalor sustained on a drug laced diet just long enough to reach slaughter weight But Estabrook also reveals how it is possible to raise pigs responsibly and respectfully benefiting producers and consumers as well as some of the top chefs in America Provocative witty and deeply informed *Pig Tales* is bound to spark conversation at dinner tables across America *Watering the Revolution* Mikael D. Wolfe, 2017-06-22 In *Watering the Revolution* Mikael D Wolfe transforms our understanding of Mexican agrarian reform through an environmental and technological history of water management in the emblematic Laguna region Drawing on extensive archival research in Mexico and the United States Wolfe shows how during the long Mexican Revolution 1910 1940 engineers distribution of water paradoxically undermined land distribution In so doing he highlights the intrinsic tension engineers faced between the urgent need for water conservation and the imperative for development during the contentious modernization of the Laguna

s existing flood irrigation method into one regulated by high dams concrete lined canals and motorized groundwater pumps This tension generally resolved in favor of development which unintentionally diminished and contaminated the water supply while deepening existing rural social inequalities by dividing people into water haves and have nots regardless of their access to land By uncovering the varied motivations behind the Mexican government s decision to use invasive and damaging technologies despite knowing they were ecologically unsustainable Wolfe tells a cautionary tale of the long term consequences of short sighted development policies *The Promise of New Agricultural Markets* Anthony Pahnke,2024

Zusammenfassung This book explores the nature of challenges facing agriculture emphasizing the need to rethink how markets are organized in food production Describing markets as institutions Anthony Pahnke investigates the meaning and nature of the dynamic overlap of politics with production He explores how past policies in the US and Europe concerning food production can be updated to meet the various challenges that stakeholders face on both sides of the Atlantic such as racial inequity ongoing deterioration of economic conditions for farmers and workers and environmental devastation He also addresses the theorists of degrowth and socialist markets focusing particularly on the economics and politics of food production circulation and distribution In response Pahnke proposes democratizing and internationalizing supply management a system of production quotas for producers import controls and institutions meant to connect the different players in supply chains He sketches the framework for such changes and shows how the political shifts currently taking place in Europe and the United States make these changes feasible *The Promise of New Agricultural Markets* provides thoughtful and hopeful answers for policymakers researchers and activists to difficult questions about what the future of our food system will hold Anthony Pahnke is Associate Professor of International Relations at San Francisco State University He is the author of *Brazil s Long Revolution* *Radical Achievements of the Landless Workers Movement* 2018 and *Agrarian Crisis in the United States* *Pathways for Reform* 2023 *Food Policy* Janel Obenchain,Arlene Spark,2015-08-26
