La Monte, 1932      *Kings and Lords in the Latin Kingdom of Jerusalem* Hans Eberhard Mayer, 2024-10-28 In the present volume the third selection of his articles to be published Professor Mayer deals with questions of royal authority and power in the Crusader kingdom of Jerusalem He first examines the relationship between the monarchy and the Church questions of royal succession and aspects of the royal chancery but is also concerned to trace the king's efforts to create a new clientele of loyal vassals The second group of studies reverses the perspective and looks at the origins and development of the lordships of the kingdom notably at the important county of Jaffa and at the role of the Ibelin the most significant family in the land      *Monarchy and Lordships in the Latin Kingdom of Jerusalem, 1099-1291* Steven Tibble, 1989 The shifting balance of power between the monarchy and the nobility within the Latin Kingdom of Jerusalem has been the subject of much scholarly debate Tibble here demonstrates for the first time the unprecedented strategic and economic influence wielded by the Knights Templar and the Knights of St John in determining the political future of the region Drawing extensively on chronicles of the twelfth and thirteenth centuries he shows that secular power as a whole was on the wane much earlier than has previously been imagined and that by the end of the thirteenth century the true struggle was between the secular authorities and the Military Orders      **Burgesses and Burgess Law in the Latin Kingdoms of Jerusalem and Cyprus (1099-1325)** Marwan Nader, 2016-04-15 This is the first book devoted to the study of burgesses in the Latin Kingdoms of Jerusalem and Cyprus 1099 1325 It offers a comprehensive assessment of the contributions made by the non feudal class to the development of legal and commercial institutions in the 12th 13th and 14th centuries Dispensing with the commonly held view that burgesses had only marginal influence evidence is presented to illustrate how the existence of a middle class was essential to the ambitions of the kingdoms leaders A systematic examination of all relevant contemporary source material charters law books and narrative accounts sheds light on how serfs and freemen originating from diverse regions of Europe were able to organise themselves into a class whose status set them apart from non Latin Christians and Muslims The study considers at length the different ways in which burgess legislation was formulated traces the gradual development of the Cour des Bourgeois the court of burgesses in terms of its composition and competence describes in detail the burgess laws of Acre and Nicosia which related for example to marriage and inheritance and defines the special characteristics of a type of property known as a borgesie which was mostly but not exclusively in the hands of burgesses Dr Nader's research furthermore reveals the complexity of burgess jurisdiction and legislation in the East and

advocates the theory that secular courts established by ecclesiastical institutions exercised authority over burgesses and borgesies in matters which went beyond the parameters of purely ecclesiastical jurisdiction *Handbook of Church History: The church in the age of Feudalism, by F. Kempf, and others* Hubert Jedin, John Patrick Dolan, 1969 *Women and Wealth in Late Medieval Europe* T. Earenfight, 2010-03-15 The twelve essays in *Women and Wealth in Late Medieval Europe* re-examine the vexing issue of women money wealth and power from distinctive perspectives literature history architectural history using new archival sources The contributors examine how money and changing attitudes toward wealth affected power relations between women and men of all ranks especially the patriarchal social forces that constrained the range of women's economic choices Employing theories on gender culture and power this volume reveals wealth as both the motive force in gender relations and a precise indicator of other more subtle forms of power and influence mediated by gender **The Crusader Kingdom of Jerusalem** Alan V. Murray, 2000 **Transactions of the Royal Historical Society: Volume 9** Royal Historical Society, 1999-12-09 Volume 9 of the RHS Transactions contains essays based around the theme oral history memory and written tradition Ritual, Images, and Daily Life Gerhard Jaritz, 2012 Medieval images and their content intentions and functions regularly followed specific strategies rituals and symbols of communication This is true for religious as well as for secular images One can recognize these strategies and rituals through analyzing the patterns that occur in the varieties of image construction image space image messages and their perception This book contains contributions by international specialists whose research interests concentrate on these patterns the rituals associated with them and the influences of these phenomena on the daily life of the image audience Series History Research and Science Geschichte Forschung und Wissenschaft Vol 39 Joscelyn III and the Fall of the Crusader States, 1134-1199 Robert Lawrence Nicholson, 2023-12-14 **Crusading Warfare 1097-1193** R. C. Smail, 1956 A Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries, 2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity

especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense

*Crusaders and Crusading in the Twelfth Century* Giles Constable, 2016-12-05 Crusading in the twelfth century was less a series of discrete events than a manifestation of an endemic phenomenon that touched almost every aspect of life at that time The defense of Christendom and the recovery of the Holy Land were widely shared objectives Thousands of men and not a few women participated in the crusades including not only those who took the cross but many others who shared the costs and losses as well as the triumphs of the crusaders This volume contains not a narrative account of the crusades in the twelfth century but a group of studies illustrating many aspects of crusading that are often passed over in narrative histories including the courses and historiography of the crusades their background ideology and finances and how they were seen in Europe Included are revised and updated versions of Giles Constable's classic essays on medieval crusading along with two major new studies on the cross of the crusaders and the Fourth Crusade and two excursions on the terminology of crusading and the numbering of the crusades They provide an opportunity to meet some individual crusaders such as Odo Arpinus whose remarkable career carried him from France to the east and back again and whose legendary exploits in the Holy Land were recorded in the Old French crusade cycle Other studies take the reader to the boundaries of Christendom in Spain and Portugal and in eastern Germany where the campaigns against the Wends formed part of the wider crusading movement Together they show the range and depth of crusading at that time and its influence on the broader history of the period

*The New Cambridge Medieval History: Volume 4, C.1024-c.1198, Part 2* Rosamond McKitterick, David Abulafia, C. T. Allmand, 1995 The fourth volume of The New Cambridge Medieval History covers the eleventh and twelfth centuries which comprised perhaps the most dynamic period in the European middle ages This is a history of Europe but the continent is interpreted widely to include the Near East and North Africa The volume is divided into two parts of which this the second deals with the course of events ecclesiastical and secular and major developments in an age marked by the transformation of the position of the papacy in a process fuelled by a radical reformation of the church the decline of the western and eastern empires the rise of western kingdoms and Italian elites and the development of governmental structures the beginnings of the recovery of Spain from the Moors and the establishment of western settlements in the eastern Mediterranean region in the wake of the crusades **The Routledge Companion to the Crusades** Peter Lock, 2013-04-15 A compilation of facts figures maps family trees summaries of the major crusades and their historiography the Routledge Companion to the Crusades spans a broad chronological range from the eleventh to the eighteenth century and gives a chronological framework and context for modern research on the crusading movement Not just a history of the Crusades but an overview

of the logistical economic social and biographical history this is a core text for students of history and religious studies

*The Franks in Outremer* Alan V. Murray, 2023-05-31 This volume brings together twenty studies relating to the history of the Latin principalities established in Palestine and Syria from their foundation in the course of the First Crusade up to their defeat by Saladin at the battle of Hattin in 1187 Half of the essays deal with the first three decades of the Frankish settlement focusing on the monarchy of the kingdom of Jerusalem under Godfrey of Bouillon Baldwin I and Baldwin II and on the origins and prosopography of the Frankish nobility Beyond this are longer ranging studies devoted to sacred and secular aspects of the landscape and population of Palestine including the settlement of the city of Jerusalem the military use of the relic of the True Cross and wider strategic considerations concerning the defence of the Holy Land The final section considers how the Franks perceived and interacted with the Muslim and native Christian inhabitants of Syria Palestine and neighbouring lands with a particular emphasis on the evidence of the great chronicle of William of Tyre
