Charles C. Mann

Fever Trail In Search Of The Cure For Malaria:

The Fever Trail Mark Honigsbaum, 2003-05 Literally Italian for bad air malaria once plagued Rome tropical trade routes and colonial ventures into India and South America and the disease has no known antidote aside from the therapeutic effects of the miraculous quinine This first book from journalist Honigsbaum is a rousing history of the search for febrifuge or more specifically the rare red cinchona tree the bark from which quinine is derived *The Fever Trail* Mark Honigsbaum, 2001

The Andean Wonder Drug Matthew James Crawford, 2016-09-07 In the eighteenth century malaria was a prevalent and deadly disease and the only effective treatment was found in the Andean forests of Spanish America a medicinal bark harvested from cinchona trees that would later give rise to the antimalarial drug quinine In 1751 the Spanish Crown asserted control over the production and distribution of this medicament by establishing a royal reserve of fever trees in Quito Through this pilot project the Crown pursued a new vision of imperialism informed by science and invigorated through commerce But ultimately this project failed much like the broader imperial reforms that it represented Drawing on extensive archival research Matthew Crawford explains why showing how indigenous healers laborers merchants colonial officials and creole elites contested European science and thwarted imperial reform by asserting their authority to speak for the natural world *The Andean Wonder Drug* uses the story of cinchona bark to demonstrate how the imperial politics of knowledge in the Spanish Atlantic ultimately undermined efforts to transform European science into a tool of empire *The Ethnobotany of Eden* Robert A. Voeks, 2018-06-27 In the mysterious and pristine forests of the tropics a wealth of ethnobotanical panaceas and shamanic knowledge promises cures for everything from cancer and AIDS to the common cold To access such miracles we need only to discover and protect these medicinal treasures before they succumb to the corrosive forces of the modern world A compelling biocultural story certainly and a popular perspective on the lands and peoples of equatorial latitudes but true Only in part In *The Ethnobotany of Eden* geographer Robert A Voeks unravels the long lianas of history and occasional strands of truth that gave rise to this irresistible jungle medicine narrative By exploring the interconnected worlds of anthropology botany and geography Voeks shows that well intentioned scientists and environmentalists originally crafted the jungle narrative with the primary goal of saving the world's tropical rainforests from destruction It was a strategy deployed to address a pressing environmental problem one that appeared at a propitious point in history just as the Western world was taking a more globalized view of environmental issues And yet although supported by science and its practitioners the story was also underpinned by a persuasive mix of myth sentimentality and nostalgia for a long lost tropical Eden Resurrecting the fascinating history of plant prospecting in the tropics from the colonial era to the present day *The Ethnobotany of Eden* rewrites with modern science the degradation narrative we've built up around tropical forests revealing the entangled origins of our fables of forest cures *What's the Use of Art?* Jan Mrazek, Morgan Pitelka, 2007-12-03 Post Enlightenment notions of culture which have been naturalized in the West for centuries require that art be autonomously beautiful universal

and devoid of any practical purpose The authors of this multidisciplinary volume seek to complicate this understanding of art by examining art objects from across Asia with attention to their functional ritual and everyday contexts From tea bowls used in the Japanese tea ceremony to television broadcasts of Javanese puppet theater from Indian wedding chamber paintings to art looted by the British army from the Chinese emperor's palace from the adventures of a Balinese magical dagger to the political functions of classical Khmer images the authors challenge prevailing notions of artistic value by introducing new ways of thinking about culture The chapters consider art objects as they are involved in the world how they operate and are experienced in specific sites collections rituals performances political and religious events and imagination and in individual peoples lives how they move from one context to another and change meaning and value in the process for example when they are collected traded and looted or when their images appear in art history textbooks how their memories and pasts are or are not part of their meaning and experience Rather than lead to a single universalizing definition of art the essays offer multiple divergent and case specific answers to the question What is the use of art and argue for the need to study art as it is used and experienced Contributors Cynthia J. Bogel, Louise Cort, Richard H. Davis, Robert DeCaroli, James L. Hevia, Janet Hoskins, Kaja McGowan, Jan Mrzek, Lene Pedersen, Morgan Pitelka, Ashley Thompson

Health in the Highlands David Carey, 2023-07-11 In the early to mid twentieth century the governments of Ecuador and Guatemala sought to expand Western medicine within their countries with the goals of addressing endemic diseases and improving infant and maternal health These efforts often clashed with indigenous medical practices particularly in the rural highlands Drawing on extensive original archival research historian David Carey Jr shows that indigenous populations embraced a syncretic approach to health combining traditional and new practices At times the governments of both nations encouraged or at least allowed such a synthesis yet they also attacked indigenous lifeways going so far as to criminalize native medical practitioners and to conduct medical experiments on indigenous people without consent *Health in the Highlands* traces the experiences of curanderos midwives bonesetters witches doctors and nurses and the indigenous people they served Carey interrogates the relationship between progressive public health policy and indigenous well being offering lessons from the past that remain relevant in the present Our best way forward this history suggests may be a compassionate syncretism that joins indigenous approaches to healing with science and a pursuit of environmental and social justice

1493 Charles C. Mann, 2011 More than 200 million years ago geological forces split apart the continents Isolated from each other the two halves of the world developed totally different suites of plants and animals Columbus's voyages brought them back together and marked the beginning of an extraordinary exchange of flora and fauna between Eurasia and the Americas *Expedition and Wilderness Medicine* Gregory H. Bledsoe, Michael J. Manyak, David A. Townes, 2008-11-03 With an increase in visits to remote and dangerous locations around the world the number of serious and fatal injuries and illnesses associated with these expeditions has markedly increased Medical personnel working in or near such locations are not always explicitly trained in the management of unique environmental injuries such as high altitude sickness the bends lightning strikes frostbite acute dehydration venomous stings and bites and tropical diseases Many health care professionals seek training in the specialty of wilderness medicine to cope with the health risks faced when far removed from professional care resources and the American College of Emergency Medicine has recently mandated that a minimum level of proficiency needs to be exhibited by all ER physicians in this discipline This book covers everything a prospective field physician or medical consultant needs to prepare for when beginning an expedition and explains how to treat a variety of conditions in a concise clinically oriented format *Mosquito Empires* J. R. McNeill, 2010-01-11 This book explores the links among ecology disease and international politics in the context of the Greater Caribbean the landscapes lying between Surinam and the Chesapeake in the seventeenth through early twentieth centuries Ecological changes made these landscapes especially

suitable for the vector mosquitoes of yellow fever and malaria and these diseases wrought systematic havoc among armies and would be settlers Because yellow fever confers immunity on survivors of the disease and because malaria confers resistance these diseases played partisan roles in the struggles for empire and revolution attacking some populations more severely than others In particular yellow fever and malaria attacked newcomers to the region which helped keep the Spanish Empire Spanish in the face of predatory rivals in the seventeenth and early eighteenth centuries In the late eighteenth and through the nineteenth century these diseases helped revolutions to succeed by decimating forces sent out from Europe to prevent them

Conduct Under Fire John A. Glusman,2006-04-25 The fierce bloody battles of Bataan and Corregidor in the Philippines are legendary in the annals of World War II Those who survived faced the horrors of life as prisoners of the Japanese In *Conduct Under Fire* John A Glusman chronicles these events through the eyes of his father Murray and three fellow navy doctors captured on Corregidor in May 1942 Here are the dramatic stories of the fall of Bataan the siege of the Rock and the daily struggles to tend the sick wounded and dying during some of the heaviest bombardments of World War II Here also is the desperate war doctors and corpsmen waged against disease and starvation amid an enemy that viewed surrender as a disgrace To survive the POWs functioned as a family But the ties that bind couldn't protect them from a ruthless counteroffensive waged by American submarines or from the B 29 raids that burned Japan's major cities to the ground Based on extensive interviews with American British Australian and Japanese veterans as well as diaries letters and war crimes testimony this is a harrowing account of a brutal clash of cultures of a race war that escalated into total war Like *Flags of Our Fathers* and *Ghost Soldiers* *Conduct Under Fire* is a story of bravery on the battlefield and ingenuity behind barbed wire one that reveals the long shadow the war cast on the lives of those who fought it

Meriwether Lewis Thomas C. Danisi,John C. Jackson,2024-04-23 The definitive biography on Meriwether Lewis by Thomas C Danisi and John C Jackson now in paperback for the first time October 11 2009 marks the bicentennial of

Meriwether Lewis's death As the leader of the Lewis and Clark expedition an epic exploration of uncharted territory west of the Mississippi Lewis has been the subject of several biographies yet much of the published information is unreliable A number of myths surrounding his life and death persist Now independent scholars Thomas C Danisi and John C Jackson have written this definitive biography based on twelve years of meticulous research They have re-examined the original Lewis and Clark documents and searched through obscure and overlooked sources to reveal a wealth of fascinating new information on the enigmatic character and life of Meriwether Lewis Instead of focusing on the Lewis and Clark expedition the authors concentrate on what Lewis was doing immediately before and after the journey through Western territory They assess his role as a natural scientist and as governor of the Louisiana Territory His lifelong mentor Thomas Jefferson thrust the latter role upon Lewis during a time of crisis As Danisi and Jackson reveal he would much rather have devoted this time compiling his notes and scientific findings into a vivid narrative of the expedition's adventures Finally using medical documentation the book reveals the actual cause of Lewis's untimely death The authors address both the conspiracy theories regarding murder as the cause of Lewis's death and the longstanding belief that he committed suicide The Meriwether Lewis that emerges from this thoroughly researched biography is a man of honorable intentions who met severe challenges and handled difficult confrontations with patience and diplomacy Both professional historians and armchair devotees of American history will want to add this important new work to their libraries

The Pandemic Century Mark Honigsbaum, 2019-04-09 With a New Chapter and Updated Epilogue on Coronavirus A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors Choice Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash Howard Markel MD PhD director of the Center for the History of Medicine University of Michigan How can we understand the COVID 19 pandemic Ever since the 1918 Spanish influenza pandemic scientists have dreamed of preventing such catastrophic outbreaks of infectious disease Yet despite a century of medical progress viral and bacterial disasters continue to take us by surprise inciting panic and dominating news cycles In *The Pandemic Century* a lively account of scares both infamous and less known medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases We meet dedicated disease detectives obstructive or incompetent public health officials and brilliant scientists often blinded by their own knowledge of bacteria and viruses and see how fear of disease often exacerbates racial religious and ethnic tensions Now updated with a new chapter and epilogue

From Cincinnati to the Colorado Ranger - the Horsemanship of Ulysses S. Grant Denise M. Dowdall, 2012-11-14 Ulysses Grant the highest ranking general of the American Civil War and 18th president of the United States was a surprisingly reluctant soldier and an even more reluctant president But he was always an enthusiastic horseman Rich with anecdote humour and humanity *From Cincinnati to the Colorado Ranger* tells of the extraordinary collection of horses that inhabited Grant's world From the placid plough horses of his youth to the brave war

chargers that carried the destiny of the nation on their backs From the pampered trotters of the Gilded Age to the exotic stallions whose blood enriched a new breed of American horse The story of these horses more than illuminates the life and culture of a great American *Reckoning* Diane M. Nelson,2009-03-18 An examination of how Guatemalans are reckoning with the aftermath of a civil war that left fundamental assumptions about selves and others in tatters when it officially ended in 1996 *Human Health and Forests* Carol J. Pierce Colfer,2012-05-04 Hundreds of millions of people live and work in forests across the world One vital aspect of their lives yet largely unexamined is the challenge of protecting and enhancing the unique relationship between the health of forests and the health of people This book written for a broad audience is the first comprehensive introduction to the issues surrounding the health of people living in and around forests particularly in Asia South America and Africa Part I is a set of synthesis chapters addressing policy public health environmental conservation and ecological perspectives on health and forests including women and child health medicinal plants and viral diseases such as Ebola SARS and Nipah Encephalitis Part II takes a multi lens approach to lead the reader to a more concrete and holistic understanding It features case studies from around the world that cover important issues such as the links between HIV AIDS and the forest sector and between diet and health Part III looks at the specific challenges to health care delivery in forested areas including remoteness and the integration of traditional medicine with modern health care The generous use of boxes with specific examples adds layers of depth to the analyses The book concludes with a synthesis designed for use by practitioners and policymakers to work with forest dwellers to improve their health and their ecosystems This book is a vital addition to the knowledge base of all professionals academics and students working on forests natural resources management health and development worldwide Published with CIFOR and People and Plants International
