Fictions Of Nuclear Disaster:

Fictions of Nuclear Disaster David Dowling, 1987-06-18 **Midnight in Chernobyl** Adam Higginbotham, 2020-02-04 A New York Times Best Book of the Year A Time Best Book of the Year A Kirkus Reviews Best Nonfiction Book of the Year 2020 Andrew Carnegie Medals for Excellence Winner From journalist Adam Higginbotham the New York Times bestselling account that reads almost like the script for a movie The Wall Street Journal a powerful investigation into Chernobyl and how propaganda secrecy and myth have obscured the true story of one of the history's worst nuclear disasters Early in the morning of April 26 1986 Reactor Number Four of the Chernobyl Atomic Energy Station exploded triggering one of the twentieth century's greatest disasters In the thirty years since then Chernobyl has become lodged in the collective nightmares of the world shorthand for the spectral horrors of radiation poisoning for a dangerous technology slipping its leash for ecological fragility and for what can happen when a dishonest and careless state endangers its citizens and the entire world But the real story of the accident clouded from the beginning by secrecy propaganda and misinformation has long remained in dispute Drawing on hundreds of hours of interviews conducted over the course of more than ten years as well as letters unpublished memoirs and documents from recently declassified archives Adam Higginbotham brings the disaster to life through the eyes of the men and women who witnessed it firsthand The result is a riveting deeply reported reconstruction Los Angeles Times and a definitive account of an event that changed history a story that is more complex more human and more terrifying than the Soviet myth The most complete and compelling history yet The Christian Science Monitor Higginbotham's superb enthralling and necessarily terrifying extraordinary The New York Times book is an indelible portrait of the lessons learned when mankind seeks to bend the natural world to his will lessons which in the face of climate change and other threats remain not just vital but necessary Nuclear Fictions Michael Gardiner, 2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsiders of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick *The Nuclear Catastrophe: A Fiction*

disaster and its aftermath Examining short stories and novels by both new and established writers author Rachel DiNitto effectively captures this literary tide and names it after the nuclear accident that turned a natural disaster into an environmental and political catastrophe The book takes a spatial approach to a new literary landscape tracing Fukushima fiction thematically from depictions of the local experience of victims on the ground through the regional and national conceptualizations of the disaster to considerations of the disaster as history and last to the global concerns common to nuclear incidents worldwide Throughout DiNitto shows how fiction writers played an important role in turning the disaster into a narrative of trauma that speaks to a broad readership within and outside Japan Although the book examines fiction about all three of the disasters earthquake tsunami and nuclear meltdowns DiNitto contends that Fukushima fiction reaches its critical potential as a literature of nuclear resistance She articulates the stakes involved arguing that serious fiction provides the critical voice necessary to combat the government and nuclear industry s attempts to move the disaster off the headlines as the 2020 Olympics approach and Japan restarts its idle nuclear power plants Rigorous and sophisticated yet highly readable and relevant for a broad audience Fukushima Fiction is a critical intervention of humanities scholarship into the growing field of Fukushima studies The work pushes readers to understand the disaster as a global crisis and to see the importance of literature as a critical medium in a media saturated world By engaging with other disasters from 9 11 to Chernobyl to Hurricane Katrina DiNitto brings Japan s local and national tragedy to the attention of a global audience evocatively conveying fiction s power to imagine the unimaginable and the unforeseen

Cold War Space and Culture in the 1960s and 1980s

David L. Pike, 2021. *Cold War Space and Culture in the 1960s and 1980s: The Bunkered Decades*. This book studies the two periods in which Americans were actively encouraged to excavate their own backyards while governments the world over exhausted their budgets on fortified super shelters and megaton bombs. The dreams and nightmares inspired by the spectre of nuclear destruction were expressed in images and forms from comics, movies and pulp paperbacks to policy documents, protest movements and survivalist tracts. Illustrated with photographs, artwork and movie and television stills of real and imagined fallout shelters and other bunker fantasies, award-winning author David L. Pike's continues his decades-long exploration of the meanings of modern undergrounds. Ranging widely across disciplines, this volume finds unexpected connections between cultural icons and forgotten texts, plumbs the bunker's stratifications of class, region, race and gender, and traces the often unrecognized through lines leading from the 1960s and the less studied 1980s into the present. Although the Cold War ended over 30 years ago, its legacy looms large in anxieties around security borders and all manners of imminent apocalypse. Treating the bunker in its concrete presence and in its flightiest fantasies while attending equally to its uniquely American desires and pathologies and to its global impact, *Cold War Space and Culture in the 1960s and 1980s* proposes a new way to understand the outsized afterlife of the bunkered decades.

Cold War Literature, Andrew Hammond, 2006-11-22. This collection of essays analyzes the literary response to the coups, insurgencies and invasions that took place around the globe during the Cold War and explores the thematic and stylistic trends in world writing prompted by Cold War hostilities.

Energy Humanities. Current State and Future Directions, Matúš Mišík, Nada Kujundžić, 2020-11-02. This edited book explicitly deals with the energy humanities, summarising existing knowledge in the area and outlining possible future directions for the nascent field. Assuming a variety of disciplinary stances and using a plethora of methodologies to address a number of pressing energy-related issues, the individual contributions showcase the crucial importance of including the humanities and social sciences into the current discussion on energy. Furthermore, they illustrate one of the central claims of the energy humanities: namely, that energy permeates all aspects of our contemporary modes of existence and is inextricably linked with historical, political, social, ideological and cultural issues, relationships and practices. Through numerous case studies, *Energy Humanities and Energy Transition* looks to the past, present and future in search of examples of best practices and possible models for pathways to a successful energy transition and life after oil. While much of existing research on energy humanities has been criticised for its excessive focus on oil, this book considers a wide range of energy resources, including nuclear energy, renewables and natural gas. Furthermore, it brings to the forefront under-researched topics such as

the colonial legacy inscribed in energy infrastructure and the energy history of the humanities The contributions in this volume explore not only how the perspectives and expertise of the humanities and social sciences can alter the discourse on energy transition and our way of thinking about possible solutions and future scenarios but also how their new focus on energy affects the disciplines themselves Energy Humanities and Energy Transition presents a variety of theories methods topics and disciplinary angles meaning it will be of interest to a wide audience from practitioners and policy makers to students and researchers working across the humanities and social sciences The thematically oriented structure distinct focus of each individual chapter and the comprehensive introduction and conclusion that contextualize the contributions within the wider framework of energy transition make this edited book accessible to readers from many different fields and suitable for various university programs
