Bird Migration across the Himalayas Herbert H. T. Prins,Tsewang Namgail,2017-04-06 The first reference to demonstrate how birds survive the high altitude Central Asian Flyway and the threats to this unique migration

The Invisible Piper Deepak Rikhye,2021-03-06 The Invisible Piper transports the reader back in time to a reality centered around tea production in India Rikhye richly portrays both the sweetness and challenges of his awe inspiring days working on tea estates while weaving in the ancient history of tea and the contemporary history of the tea industry The result is a captivating narrative of how tea shaped our global economy and culture told through the lens of the people behind the leaves Jennie Miller PhD Yale University New Haven Connecticut USA England took to tea for the simple reason that London s water was so bad it had to be boiled before it could

be consumed at all The Thames was lifeless by 1848 and by June 1858 the stench was so bad that it was impossible to continue business in Parliament Tea literally became vital to British life and to the health of the British people Wherever the British went like Canada Australia and New Zealand they took and spread their love of tea with them Deepak Rikhye's poignant memoir of his father and his experiences as an Indian planter contains within itself an incisive analysis of the culture as well as the political economy of tea His proposal that the tea economy be used by India and China to help make peace between themselves is both unique and important His narrative takes the tea drinker so deeply into the origins of the supply to the daily weekly and seasonal routines of a plantation that he almost manages to evoke the sprightly fragrance of a tea garden itself This book gives a unique whiff of the whole culture of tea and all lovers of tea will love it Subroto Roy PhD Cambridge Economist **Taktsang** Dennis Snyder, 2013-09-25 Dr Ivar Nielsen the world's foremost authority in pediatric cancer research has disappeared in Bhutan His four closest friends a trauma surgeon a billionaire businessman a med school dropout and a crazed scientist travel halfway across the globe to find him There they fall into a world that is unknown and unknowable a land whose mythic beauty hides a lurking terror that threatens not only the soul of a nation but the lives of untold thousands of desperately sick children As Ivar's friends arrive in Bhutan what they find there is beyond anything they could have imagined It seems the country holds a secret that is known only to Ivar and that secret is at the heart of his disappearance At the most revered site in all the Himalayas the world of pioneering cancer research and the art of ancient medicine are about to collide with the designs of a vengeful madman With the lives of the world's most vulnerable children at stake events will occur that will change the lives of all involved forever **Darjeeling** Jeff Koehler, 2015-05-12 Darjeeling's tea bushes run across a mythical landscape steeped with the religious the sacred and the picturesque Planted at high elevation in the heart of the Eastern Himalayas in an area of northern India bound by Nepal to the west Bhutan to the east and Sikkim to the north the linear rows of brilliant green waist-high shrubs that coat the steep slopes and valleys around this Victorian hill town produce only a fraction of the world's tea and less than one percent of India's total Yet the tea from that limited crop with its characteristic bright amber-colored brew and muscatel flavors delicate and flowery hinting of apricots and peaches is generally considered the best in the world This is the story of how Darjeeling tea began was key to the largest tea industry on the globe under Imperial British rule and came to produce the highest quality tea leaves anywhere in the world It is a story rich in history intrigue and empire full of adventurers and unlikely successes in culture mythology and religion's ecology and terroir all set with a backdrop of the looming Himalayas and drenching monsoons The story is ripe with the imprint of the Raj as well as the contemporary clout of voodoo farmers getting world record prices for their fine teas and all of it beginning with one of the most audacious acts of corporate smuggling in history But it is also the story of how the industry spiraled into decline by the end of the twentieth century and how this Edenic spot in the high Himalayas seethes with union unrest and a violent independence struggle It is also a front-line fight against the devastating effects of climate

change and decades of harming farming practices a fight that is being fought in some tea gardens and astonishingly won using radical methods Jeff Koehler has written a fascinating chronicle of India and its most sought after tea Blending history politics and reportage together along with a collection of recipes that tea drinkers will love Darjeeling is an indispensable volume for fans of micro history and tea fanatics **Field Guide to Birds of the Indian Subcontinent** Richard Grimmett,Carol Inskipp,Tim Inskipp,2019-05-16 A field guide to all the bird species found in India Pakistan Sri Lanka Nepal Bhutan Bangladesh and the Maldives This comprehensive and definitive guide is the successor to the bestselling Pocket Guide to the Birds of the Indian Subcontinent by the same authors 1375 species are illustrated and described including all residents migrants and vagrants The plates text and maps have been extensively revised The 226 colour plates face concise descriptions and maps for quick at a glance reference Many of the plates depicting every species and many distinct plumages and races have been repainted for this edition and a number of new species added This guide also provides tables summarising identification features of particularly difficult groups such as nightjars warblers and rosefinches This is the ideal companion for anyone birding in the region **Owls of Old Forests of the World** Bruce G. Marcot,1995

Photographic Guide to the Birds of Sri Lanka Bikram Grewal,Bill Harvey,Otto Pfister,2002-06-10 A Photographic Guide to the Birds of Sri Lanka and India is the best most comprehensive photographic guide to the birds of South Asia Because of its vast size and geographical location the Indian subcontinent has some of the world s most diverse avifauna It boasts of thousands of species This birdwatching book covers over 800 species and distinct sub species and contains over 1 000 full color photographs Each species has a distribution map Many of the photographs in this magnificent volume appear for the first time and have been carefully selected to show the most important features of the species illustrated In several cases different plumages or flight shots are included The concise text provides vital information on the plumages voice and habits of each species are also mentioned in the texts The maps are accompanied by a note on the status and distribution This birdwatching book will enable accurate field identification in one of the world s most diverse avifaunal regions Indispensable reading for all bird lovers **Biodiversity Hotspot of the Himalaya** T. Pullaiah,2024-07-05 Biodiversity is declining at an alarming rate due to anthropogenic activities around the world This book is the second volume in the new series Biodiversity Hotspots of the World which highlights the 36 hotspot regions of the world regions that have been designated as reaping maximum benefit from preservation efforts This series is our humble attempt to document these hotspots as a conservation and preservation measure The concise volumes in this series focus on the most interesting and important properties of these hotspots covering physiography and climatology vegetation and forest types amphibian and reptile biodiversity genetic diversity of crops plants fishes butterflies insects birds mammals angiosperms and gymnosperms and much more And of course the unique threats and conservation efforts for the areas are addressed as well The Himalayan Mountains are the highest mountain range in the world and include Mount Everest as well as eight other highest peaks of the

world While it is difficult to document the biodiversity of this inhospitable terrain we do know that out of the 9 000 different species of plants recorded in the area 3 500 plants are endemic to the Eastern Himalaya region Anthropogenic activities including deforestation fragmentation of habitats pollution high population climate change and poaching of wildlife pose serious threats to the biodiversity of the region The highlands have exceptionally rich biodiversity high endemism and over 160 globally threatened species including the densest population of Bengal tigers and the three largest herbivores on the continent the Asian elephant greater one horned rhinoceros and wild water buffalo The region boasts the world s richest counts of alpine flora within its temperate broad leaved forests with a total of 10 000 species of plants This volume Biodiversity Hotspot of the Himalayas as well as the other volumes in this series will be essential resources for researchers and practitioners in the fields of conservation biology ecology and evolution as the series concisely records the existing biodiversity of these hotspots of the world
