Ecology and Conservation of the Cactus Ferruginous Pygmy-owl in Arizona,2000 This report is the result of a cooperative effort by the Rocky Mountain Research Station and the USDA Forest Service Region 3 with participation by the Arizona Game and Fish Department and the Bureau of Land Management It assesses the

state of knowledge related to the conservation status of the cactus ferruginous pygmy owl in Arizona The population decline of this owl has been attributed to the loss of riparian areas before and after the turn of the 20th century Currently the cactus ferruginous pygmy owl is chiefly found in southern Arizona in xeroriparian vegetation and wellstructured upland desertscrub The primary threat to the remaining pygmy owl population appears to be continued habitat loss due to residential development Important information gaps exist and prevent a full understanding of the current population status of the owl and its conservation needs
